Thanks for the information on my old Jewell Electrical Company antique radio
analyzer? It needs a good home. Anyone interested?

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=2255187431

Auction will begin Monday July 5, 2004 at 9:00PM Eastern time. Thanks for looking.

Sorry for giving out the following link to my old Jewell Radio Analyzer before the auction actually started. That apparently resulted in an invalid item notice. Thanks for your patience. If anyone is still interested, the link now works.

This VX-7R is an excellent performing radio packed with features. Wide
Band receive 0.5MHz to 999MHz, True Dual recieve, transmits on
6m,2m,1.25cm, & 70cm HAM Bands at up to 5watts and much more. It is
submersible, 3ft for 30 minutes, and has a rugged magnesium case.
Black in color and in absolute new condition. Includes all original
supplied accessories, box, and manuals and paperwork, warranty card,
etc... Plus I will include an Comet SMA-24 antenna that improves range
over supplied antenna as well as a Comet MH-209SMA which is very handy
when doing close in communications or radio is on belt clip, and a SMA
to PL239 Adapter. $275 + Shipping. All items are in pristine new
condition. I will ship insured to the CONUS only. Contact me at
backyardastronomer@hotmail.com Thanks, Doug

36" Primestar dish with the Ku band FSS Linear LNB (NJR2119F, Vertical
and Horizontal outputs) and mount for sale. Good for FTA or anything
that needs FSS linear LNB or remove LNB and use with feed for ham band.
I'm asking $35 or best offer. I'm in north Texas. I can demonstrate it
operating with my receiver. Please e-mail to: clee at thedoghousemail

Beware of these e-mails, ALSO, the same thing is being done for PAYPAL!!
BOTH Ebay and Paypal will NEVER ask you for this information via e-mail.
If you respond to them, they look EXACTLY like Ebay and Paypal.
I would not even respond to it. Just forward them to spoof@ebay.com
and I believe the other is spoof@paypal.com.
If you click on the link given by them you can "sign in" with bogus username and
passwords.
BEWARE!!!!
You folks might want to pass this around to everyone and list it in other
groups.

> BOTH Ebay and Paypal will NEVER ask you for this information via e-mail.
> If you respond to them, they look EXACTLY like Ebay and Paypal.

Actually they will not when you look closely. Any form legitimately
requesting sensitive personal data will via a 128-bit, encrypted,
secure link, NOT email, and SCAM ARTISTS are incapable of duplicating
these. (Email is not secure.)

Both Explorer and Netscape contain icons at the bottom of the browser
window to show when such a secure link has been established and in
effect with your computer, and both allow you to check the security
level established, and inspect their certification credentials (the
security Certificate that they hold) for authenticity.

Normally eBay and Paypal go through this ritual only when you are
first open your account and is required.

You'll see the identical security measured being taken when doing
online business with any reputable dealer when credit card number are
needed, and also when you access your "On-Line Banking" with
Bankamerica, Fleet, Citicorp, and Chase Bank. In fact, you won't even
be asked to enter your password or PIN number except via a secure,
encrypted link.

Mike, I stand by what I previously posted.

I suggest that you go back and more carefully re-read it before
dismissing it's factual content.

Learn what a secure link is, and how its use is indicated on your web
browser screen.

Learn how to check the seurity level of the link, read its
Certificate, see which security firm issued the certificate, its
expiration date, etc.

Every single one of the "Recent Phishing Attacks" that are cited
represent rather crude email bait, some leading to a non-secured,
non-encrypted, and obviously scam URL that aim to fool only the most
naive and inexperienced net users who evidently never bother to employ
common sense

Of course it's precisely these net ignorant users that are the targets
of the scammers, and nothing except learning how to employ the
security measures alrady existing on the web is going to protect them
from really stupid acts based total upon their own to learn how the
system operates prior to using it.

It's very similar to the confidence artists of current and earlier
generations who relied on the ignorance and/or greed of their victims
for success in perpetrating their scams. All scams that I have seen

rely on one or the other of these factors being present in order to rip someone off of something. On top of that, these scammers justify their actions as an educational exercise of value to their victim, which in many cases it certainly is.

Harry C.

p.s. When bidding on eBay, there are a number of measures that you can employ to protect yourself from being scammer. Always carefully check the sellers feedback and how long he has been a member of eBay. Be wary of "Power Sellers" since these are usually firms that market mass volumes of usually "distressed" merchandise. Be particularly wary of sellers having zero feedback, particularly if they have been a member of eBay for less than a month or two. (Prior to bidding, communicate with these new sellers by email and learn what their story is, realizing that someone selling on eBay has to start somewhere. Still, it's most unusual to find a seller on eBay that has not accumulated some level of positive feedback previously as a buyer. It should be regarded as suspicious when that is not the case.)

I am looking to sell my beautiful Icom IC720a
This HF (high frequency) Ham/Amateur radio comes with matching power supply and desk mic.
It works great and I have used it to make contacts and recieve SSTV and other digital modes. With the correct antenna (and the will to do so..) it will even do C.B. frequencies.

It also comes with the manual.
This is from a NON SMOKING home so no yellow tinge or smoke smell in
the mic.. ;)

See this web page for a nice listing of specs and pictures
http://www.qsl.net/sm7vhs/radio/icom/ic720a/ic720a.htm

Only reason I am selling is because my son wants to get into Quarter
Midget Racing and we need the money for safety equipment and a car.

I would like $350.00 for it and it is located in Central Lower
Michigan

Ed

Ahh, the Ebay Guild is born! Only buy off good established sellers. Those new ones are gonna scam ya.

Mybe that's a good idea. The established sellers can band together to keep new people out.

And your offer is???
Hey... Buy now and I will throw in a brand new in the box CB base
antenna !!! Great for receiving C.B. frequencies.

p.s. I used to own a Lafayette C.B. and it was a great radio for SSB
which got me interested in Ham Radio...

> Ahh, the Ebay Guild is born! Only buy off good established sellers.
> Those new ones are gonna scam ya.

Mike, that's a pretty bizarre interpretation of what I posted. I was
simply sharing my experience gained though something like 5 years of
buying and selling on eBay with the newcomers.

If you want to purchase a "pig in a poke" from a seller with zero feedback it's certainly your option to do so and eBay or its established sellers can do nothing to prevent you from doing so. Then too, if a seller has zero feedback most people would consider it prudent to contact the seller by email and determine the facts of the situation.

I personally purchased a HP LJ4+ laser printer from a seller on eBay with zero feedback, but only after an email conversation with him (since this was an over $100 item plus signigicant shipping expense). In fact, I was the very first to provide him with positive feedback.

Realize the facts. On eBay, the majority of fraud stems from sellers with zero feedback offering highly underpriced popular items who insist on payment by a money order (which once cashed is essentially untraceable). Be afraid when you run into this pattern...be very afraid!

Be aware of the importance of feedback on eBay, because like a D&B report, it paints a picture of the seller's or buyer's past history and performance. Without reading it, you are flying blind!

If you check out my feedback on eBay, you'll learn that since Feb 15, 1999, I've accumulated a total of 313 postive feedbacks (a score of 223 positives since repeat purchase or sales to the same person don't count), plus one neutral from a woman who praised my packing and fast shipping, but claimed that the sealed-in-box antique Cabbage Patch Doll that I sold here "smelled like smoke". Just for the record, the majority of my feedback score stems from items that I have purchased over the years, since I've been only selling since the beginning of the year (roughly 25 items so far this year).

As a seller, I make it a practice to try and ship out an item the day after the auction ends, provided he/she (the buyer) has substantial positive feedback and no negatives even though I have not yet received payment. (I haven't been burned by anyone yet!) Obviously if I received immediate Paypal payment I ship on the next business day, regardless of the buyer's feedback.

Frankly speaking, on eBay the more new sellers the better, because it expands both the quantity and variety of items being offered for sale.

> Mybe that's a good idea. The established sellers can band together to
> keep new people out.

Are you normally a believer in conspiracy theories? :-) As a new seller, I can't imagine how such a thing could even be done, or any reason that anyone would want to! I sell collectable, antique computer game software, ham radio and research components, radiation detection equipment, technical items, etc. Who would it possibly benefit to keep any of my items from being listed on eBay, and sold on eBay as most of them are?

Think about it.

Harry C.

Laugh while you can, penguin-boy. As soon as enough sheep join you on your
self-righteous bandwagon, you'll make a big enough target for the
script-kiddies to bother with...and if you think your precious Linux will be
any better at repelling malicious code than Windows (or OS X, for that
matter), you're mighty naive.

Not that I'm a M$ fan by any stretch; I just think jingoism and dogma is
stupid no matter what form it comes in.

I have, for sale, a Yaesu FT 890 AT all mode ham radio tranceiver. All
features are 100% functional and in great condition. Included with radio
are: Original hand mic, 12 VDC power cord, mobile mounting bracket,
operation manual, and complete service manual. Radio also has CW filters and
has been modified to allow MARS operation. Great first radio and fantastic
for use in the RV. First $450 takes it. Call Rick @ (602) 438-8325

If the pictures shown in this document are not visible you can go to
any of the following online forums to see the tech with photographs
but most will not include the information outlined about current
prices or web sites examples to show current prices because although
this document is not intended to promote any specific vendor, most
entheogen forums prohibit mentioning vendors to prevent spam
advertisements. I have written this for you, not for existing vendors
who as a group would surely like to prevent this information from
being posted because it could bite into their piece of the Salvia pie:

An UNAUTHORIZED report and tell all of the secrets of making huge
amounts of money selling Salvia divinorum products online.

What is Salvia divinorum?

Salvia divinorum is used as a sacred medicine by indigenous shamanic
healers living in the mountainous Sierra Madre Oriental in the
northeastern corner of the Mexican State of Oaxaca. In Spanish, these
specialized healers are referred to as curanderos; in Mazatec these
people are called cho-ta-ci-ne ("one who knows"). Salvia divinorum is
primarily used in situations where the curanderos feels it is
necessary to travel into the supernatural world in order to discover
the true cause of the patient's trouble. It is used in a ceremonial
manner to induce a visionary trance state, within which it is possible

determine the underlying cause of disease and to learn what steps should be taken to remedy such disease.

"The purpose of these sacraments is to purify, and to open the road. When it opens, it's as clear as the blue sky, and the stars at night are as bright as suns." ﷺ Aurelia Aurora Catarino (Mazatec shaman)

- - - -

kilograms of Salvia leaf.

Make no mistake that this write is meant as any kind of advertisement or intended to be a draw customers to any of the web sites mentioned in this article because with rare exception none of the vendors making money from Salvia divinorum want this information to be circulated to the general public who could potentially become competitors or worse yet allow individuals to make their own enhanced leaf which would cause them to loose business. Regardless of this information being made available to anyone who wants it most people won't go to the trouble of making their own standardized leaf and will buy it so I don't think this tech will impact them that way. Techniques used to extract and refine salvinorin had prior to been kept in strict secrecy among a very few individuals who were selling tickets to Salvia-space because they wanted to make sure the number of competitors with the capability of making high quality standardized leaf would be kept to a minimum. Many had tried to get this kind of information from them and were denied, I was one of those people and due to the amount of work it took for me to find easy methods of isolating salvinorin on my own I am now making this available to the public as I wish it had been made available to me. The stated reasons of the old boys on the block against making salvinorin isolation techniques publically available were usually words to the effect that if competition was kept low the price for enhanced leaf would be kept so high it would keep enhanced leaf out of the hands of adolescents which they believed would lead to trouble faster than anything else, which I don't disagree is a real potential problem but secretly and more importantly for most (in their minds) they knew keeping this information restricted kept their pockets lined with gold. At the same time these online vendors were reporting to others they were not make much from their Salvia sales they were really making many thousands of dollars a week selling nothing but enhanced leaf and due to the increasing demand are still making more money than ever regardless of increased competition. Within the industry salvinorin is referred to as green gold, but the truth is the value of salvinorin exceeds gold by many times to be far more valuable than any precious metal. Just three years ago salvinorin was so expensive that it was selling for hundreds of times the price of gold per ounce, up to $200,000.00 dollars an ounce in high purity form. Today, the price for salvinorin has dropped to close to $20,000.00 dollars an ounce from some of the more competitive vendors but probably won't drop much further and may even rise due to the ever increasing demand. It is important to understand that no one is selling pure salvinorin for direct use as a drug because this psychoactive is far too potent to be used that way and should only be used if greatly diluted on leaf to limit the amount of salvinorin ingested to a milligram or less for most people. Some individuals are insanely sensitive to salvinorin while others are almost completely insensitive, but the average dose of salvinorin when smoking enhanced leaf is often a milligram or less at a time for most individuals and never more than 2 milligrams for most of the white knuckle salvianaughts who want to push themselves to the furthest limits.

To see the current prices for a gram of enhanced Salvia divinorum leaf

do a google search under the term "Salvia divinorum" to find links to various vendors to see the prices for a single gram of salvinorin enhanced leaf. The amount of salvinorin contained in enhanced leaf varies depending upon the "X" factor of the product but due to the extreme potency of salvinorin is always a small fraction of the total weight. Average potency Salvia divinorum leaf contains 2.5 mg of salvinorin per gram of leaf. If making 6X standardized leaf you are adding 12.5 mg of salvinorin back to raw leaf so that the total amount of salvinorin contained in a single gram is 15 milligrams. 6X enhanced Salvia divinorum leaf contains less than 1.5% salvinorin by weight and is currently selling between 15 to 20 dollars a gram which cost less than a dollar for the leaf needed to make it. When ordering Salvia divinorum leaf in bulk quantities direct from Mexico the salvinorin needed to make 6X enhanced leaf costs a nickle or less a milligram, but when used to enhance leaf can be sold for more than a dollar a milligram. Of course, the solvent needed to extract and refine salvinorin from leaf to make standardized enhanced leaf is also a factor but should not be more than 1/2 the cost of the leaf. 20X enhanced leaf is currently selling for as much as 50 dollars a gram which only requires extracting 25 grams of average potency raw leaf which costs as little as three dollars when purchased in bulk quantities for a net profit of over 45 dollars above and beyond your cost for leaf and solvent.

If you want to check the price of Salvia divinorum products from three fearce competitors go to www.shamanic-extracts.com - www.iamshaman.com or www.ethnogarden.com as good references for three of the the lowest priced suppliers of Salvia divinorum products today, although one vendor known as the Salvia Buyers Club has been selling enhanced Salvia leaf for far less than those three. Although SBC is not currently offering "standardized" leaf their product is very good and requires very little work to produce compared to standardized leaf which is why they can sell it so cheap. The process that SBC uses is very simple, i.e. they extract raw dried leaf by simply stirring 100 grams of leaf into solvent, letting it soak for a period of days and then later evaporating the extraction solvent onto a smaller amount of fresh dried leaf to greatly increase the amount of salvinorin contained in each gram which produces a highly effective product, just as effective as standardized leaf, but due to the extra amount of chlorophyll which is also concentrated into the product when making non-standardized leaf most people cannot hack smoking anything stronger than 6 to 8X or the leaf becomes too full of Chlorophyll waxes to make an easy smoking leaf. However, even 5X non-standardized enhanced leaf is very effective for most people and in my opinion is the strongest anyone new to Salvia divinorum should attempt using, even then only when under the supervision of a responsible and sober adult. The difference between standardized and non-standardized leaf is mainly one thing, with standardized leaf the salvinorin is extracted from leaf into high purity and then weighed so that the amount of the psychoactive concentrated back onto leaf is accurately known where non-standardized leaf is just an approximation which may be somewhat weaker or even much stronger than a given X factor of standardized leaf if extra potent leaf was used. Salvinorin content in

leaf has been reported to vary from 2 to 4 mg or more per gram of leaf and because of this non-standardized leaf can end up being stronger than standardized and usually is because most people making non-standardized leaf add more extract back to the leaf than required to assure full potency. Non-standardized leaf is a good thing, but there are benefits to standardizing method to make enhanced leaf because when using nearly pure salvinorin to enhance your leaf you can add as much of it back to the leaf as you want, all the way up to 40X and beyond if desired without adding large amounts of other impurities from the leaf which would make it impossible to smoke at that level of concentration if you weren't using refined salvinorin. However, when making enhanced leaf which is that strong the extremely small amount of leaf required to dose with would require as little as 10 milligrams of leaf to get a full milligram of salvinorin which is far too small an amount of material because individuals could easily get too large a dose when trying to load their screened pipe with an estimated dose of something that small yet increadibly strong, far too easy to load 100% or more weight and not even realize it. Regardless, for the love of money some people will sell anything without any thought of the possible consquences to their customers who could easily get too much. I don't believe anything stronger than 20X should be made for sale to the public unless packaged into carefully measured individual doses and only then if the proper warnings are given regarding dosages and possible effects, something that the individuals selling leaf as non human consumables or drugs to dodge law suits if something goes wrong cannot do without admitting the true intentions of their products use.

The vendors I have mentioned in this document was done completely without their knowledge, only doing so as a good example of current prices for quality Salvia divinorum products, although many vendors are able to sell the same exact quality products for twice the price or more. At the time of this writing at least one of the vendors mentioned in this document has disclaimers against the human consumption of any of their products which are only sold as incense etc. as a way to limit liabilities, but people are completely disregarding those disclaimers which provides a very sweet position for many vendors who use that statement to make it possible to both sell the most potent natural psychedelic in the world while at the same time limiting their own liabilities, slick! Although, there are no regulations regarding the sale or use of Salvia divinorum or salvinorin products for human consumption to adults in the USA as long as they are not sold as substitutes to illicit drugs there is no law against it from the FDA through the DEA, salvinorin is not scheduled or regulated in any way by the federal government. However, due to the intoxicating effects of salvinorin some localities have city laws enacted to restrict the sale of Salvia divinorum to minors, but federal law does not exists to prohibit the sale of Salvia divinorum or salvinorin products in the United States..

A few of the vendors selling Salvia divinorum products online are spreading the rumor that Salvia divinorum will soon be scheduled in the United States in an effort to create a fear that it won't be available soon to both get people to order more product and to

discourage competition, but if you read the following article by IamShaman.com you will see that they don't believe scheduling of Salvia divinorum is likely any time soon: http://www.entheogen.com/articles/2004/salvialegal.html - The good people at IamShaman.com are a great example of how much Salvia divinorum can do for someone who wants to start their own online business, I taught him how to refine salvinorin just three years ago using a similar process which wasn't nearly as fine tuned as what I have documented in this tech. today and regardless of the competition created by releasing this information to the public he was still able to spring board that company off of his sales of standardized Salvia divinorum leaf into one of the largest entheogen vending sites on the net, all operating out of his own house which I have been told employs at least three individuals to keep up with packing the orders making what I assume must be in the hundreds of thousands of dollars a year today from the number of orders I see being generated on his web site, but don't look to them to confirm this because the amount of money being made off of Salvia divinorum is a closely held secret by most of the vendors to disuade further competition, but to give you an idea of the amount being sold many tons of dried leaf are shipped into the US from Mexico every year which when processed to make 5 to 10X enhanced leaf there must be hundreds of thousands of grams of extra strength enhanced leaf being produced every year which adds up to a huge amount of money from very little investment for a relatively small amount of vendors for the amount of dried Salvia divinorum leaf being shipped into the USA.

Enough on the background! To the information which could make you a very well off individual in just a few months of sales if you build a first rate web site and know how to advertise your product by placing adds on google and amazon.com and other search engines so that people can link to your product. You can currently sell raw unprocessed Salvia divinorum leaf on ebay as long as it is only listed as incense and is not specified to be a specific potency as enhanced or "X" factor leaf which is intended for human consumption. Ebay is a great web site to sell raw dried leaf as leader to your regular web site where the potent products are sold at much higher prices. I would join in selling enhanced leaf and tincture myself if I didn't have personal issues with selling this product to individuals under the age of 21 and already busy with my own enterprises which are already earning me a good income:

Home Made Salvia Divinorum Standardized Leaf and Tincture Tech. ver. 4.8 September 01, 2004

Although written as an instructional document the following is offered for informational purposes only. This extraction and refinement FAQ was written by a non-professional, I'm not an organic chemist and don't work in a field related to botany or chemistry. The solvents mentioned in this document are very flammable and can be easily ignited by red hot surfaces, open flame, electric or static spark! Avoid risking sparks from metallic utensils, desktop or computer fans, and don't try to evaporate solvents in closed areas. This document

does not contain information related to the safe handling of solvents or their proper use for the manufacture of human consumable products. The use of either crude or refined salvinorin should never be attempted, it is far too potent to eye ball a sub-milligram dose of salvinorin which can only be accurately done if using a analytical balance with an accuracy within a tenth of a milligram or better costing many hundreds of dollars or more. See http://www.sagewisdom.org/caution.html for cautions against the use of crude to pure salvinorin which has very real dangers created from becoming heavily intoxicated when attempting to dose with salvinorin itself.

The following extraction information comes from many hundreds of hours of extractions to find better ways to extract salvinorin without the need of an organic laboratory or expensive glassware. Much of what I have found was through trial and error extractions until I found techniques leading to a method which works very well. I am happy to offer this information to anyone who wants it for their own personal use or business as many have, the only thing I ask in return is that you keep Salvia divinorum away from adolescents, use it in a safe responsible manner and please don't equate Salvia Divinorum with illicit plants or drugs. Although Salvia divinorum is known as the most potent "natural" psychedelic it is far less potent and shorter acting than synthesized man made hallucinogens. For most individuals the psychedelic effects of smoking moderate to relatively large amounts of Salvia divinorum or enhanced leaf are very fleeting lasting only a very few minutes and when used as a tincture can be difficult to induce at all. Although I have never heard of anyone being harmed by any kind of toxicological effect from the use of Salvia divinorum, I do not casually recommend its use to anyone as this requires your own research to know if it is right for you. Personally, although I have been intensely interested in Salvia divinorum I have not used this entheogen but twice in a period of close to two years and even then in very moderate amounts because even though the visions it can induce are often awesome and extremely interesting, I now find that I have no desire to do so on a regular basis and take my time between journeys to fully integrate each experience. Many individuals who try Salvia divinorum find it to be far too much to handle and won't do so twice (especially if having used too much the first time), but a few find this plant to be their ally and are fascinated to the point where they use Salvia divinorum many times in a period of a few months, but almost all taper off to weeks and then months between uses as I have, now waiting close to a year between journeys.

Salvia divinorum is not something you can use to get "high" with and doesn't produce that kind of effect and should only be used for introspective meditation or for spiritual pursuits to widen the doors of your inner perception, never as a joy ride for the psychedelic effects or shared with anyone who might profane this sacred shamanic plant as some kind of substitute for illicit street drugs. Although this plant is not currently regulated or controlled by the US federal government my firm belief is that it should be restricted from individuals under the age of 21 in the same way that tobacco and

Alcohol are restricted to minors because when Salvia divinorum is taken in large amounts it can be a very strong intoxicant, a sacred intoxicant yes, but intoxicating in much the same way that Alcohol can cause reduction of fine motor skills and should never be used in a public place or prior to operating machinery or driving unless three or more hours have passed since use. Salvia divinorum should only be used while under the supervision of a responsible, experienced and sober adult, especially if you are new to Salvia divinorum and inexperienced in the possible effects. Don't assume an amount suitable for you is the right amount for someone else. Some individuals are extremely sensitive to Salvia divinorum while others will have no effect from it at all and require the use of enhanced leaf to obtain marginal effect. Never offer Salvia divinorum to individuals who have not been completely informed of the the possible effects. Never attempt to smoke Salvia divinorum products enhanced with large amounts of salvinorin or even tincture unless you have slowly worked your way up to that level and know your own sensitivity and what to expect. This document does not contain information regarding possible effects and must be researched from other sources to make an informed choice through knowing the potential risks of being light to strongly intoxicated by this plant and whether Salvia divinorum is right for you.

Extracting Dried Salvia Divinorum Leaf in Whole, Crushed or Powdered Form:

When I first started extracting Salvia divinorum leaf with Acetone I found that it didn't seem to make any difference whether the leaf was whole, crushed or even finely powdered, regardless I found that salvinorin was extracted from leaf from whole to finely powdered with the same efficiency. Since Acetone worked so well with whole or crushed leaf my assumption was that most, if not all of the salvinorin was coating the outside of the leaf instead of inside the leaf, either that, or Acetone was somehow able to efficiently draw the salvinorin out of the interior leaf membranes. Daniel Siebert recently published a paper confirming my belief that salvinorin is concentrated on the outside of the leaf, because of this it isn't necessary to powder the leaf to be able to efficiently extract salvinorin using any solvent which salvinorin can be dissolved into, but I like to either finely crush the leaf or powder it to reduce the volume of solvent needed to completely cover the leaf with an extra amount of fluid volume to make it easy to stir the leaf in it.

The following is as simple as it gets to make a gram of 5X enhanced leaf.

1. Pour Acetone into a container of 6 grams of leaf and stir for ten minutes

2. Pour Acetone off of leaf onto one gram of unextracted leaf and evaporate all Acetone while leaf is present in it.

Wha-la! Enhanced leaf.

Note: Due to extraction inefficiencies of only washing the leaf through one time an extra amount of leaf is required to make up for losses when using this super simple method. Do not extract from a larger ratio of leaf to enhanced leaf or you will end up with a very gummy leaf which produces too much smoke for most people.

The following was written for 100 to 250 gram extraction of dried Salvia divinorum leaf to make high quality Standardized leaf:

WARNING: DO NOT ATTEMPT TO USE CRUDE OR REFINED SALVINORIN AS A DRUG. IT IS FAR TOO POTENT, ESPECIALLY WHEN IN CRYSTAL FORM. 5X Enhanced leaf is less than 1.5% Salvinorin by weight.

This process will work with any amount of leaf if you scale the amount of solvent used to refine the extract to smaller amounts. For example; if extracting from 25 grams of leaf and you want to purify your extract to white colored salvinorin, use no more than 1/4 to 1/8 the amount of 99% IPA when removing Chlorophyll impurities. The following process can be used to extract and refine salvinorin into a purity that is in the high 90 percentiles. It isn't necessary to go to these extremes to remove tannin impurity to make enhanced leaf but for the purists it's a delight to do it right which results in a very high purity extract which previous to this tek required the use of laboratory glass and column chromatography to approach this purity and efficiency:

1. Extract finely crushed leaf using room temperature Acetone completely covering the leaf with fluid in a ratio of at least 1/2 crushed leaf to 1/2 Acetone three separate times for at least three minutes each time (longer if desired, but not necessary). If using 99% Isopropanol/IPA or 98% Ethanol Alcohol extract finely crushed leaf at least five times over for no less than five minutes each time with a ratio of 1/3 fine crushed leaf to 2/3 Isopropanol or Ethanol. Whether extracting with Acetone, Isopropanol or high proof Ethanol or shake thoroughly stir the leaf into the solvent the entire time

Note: This will work with whole unbroken leaf just as well, crushing or powdering reduces the amount of solvent needed to cover the leaf. When extracting whole or broken leaf use only as much solvent as is necessary to completely cover the leaf. These figures are approximates, a somewhat smaller ratio of solvent to leaf or shortening the amount of time extracting the leaf by a minute each time shouldn't significantly impact the extraction efficiency whether using Acetone or Alcohol, but longer extraction periods will assure maximum extraction efficiency. If using 99% Isopropanol or high proof Ethanol warming them to 100-120 degrees F will make these two Alcohols more efficient for extracting salvinorin compared to when at room temperature but produce far more vapors with added danger due to any kind of static or electric spark etc. which can ignite vapors. Salvinorin has been reported to remain nearly as solvent to pure Ethanol when chilled as when at room temperature, but when heated will increase solubility enough to be well worth it.

2. After completing the outlined number of extractions to the same batch of leaf thoroughly wash the wet leaf through twice more with fresh Acetone (or what ever extraction solvent your using) to further remove residuals. This is done to dilute out all of the old solvent remaining in the wetted leaf which could still contain some of the salvinorin. At this point your done with the leaf might want to place all of your previously extracted leaf into a jar with solvent for a long term extraction to get what ever amount of salvinorin that might have remained behind in the leaf which should be very little if any, especially if having used Acetone. Re-extract the leaf as long as you like, but keep it in the dark to prevent any loss of salvinorin from long term exposure to UV light which can destroy a portion of the salvinorin while in solvents.

3. Combine the solvent from all extractions and last washes, remove all leaf and fine leaf particles, filter tannin sediments from solvent or let the solvent stand undisturbed for 12 to 24 hours to allow enough time for most of these sediments to settle out of the fluid. While waiting for the ultra-fine tannin particles to settle cover your container and store in a cool dark place to both reduce evaporation and to prevent possible losses due to interaction of light. Once you have waited at least twelve hours for the tannin to settle out of the fluid slowly pour the extraction solvent off of the fine brown tannin sediments which have settled to the bottom of the container, being careful to handle the container very slowly without jarring or sloshing the fluid to prevent the fine particles from being stirred up into the fluid. I don't recommend trying to pour out the last ounce or two of solvent because a portion of the tannin will usually flow out with the last of the fluid. Although, when leaving a small portion of the fluid behind a dilute portion of the salvinorin is still in it you can recover it by adding a few more ounces of fresh solvent to the fluid and vigorously swirling the tannin into the solvent for a couple of minutes to make sure to get any that might be left in it too, then waiting another 12-24 hours to settle again before pouring the fluid off again. Of course, you will have to leave the last bit of fluid behind the second time too.

Note: I have tried using paper coffee filters to remove tannin from the extraction solvent, but even after pouring the extraction solvent through paper filters stacked three ply several times a fair amount of the tannin particles were still able to get through the papers. A filter made of cotton balls in a glass tube might work better than paper filters, but I haven't tried it to know. Because the amount of solvent used will completely dissolve and hold far more than the amount of salvinorin extracted there is no fear of salvinorin falling out of the fluid, only the tannin impurity will fall to the bottom of the container, but these tannins should be saved for further processing later by swirling the sediments into fresh solvent and let to settle out once more be be sure that none of the salvinorin was left behind in them.

4. After the extraction fluid is poured off of and separated from the

brown tannin sediments, completely evaporate the extraction solvent. This is best done using a large flat pan so that the fluid volume will spread out much further than when using a bowl because the shallower the pan the larger the surface area of the fluid, speeding the rate of evaporation requiring far less time than if using a deep bowl. You can increase the evaporation rate even further by using a fan to blow air across the solvent with enough force to cause ripples on the surface of the fluid, but not so much airflow that droplets start taking to the air carrying away any amount of your precious extract. If you live in a buggy part of the world covering the evaporation container with a fine mesh screen which will both allow air to flow through and keep bugs out might be necessary. A full gallon of 99% Isopropanol can be evaporated in under eight hours with this method and a gallon of Acetone in four hours or less. Due to rapid evaporation of Acetone, condensation from the air can cause an ounce or more of water to remain in the container which won't evaporate quickly. Also, if you have extracted leaf using 99% IPA or 98% Ethanol in addition to water from condensation you will have a percent or more of water remaining after the solvent spirits are completely gone. This water is usually a yellow color due to tannins dissolved into it which is something you don't want in your extract, so once you have evaporated all of the solvent off and are left with only water pour it off, being careful that none of the green particles of extract go out with it. Leave the extract in the evaporation container and completely dry by placing in an oven set to 150 degrees F. (as long as not hint of solvent remains, otherwise the vapors could cause a fire).

Note: Although a large flat glass cassarole cooking pan works very well to evaporate the extract into, I like to use a non-stick Teflon(R) coated cooking pan over any other kind because once all of the solvent is has been evaporated off and your left with a waxy extract in the bottom of the container it's easier to scrape it all into a pile using a thin piece of plastic (not metal which will gouge the Teflon coating). Also, when the fluid level is being reduced by evaporation thin films of relatively high purity salvinorin are always deposited on the sides of the container which are more easily removed when using Teflon(r) coated evaporation containers. Test non-stick pans with clean Acetone before pouring you extraction solvent into the container to make sure that the solvent won't affect the coating, depending upon the manufacturer the non-stick coating of some pans might not be up to the job and rather than risk contaminating your extract it is best to test. Acetone should not be used in jars using tops with rubber seals unless manufactured for such use as Acetone will melt many rubbers and plastics. Using either Isopropanol or Ethanol Alcohol shouldn't be a problem for any kind of non-stick pan and most food container seals.

4.5 This step is optional and can be skipped, or used to replace step six. If you want to go to extremes incorporate both this step and step six together to assure a maximum purity extract. At this point you could remove more of the tannin from the extract if all hint of solvent has been evaporated off but the extract is still water wet from either condensation of water due to rapid evaporation of solvent,

or wet from the 1% of water contained in 99% Isopropanol if that solvent was used to extract the leaf. This extra step will only work if the extract is still wet right after all of the solvent has been evaporated from the extract but is still moist and has not dried yet. Scrape up all of your water wetted extract and place it into a cup of room temperature water and stir for a few minutes, breaking the particles up by hand as best you can into small particles by working all of the clumps out of the extract solids using your fingers. Depending upon how much water is used it can take on a light yellow to dark brown color. Once your done working the extract into the water let it set still undisturbed for an hour or for however long it takes for the particles to all settle to the bottom of the container and then pour the water off, add more water and stir the extract into it again. Keep doing this until the water no longer takes on any color and then completely dry the extract in an oven set to 150 degrees F. until no hint of mosture remains.

Note: This step will not work once the extract has dried into a waxy consistency because water will not cut through the wax once dry and cannot be reconstituted with water to produce the same consistency which will allow the water to get to the tannin after drying. The extract that has dried on the sides of the evaporation container that is either a fine crust of high purity salvinorin, or waxy deposits cannot be washed with water and should be scraped off and saved for step 5., if necessary using Naphtha to remove these residuals from the sides of the container. It is important to remove all of the extract from the evaporation container so that it is completely clean as these films can contain a substantial portion of your yield. Save all of the water used to remove tannin and check it in a few hours to see if more salvinorin has settled out of the fluid.

5. Once every hint of solvent has been evaporated out and the extract is completely dry of moisture pour in four or more ounces of pure Naphtha directly into the evaporation container (or if having already scraped it out of a large evaporation container transfer all of the extract into a smaller container so that you can work with it better). Completely dissolve all clumps of extract or wax into the Naphtha so that only fine granules remain in the fluid. Next, pour all of the Naphtha and every bit of the extract into a pint sized or smaller glass jar, setting it aside undisturbed for an hour or more. What your waiting for is for the ultra-fine salvinorin particles that are stirred up in the Naphtha to settle to the bottom of the glass which can take as much a hour or more for most of them to fall out of the fluid, this works with Naphtha because salvinorin is insoluble to this solvent. After waiting for the salvinorin particles to settle then slowly, taking great care not to let any of the particles flow out with the fluid pour off the dark green Naphtha leaving the crude salvinorin extract in the bottom of the glass. Next add more clean Naphtha to the jar and mix the extract into the fluid for five minutes and set aside for another hour or more before pouring off the Naphtha again. Continue using Naphtha to remove Chlorophyll waxes from the extract until the fluid becomes a light translucent green color, at this point it has become ineffective for removing additional

Chlorophyll. When done completely pour off every last drop of Naphtha and completely dry the extract so that no hint of Naphtha remains.

Note: Since salvinorin is insoluble to Naphtha you don't need to worry about using too much, use as much as you like but take care to wait long enough for the ultra fine crystalline salvinorin particles to fall to the bottom of the container before pouring the fluid off. Using several ounces of Naphtha at a time might require waiting several hours for the majority of the salvinorin particles to settle to the bottom of the container, but when using a small one ounce glass most of them should settle in the first hour or so.

6. Although you won't see it the extract, it still contains an amount of tannin. Once you have removed all of the waxy Chlorophyll compounds that you can with Naphtha and the extract is dry, completely crush all of your extract into as fine a powder as you can in a bowl with a spoon and then pour in a few ounces or more of room temperature water, stirring the extract into the water for a few minutes and then set aside for an hour or for however long it takes for the particles to all settle to the bottom of the container. After the particles of crude salvinorin have settled pour all of the water off being careful not to pour any of the extract solids out with it and then add more water and stir again. As long as the water continues to take on a slightly yellow or brown color continue washing with more water. If using a cup or more of water at a time to dissolve small amounts of tannin contained in the extract you might not see any change of water color, but it will be doing the job. Once you are satisfied that the water is no longer taking on any more color, completely dry the powder in an oven set to 120-150 degrees F.

[Note: Water washes of the extract will not remove tannin until you have removed as much of the Chlorophyll as you can using Naphtha first, and have then evaporated all hint of the Naphtha out of the extract otherwise the water will not cut through a barrier of waxy Chlorophyll or Naphtha wetted extract enough to be able to dissolve the tannin. If you have done a good job removing tannin from the extraction solvent and then removed as much Chlorophyll as you can using Naphtha followed up by water washes of the extract to remove most of the remaining tannin, the amount of dried extract from a 250 gram extraction of average potency leaf should weigh close to one gram and be well over 50% pure. Save all of the water used to remove tannin and check it in a few hours to see if more salvinorin has settled out of the fluid.

6.5 Making Tincture.

Skip this step if your not making tincture.

Dried extract which has had this amount of Chorophyll and tannin removed by pure Naphtha (without any contaminate to leave any kind of residual and evaporated completely out first) is perfect for making tincture, just dissolve as much of the extract as you can into 151 to 191 or higher proof Ethanol drinking Alcohol of any kind while at room

temperature and you will have an effective tincture, the higher the proof, the more effective. Removing more of the Chlorophyll than Naphtha can remove by continuing to wash the solids with 99% Isopropanol, at some point, will make the extract too pure for making an effective tincture if using 151 proof drinking Alcohol. When making a low Chlorophyll content tincture this should only be done when using extremely high proof Ethanol such as 98%, but even then an amount of the dark compounds from the leaf seem to help sublingual absorption of salvinorin. (which will be removed if continuing to clean the extract to a white purity as shown in step 7, below). When dissolving the extract in Ethanol to make tincture, decide on the amount of tincture which can be made out of the amount of salvinorin contained in the amount of leaf extracted from and dissolve all of your extract into that amount of Ethanol. If having extracted from 100 grams of dried leaf you should be able to make at least 5 to 6 ounces of 151-191 proof Ethanol tincture from that amount of extract. If you have extracted from enough leaf to make six ounces of tincture dissolve all of the extract into six ounces of Ethanol all at once instead of making each one separately, otherwise if using too much extract to make a single ounce of Ethanol the excess salvinorin which won't fully dissolve into the Alcohol will end up in the bottom of the tincture bottle as a solid, making a dose of tincture far too potent if a large portion of the solids are accidentally sucked up into a dosing dropper. Although, there is one positive way to look at it if you find Salvinorin solids in the bottom of your Alcohol, you can be assured that the Alcohol contains as much salvinorin as can be dissolved into it. This would be a good way to make sure the tincture is strong enough by using only half as much Ethanol as you believe is needed to completely dissolve all of the salvinorin extracted from your leaf, and then continuing to add more of the drinking Alcohol a little at a time until all of the extract completely dissolves into the fluid.

Note: If using 191 proof Ethanol this Alcohol probably won't hold much more than 1.2 mg of salvinorin per ml of fluid when at room temperature, 98% Ethanol should hold close to 1.3 mg per ml of fluid. A moderate amount of Chlorophyll compounds from the leaf dissolved into Ethanol have been reported to allow tincture to hold more salvinorin per ml, approaching 1.5 mg or more per ml if using very high proof Ethanol. I have found when making my own tincture using 151 proof Ethanol and dissolving near pure salvinorin into this relatively low proof Alcohol that the tincture was not at all effective without also having Chlorophyll compounds from the leaf present in the tincture too. If you have removed every bit of Chlorophyll that can be removed from your extract using pure Naphtha you don't need to be concerned, there will still be enough in the extract to make tincture out of any 151 proof drinking Alcohol of your choice. Whether tincture made from 151 proof drinking Alcohol needs some of the Chlrophyll compounds in it to make an effective tincture because without it, salvinorin can't be efficiently dissolved into 151 proof Alcohol which is nearly 25% water, or whether the Chlorophyll compounds actually help increase sublingual absorption of salvinorin is unknown to me at the time of this writing. Perhaps it does both.

7. To further purify your extract begin washing the solids with very small amounts of 99% Isopropanol in a ratio of no more than 1/3 dried extract to 2/3 Isopropanol in a small 20-30 milliliter vial or shot glass until the extract is a light colored salvinorin. This is done by pouring in IPA and mixing the extract into it for a couple of minutes until the fluid becomes a dark color and then setting the small glass aside to wait for the fine crystalline salvinorin particles to settle to the bottom of the glass which can take an hour or more the first time. During the first wash of the extract with 99% IPA the fluid will likely become so darkly colored that once the majority of the salvinorin particles have settled it can be difficult to tell where the fluid and solids separate in the glass, because of this remove no more than half of the volume of fluid off the top before adding more Isopropanol. This can be done by either using an eye dropper to remove half of the volume of fluid from the top (don't dip too deep), or by carefully pouring half of the fluid out of the glass while closely watching under a strong light to make sure none of the solids start to flow out with the fluid, although when pouring the fluid off you probably won't be able to get the last third or more of the fluid out without also pouring some of the solids off to, so using an eye dropper is my preferred method to reduce losses. To continue washing your extract to a lighter color higher purity extract re-fill the glass with fresh Isopropanol and stir it in again for a minute or two and then set the glass aside for two hours to give enough time for all of the salvinorin particles to settle to the bottom of the glass. As the salvinorin becomes cleaner with each wash of the solids, the micron sized crystalline particles of salvinorin will take longer and longer to settle out of the fluid, taking as long as three hours or more to completely settle after each wash when using a single ounce sized glass, longer for larger capacity containers due to the increased amount of fluid. Don't pour the fluid off of the cleaned salvinorin in the bottom of the glass if the fluid has a cloudy look (assuming you don't have lots of tannin contaminate in it) because this means that you still have lots of fine salvinorin particles floating or suspended in the fluid and you should wait for however long it takes for them to settle before removing the fluid or you will be loosing too high a percentage of your yield. You can continue washing the extract until it is a light green color or all the way to white if you like, however this will increase your losses, up to 25% going as high as 50% if you don't wait long enough for all of the fine particles to settle which sometimes takes hours. Cleaning the solids to a white color isn't necessary because once it's a light green tint the extract is a high enough purity to consider it over 90% salvinorin for use to enhance leaf, just use 10-15% more extract when lightly colored to make up for being less than completely pure. Be sure to save all of your Isopropanol from the first wash plus as it can contain a quarter or more of your salvinorin, depending upon how much was used, how far you cleaned the extract and whether you waited for all of the salvinorin A particles to settle before pouring off. If having extracted from 100-250 grams of leaf, use no more than 25 ml of 99% Isopropanol per wash, if extracting from one ounce of leaf no more than 8-10 ml per wash. Although salvinorin is weakly soluble to 99% Isopropanol take great care to use as little as possible or you will

loose too much salvinorin with each wash to the point of removing most of your yield if too much is used.

Note: Small amounts of Isopropanol can hold far more chlorophyll impurities than salvinorin on a milliliter basis and due to this when the extract is washed through several times with a few milliliters of this solvent at a time more and more of the green is removed while the bulk of the salvinorin will remain behind. However, in an inverse of the technique of waiting for the tannin sediments to fall out of the Isopropanol or Acetone used to extract leaf which on a ml basis will hold far more salvinorin than the amount which was dissolved into it, this time you will be waiting for the salvinorin to fall out of the Isopropanol because the limited amount of solvent used it cannot hold all of the salvinorin being washed. Half of the salvinorin particles will be relatively large and will fall out of the fluid in just 20 minutes and smaller particulates will continue to fall out of the fluid for three hours or more. To prevent large losses of your yield to the Isopropanol washes of the extract you must wait for all of the extra fine salvinorin particulates to fall out of the solvent, waiting for the fluid to become completely clear. The Isopropanol can be dark to lightly colored from white through shades of yellow all the way to dark almost black looking green, but never cloudy before you remove the fluid or you can loose a significant portion of your yield. However, you don't have to wait as long for the salvinorin particles to fall out of the fluid as you did for the tannin sediments because salvinorin is a relatively heavy compared to the tannin particulates and will fall out much faster.

If you have extracted from less than 10 grams of dried leaf I don't recommend removing Chlorophyll compounds from the extract using Isopropanol if having extracted from that small an amount of leaf, it can be done if you use small enough vials only using a couple of milliliters of 99% IPA per wash, but smaller amounts of leaf require a higher amount of skill obtained through practice. Only use 99% Isopropanol to purify extract, 70% will not work, 94% might not work either. 98% Ethanol can be used but salvinorin is almost twice as soluble to high proof Ethanol and will remove close to twice as much Salvinorin per ml of fluid. When refining salvinorin with 99% Isopropanol or high proof Ethanol all the way the extract will not be pure white, it will be a off white. Salvinorin can be refined to a bright white powder using limited amounts of Acetone, but this cannot be easily accomplished when working with small amouts of salvinorin. However, Acetone can be reasonable to use if refining the extract from from several kilos of leaf as a follow up process after first having removed as much of the chlorophyll as can be accomplished using 99% IPA. The reason to use 99% IPA first is because you will have far less losses of salvinorin in a solvent which salvinorin is weakly soluble to compared to the almighty king of solvents for salvinorin which is Acetone. If you have several grams of IPA cleaned salvinorin which is an off white color Acetone can be used to further purify the extract to produce an absolutely brilliantly white salvinorin powder, but at a fairly high cost of total yield due to the amount of salvinorin this solvent can hold per ml of fluid so use this solvent extremely

sparingly. Of course, these losses are not real losses because you can save all of your salvinorin containing solvents used to purify your extract because they can be re-worked again to get most of the salvinorin out of them using smaller quanties of solvent via the same purification process.

8. Once your extract has been cleaned to the color desired and completely dry and free of any other solvent, you can check to make sure it does not contain any tannin impurity by dissolving all of your extract into 100 ml of warm Acetone and waiting 12 or more hours to see if tannin particles fall to the bottom of the glass. You don't need to worry about trying to dissolve too much salvinorin in 100 ml of Acetone from a 250 gram extraction of leaf because that amount of Acetone should easily hold close to four times the amount of Salvinorin in the dissolved state which would be contained from that amount of average potency leaf, being able to hold approximately 2300 milligrams of salvinorin when at room temperature. If the fluid appears at all cloudy after dissolving salvinorin into it this means that either you didn't dissolve the salvinorin into the fluid thoroughly enough, or there is lots of fine tannin present. Unless tannin is present and stirred up into the Acetone it should be clear, it can be colored from a light yellow to a dark green tint if you didn't remove all of the Chlorophyll, but never cloudy before you pour the fluid off or something is wrong. If after a few hours the Acetone is still cloudy continue to wait, the tannin will fall out of the fluid eventually, taking as long as 24 hours in one case when I did it. When your ready to pour the Acetone out for evaporation to net your tannin free salvinorin don't try to get the last few milliliters of fluid out of the glass because some of the tannin will come along with them, better to add more Acetone and shake it up to dissolve what ever remaining Salvinorin there might be in the remaining fluid or mixed into the tannin sediments than to try to pour out every last drop of fluid. Of course, you will have to wait for the tannin to settle out again.

Here is a standardization procedure so that you can add salvinorin back to leaf. This came from a well known Salvia divinorum researcher explaining how to make 6X enhanced leaf:

The method is simple: Dissolve a measured quantity of salvinorin A in a solvent, and then absorb it onto a measured quantity of crumbled salvia leaves. Evaporate off the solvent, and Wha-la! Here is a more detailed explanation: To make salvinorin A enhanced leaf that contains 15 mg salvinorin A per gram of leaf, dissolve 12.5 mg* pure salvinorin A in 1 ml of warm acetone, and then add 1 gram of crumbled salvia leaves and stir. The leaves will absorb the salvinorin A-containing acetone. Place the container in a well-ventilated location and wait for the acetone to evaporate off. Stir the leaves occasionally during the evaporation period. Make sure that the acetone has evaporated completely--there should be absolutely no smell of acetone left on the leaves.

* The amount of salvinorin A to use will vary depending on the

salvinorin A content of the leaves that it is being absorbed onto. If the leaves are of average potency, containing 2.5 mg salvinorin A per gram, then you would deposit 12.5 mg salvinorin A onto them to bring the concentration to 15 mg per gram (as in the above example). Of course, one can standardize the leaves to other concentrations as well. The more precisely you know the salvinorin A content of the leaves, the more accurately you can standardize them. I use very pure salvinorin A for this procedure. If you are using material that is impure, you will need to take into consideration the percentage of impurities when calculating the amount of material to use. Obviously, the same technique can be used to deposit salvinorin A onto other types of leaf.

I strongly advise against smoking leaf that contains more than 15 mg salvinorin A per gram unless the individual doses can be accurately weighed. At this concentration, the amount of smoke produced provides a certain amount of safety because it makes it difficult for a person to accidentally inhale too large a dose in a single inhalation. If you have a precision balance that can accurately weigh small doses, then stronger concentrations are preferable since the amount of smoke can be minimized without compromising safety.

Note: Acetone is the best solvent to use for enhancing leaf because so little fluid is required to completely dissolve relatively large amounts of Salvinorin, and evaporates fairly rapidly compared to Alcohol.

Is there a way to make a less harsh smoking enhanced Salvia divinorum leaf?

Yes, although this might actually make the leaf too easy to smoke. I have found that Salvia divinorum leaf is much easier to smoke when most of the Chlorophyll and tannin has been removed from it. Here is how I make my own high quality standardized Salvia divinorum leaf:

The first thing I do is hand select each leaf for quality, setting aside the stiff dark to almost black colored leaf in favor of the lighter colored soft green leaves. Once I have my pile of leaf to be made into incense I carefully hand de-vein the stem running through the center of each leaf being careful to keep the leaf in as few pieces as possible. When I have a full bowl of de-stemmed and de-veined broken leaf I then extract the leaf with a room temperature solvent such as Acetone or 99% Isopropanol several times to remove as much of the Chlorophyll from the leaf as I can. Of course, I save the extract to be processed later, but because of the extra work required selecting the best leaf and de-veining them this process isn't meant to obtain Salvinorin, but rather to condition the leaf to ready it for salvinorin enhancement.

After your done extracting your leaf to remove as much Chlorophyll as you can with solvent, evaporate all of the solvent out of it so that it is completely dry without a hint of solvent smell in the leaf and then boil all of the leaf together in a pot of hot water for a half

hour or more, once the water turns brown pour it off and add more water to boil the leaf again. Keep doing this over and over until the water will no longer take on a brown color. When done pour all of the water off of the leaf and spread it out on a cookie sheet and dry in an oven set to between 125 and 150 degrees F. for however long it takes to completely dry, usually several hours in a convection oven. After the leaf is completely dry you can use it to make your own standardized enhanced leaf at what ever X factor you desire. When Salvia divinorum leaf is conditioned this way by removing most of the Chlorophyll and tannin first the leaf will then readily absorb salvinorin dissolved into Acetone when making standardized leaf.

If you have finely crushed leaf instead of large pieces you can process the leaf just the same, but I like to keep the leaf in as large and few pieces as possible because when drying in an oven they will shrink quite a bit. Also, I believe that large pieces of enhanced leaf are better than smaller pieces because it provides far more options for how it can be burned. The only thing is, when you have such nice big pieces of enhanced leaf you won't want to package it in small plastic bags which can easily allow the leaf to be crushed or broken further. For this kind of special standardized leaf I like to package the leaf in a small round tin so that it can't get smashed or broken into smaller pieces. These little tins can be purchased in large lots fairly cheaply from a company called SpecialtyBottle.com

Extraction notes, insights to the process:

Extraction solvents and fluid volume

The solubility of pure salvinorin to 27 degree C. Acetone is approximately 23 mg per ml of fluid, for 98% Ethanol 1.28 mg per ml and for 99% IPA .74 mg per ml of fluid. For Acetone extractions I like to use enough solvent so that its volume is at least the same as the volume of the powdered or crushed leaf being extracted and when using 98% Ethanol or 99% IPA at least two thirds or more times of solvent volume to the amount of crushed or powdered leaf which is in reality is more than required on a solubility basis, but due to these solvents being less effective at dissolving the salvinorin out of the leaf than Acetone I prefer to use more as an added measure just to make sure. Also, increasing the amount of fluid allows the leaf to be easily and thoroughly mixed within the solvent when stirring. The amount of time the leaf is soaked in either solvent can be extended for as long as you wish, this will only help increase the extraction efficiency, however I have found that when extracting Salvia divinorum leaf five times over for five minutes each time with 99% Isopropanol that it won't get all of the salvinorin out, usually leaving 10 to 20% of the salvinorin behind which requires an additional long term soaking of the leaf to get the last of it out. When using Acetone to extract leaf I have found that it will remove the salvinorin so efficiently that when re-extracting the leaf a fourth time over to check and see if any was left behind I have not been able to get enough additional salvinorin to be able to tell. If using Isopropanol I do not recommend using anything less than 99% for this quick extraction method as IPA

with large amounts of water in it will dramatically increase the amount of time required to efficiently extract the salvinorin. 91% to 94% IPA found on some store shelves might work for short extractions, but I haven't tried it to know.

Tannin Removal

This extraction process has three separate steps incorporated into it to remove tannin impurities, the first step will get most of it, the second step another portion and the last step every bit of it if you are careful. Waiting 24 hours for the tannin to fall out is better than 12 hours but be sure to keep the extraction solvent in the dark the whole time while waiting because if it is left out in bright sunshine you can loose some of your yield due to the interaction of ultra-violet light which can destroy salvinorin while in solvent. Almost everyone has the same problem with tannin the first few times they try this extraction technique, ending up with far more of it in their extract than they believed possible thinking that all of it must have certainly settled out of the fluid when waiting as many as 24 hours for it to come out of the fluid, but it's still in there to some extent, especially if having used a solvent with any amount of water in it. To deal with this common problem I have worked an additional step into the process to wash out tannin that remains in the extract after cleaning with Naphtha (drying first) using water and then one more tannin removal step at the end of the process by dissolving the cleaned extract into Acetone and waiting 12-24 hours to see if more drops out of the fluid because at that point regardless of your best efforts you will likely still have some of it in the extract. Be careful not to touch your face or other sensitive areas of skin when working with Salvia divinorum wetted by solvent or when having residues from the extract on your hands. Something in the leaf can cause an allergic reaction which I believe is caused by the tannin in the leaf which is a acidic astringent causing sensitive areas of skin to become reddened along with an amount of swelling and later flaking of skin which can last several days. I have never had a problem with the skin on my hands or arms but my face always has this reaction if I scratch my nose or rub my eyes when slight amounts of extraction residues or are present on my fingers this happens every time.

Using Solvents to Remove Chlorophyll

The reason I use Naphtha to remove Chlorophyll from extract first, before switching to Isopropanol, is because Salvinorin isn't soluble to Naphtha but the Chlorophyll is. Unfortunately, after a few washes of the extract with Naphtha it becomes ineffective for removing the last of the Chlorophyll requiring the use of another solvent such as 99% Isopropanol to get the last of it. Although 99% Isopropanol does an excellent job of removing the remaining Chlorophyll, this solvent removes at least three quarters of a milligram of the salvinorin per ml of fluid when at 20 degrees C., more when IPA is warmer, less when cooler. Also, the solubility of salvinorin has been reported by an experimenter to be much higher in 99% IPA when large amounts of Chlorophyll compounds from the leaf are present which can result in a

significant portion of your yield being removed with each wash of your extract if you use too much, so use it very sparingly. You can recover a large portion of the salvinorin lost to the Isopropanol washes by completely evaporating the solvent and removing the Chlorophyll waxes using the same process over again with Naphtha and IPA in much smaller amounts. Save all of your Naphtha used for the washes because although salvinorin is insoluble to Naphtha there are usually extremely small particles of salvinorin in the fluid which take much longer than an hour fall out of the fluid and can be found in the bottom of the container after a few hours netting another 10% of salvinorin. Save all of the IPA used to wash your extract because it can be evaporated onto leaf to make 5X enhanced leaf or after evaporation reconstituted into drinking Alcohol to make tincture, depending on how much salvinorin was removed through the washes. Be sure to scrape every bit of film from the sides of your evaporation container because high purity salvinorin films stick to the surfaces of evaporation containers whether stainless steel, ceramic or glass. This is one way to know you have salvinorin, because it sticks to these surfaces so well. To see photographs of a room temperature 99% IPA extraction of Salvia divinorum leaf and Chlorophyll being removed from extract using Naphtha and 99% Isopropanol, go to:
http://www.erowid.org/plants/salvia/salvia_extraction4.shtml

Reduced Chlorophyll Extractions Using Chilled Acetone

Although I don't believe it's necessary to go to the extent to use chilled Acetone to reduce the amount of Chlorophyll extracted from leaf when most of the dark compounds can be later removed from the extract using washes of pure Naphtha, Acetone chilled to between zero and +20 degrees F. is an effective method of initially obtaining a cleaner extract which is somewhat easier to refine into white salvinorin. A chilled Acetone extraction is done using exactly the same steps as shown above for room temperature solvents, except to reduce the amount of Chlorophyll extracted the amount of time the leaf is in the cold Acetone should be limited to between three to four minutes at the most for each of the three extractions, extracting the same leaf three times over to maintain a fairly high extraction efficiency. When working in a room temperature environment pre-chilling both the leaf and the extraction container with the Acetone together to a temperature no higher than 20 degrees F. will help keep the temperature below 40 degrees F. throughout the extraction. You want to start out cold and keep the solvent cold throughout the extraction, but when working in a warm room the temperature of the fluid can increase by 20 degrees F. to be as high 40 degrees F. while finishing up the last of the three extractions. This amount of temperature increase is ok, but no warmer than that and only during the last couple of minutes the leaf is in the solvent or you will begin to pull over additional Chlorophyll in a hurry. When working in a warm room and extracting with Acetone chilled to close zero degrees F. this should keep the temperature of the leaf in the solvent at or below +20 degrees F. the whole time which results in a cleaner extract, so if you can chill it that far down it's a good way to reduce the amount of Chlorophyll extracted even further without

impacting your extraction efficiency because of the high solubility of salvinorin in Acetone, even when chilled to zero degrees F. cold Acetone is still far more effective for dissolving salvinorin from the leaf than high proof room temperature Ethanol Alcohol, so don't worry about chilling the Acetone that far down, your extraction efficiency will still remain very high when using zero degree F. Acetone. If you are considering the idea of using chilled Isopropanol to extract leaf it won't work, I tried 99% IPA and found that it required four times the amount of time in solvent for one quarter the extraction efficiency of Acetone! However, salvinorin has been reported to remain solvent in pure Ethanol Alcohol (grain Alcohol) when chilled to low temperatures and might be worth trying, but I have not done so to confirm this myself. Regardless, chilled Ethanol will not be as effective as chilled Acetone which has a much higher solubility to salvinorin than room temperature Ethanol.

Extremely brief extractions of Salvia divinorum leaf of one minute or less with Acetone chilled to between zero and +20 degrees F., with exception of an amount of tannin extracted, will yield an almost wax free extract of high purity salvinorin. When extracting Salvia leaf for just one minute you won't get all of the salvinorin out but you should get close to a third or more of it. The amount of reduced solubility of salvinorin to chilled Acetone is completely made up for when doing multiple extractions to the same leaf, even when the Acetone is chilled to as far down as zero degrees F. At one time I had reported that chilled Acetone extractions were far less efficient than room temperature Acetone because when using 99% IPA to remove Chlorophyll from the extract I did not wait long enough for the salvinorin particles to all settle out of the fluid and wasn't due to the Acetone being chilled, so if you see any of my old reports that chilled Acetone extractions are less efficient than room temperature you can disregard that report. If your worried that you are leaving salvinorin A behind when using chilled Acetone extract the leaf a fourth time over, but keep that portion of the solvent separate from the rest as it will have more Chlorophyll in it than the previous three extractions. I have done forth extractions to leaf previously extracted three times over for three minutes using both chilled and room temperature Acetone to be sure I didn't leave any salvinorin behind, and after removing tannin and Chlorophyll contaminates found so little salvinorin that I couldn't isolate it through washes with Naphtha and IPA because when finished there was nothing left to be seen in the bottom of the vial. I have also taken the leaf from room temperature and chilled Acetone extractions (after it dried) and powdered the leaf in a small high RPM coffee grinder to a flour-like consistency and when re-extracting it with Acetone was unable to get any amount of salvinorin that I could see out of it.

The photograph below shows a chilled Acetone extraction that started at +5 degrees F. which warmed up to +15 degrees F. by the time it was completed which is fairly typical when working in a warm room, even if you have pre-chilled both your leaf and extraction containers together with the Acetone at the same time. Shown in the photograph is the first wash of the extract with Naphtha, two washes with water and then

four washes with 99% IPA to further remove impurities yielding white salvinorin. The weight of salvinorin shown in the photograph of the scale is NOT representative of the extraction efficiency because when I did this extraction I did not wait long enough for the super fine salvinorin particles to fall to the bottom of the glass and unknowingly removed lots of salvinorin when using the IPA to remove Chlorophyll waxes. I later recovered the salvinorin from the last two washes by completely evaporating the IPA and cleaning it once more using Naphtha and more IPA which netted another 200 mg of salvinorin making a total of 525 mg of cleaned salvinorin from the 250 gram extraction, which is very good for average potency leaf. This doesn't include the salvinorin lost from the first two 99% IPA washes. When removing Chlorophyll waxes with 99% IPA the cleaner the salvinorin gets the longer it takes to settle to the bottom, taking an hour or longer to all settle to the bottom of the glass. If you have removed most of the dark green from your salvinorin and are left with a cloudy yellow fluid this means that you still have lots of super fine salvinorin particles floating in the IPA (as seen in the photograph below, the IPA was still cloudy) and must wait until the fluid is completely clear before pouring off the IPA. The fluid can be colored, but not so cloudy that you can't see through it as solvents which are fully saturated with salvinorin are never that cloudy and should be clear unless salvinorin particles are still floating in it (unless fine tannin particles are still present). Even if you have waited long enough for all cloudiness to settle out of IPA used to remove Chlorophyll impurities from your extract be sure to save this solvent because something in the dark Chlorophyll compounds from the leaf appears to increase the solubility of salvinorin to Isopropanol to be able to hold well over 1 mg per ml of salvinorin per ml of fluid, reported to some times be as high as 5 mg per ml by a chemist who had the use of an HPLC to test the solubility of salvinorin in a few different solvents. Whether the ability of IPA to hold that much salvinorin per milliliter was due to an actual increase of a solubility to IPA or whether it was caused by fine particles of salvinorin that were still floating in the solvent is something to consider.

The following image shows a chilled Acetone extraction which yielded a total of 525 milligrams of cleaned salvinorin from 250 grams of finely crushed leaf. The photograph showing 324 mg of cleaned salvinorin did not include the salvinorin recovered from the IPA used to remove chlorophyll. The extraction efficiency was close to 100% but the yield of cleaned salvinorin was close to 85% after recovering the salvinorin lost to only the last two of the four washes of the extract with 99% Isopropanol. The losses of salvinorin to IPA washes was far greater with the cleaning of the extract from this extraction than it should have been because I did not wait long enough for all of the ultra-fine salvinorin particles to settle out of the fluid prior to pouring the IPA off of the amount of salvinorin which had settled to the bottom in the first hour. I should have waited up to three hours for the fluid to completely clear so that all of the ultra-fine particles had time to settle to the bottom of the glass before removing the IPA. I have left the pictures in showing what Isopropanol clouded with salvinorin

particles looks like to show you what not to do. In each of the photographs of IPA with salvinorin in the bottom of the glass you can see these particles making the fluid very cloudy, but once they settle you can see through the colored fluid (except the first wash with IPA which is too dark due to chlorophyll). I did not try to recover the salvinorin from the first two 25 ml washes of IPA due to the amount of chlorophyll, but could have done so making the total amount of cleaned salvinorin approach 600 mg. Not bad, considering 250 grams of average potency leaf contains about 2.5 mg per gram of leaf for a total of 625 mg of salvinorin.

http://www.digitalgoo.com/public/forums/1/uploads/post-12-1093686172.jpg

Note: The manufactures web site for the small scale in the photograph is http://www.gramprecision.com and they no longer appear to make that model and have since replaced it with a model named the Diagem II CT 50 with a suggested list price of $229.00 USD. It's accuracy is plus or minus two milligrams which is accurate enough for weighing salvinorin to make several grams of enhanced leaf at a time, especially if over measured by 2-4 mg.

Go to this link to see my collection of extraction photographs on yahoo: http://photos.yahoo.com/bc/salvinorin2003/

Here is a link to a vendor who sells Salvia Divinorum in bulk for super low prices of only pennies a gram if you buy a large enough quantity: http://www.aztecasplants.com - There are other good vendors who sell Salvia divinorum leaf but I have bought from this man and he always came through with good product for me. The others I have not bought from and cannot vouch for, but they might be just as reliable. The reason I buy from Carlos of aztecasplants is because the leaf he ships is organically grown in the high mountains of Oaxaca is harvested by the Mazatec peoples who benefit from the sale too. Carlos does not speak english very well and has an amount of difficulty communicating via email, but he is an honest man and will come thorough for anyone who buys from him. He does not know that I have recommended him in this article, but I hope his orders increase from it as this helps many poor families live a better life.

You are bidding on a NEW 10 through 40 meter Windom antenna.

This Windom is THE BEST all around ham radio antenna available.

It covers 10, 11, 12, 15, 17, 20 and 40 meters.

It is made of strong number 10 gauge, 19 strand copper wire.

You can feed it with regular 50 ohm coax (RG-58 or RG-8X or RG-8A/U),
450 ohm twin lead or a single wire.

It's overall length is 67 feet.

The antenna is completely assembled and ready to go. All you do is attach your feed line, put it up and start transmitting (NO CUTTING, NO TUNING, NO ADJUSTING).

It is designed to be at least 15 feet off the ground...but the higher the better.

This Windom is light weight (about 2 3/4 pounds) so it is easy to put up and keep up.

This Windom is made of very high quality, very strong, 19 strand copper wire. This wire makes a fantastic antenna because of the amount of surface area (skin effect) available for transmitting and receiving signals. The more surface area you have the more gain and the more broad banded your antenna will be.

You can install it in a dipole type configuration, an inverted "V" type configuration or in a sloper configuration.

This antenna will out preform a dipole, G5RV, sloper, vertical, and most other single element antennas.

The price is $19.95

NOTE: I SHIP WORLDWIDE.

For payment you can send Cash (US dollars or EUROS) or a US Post Office or WalMart money order. Credit card buyers can use PayPal.com European buyers can use EU Bank Transfers.

Packing & shipping is $7.85 packing & shipping in the lower 48 states. Alaska, Hawaii and International destinations are more.

Many nice clear pics.
All items are real inexpensive.
No Junk here folks, all exactly as described.
This is my entire list on Ebay.
You may want to check others while you're there :-)

Through the magic of my PC soundcard and some downloaded freeware, I
set up my very own INTERNET RADIO TALK SHOW, where I discuss the day's
top news stories from a completely independent and refreshing
viewpoint.

My shows run about 20 minutes each (to conserve bandwidth). Please
visit my website. The URL is below. As a pioneer in one of world's
last wilderness areas (namely, the Internet)I need all the support and
listenership I can get.

The Max Murray Radio Talk Show is produced on a barest of shoestrings.
I'm using the free webhosting of geocities, a bunch of freeware, and
my PC microphone-soundcard. That's it! Broadcasts originate directly
from the familiar comforts of my den studio at home. I hope you find
the shows fresh, fun, and entertaining.

You'll need a Windows Media Player to listen. If you have very common
Windows Media Player installed on your PC, and chances are that you do
if you have ever listened to anything on the Internet, then all you
have to do is click on my link "on the air" and you will be listening
to the wit and wisdom of The Max Murray Radio Talk Show! Its about
news talk.

My show is broadcast at www.geocities.com/maxtalkradio

Please visit the show and shoot off an email telling me what you
think. I welcome your feedback.

Thanks, Max Murray
Talk Show Pioneer on the Frontier of Tomorrow.

I would like to offer my Yaesu ft-2500 mobile for sale, $110.00.

Includes keypad mic, power cord, mobile bracket. This is in good

condition, never had any problems. Note that one panel lamp is

dim and the flip down door over the adjustment knobs is gone.

50 watts output. Keypad mic. $15.00 to ship in continental US.

I will wait a week or 2 and then put it on Ebay if it does not sell

here. Last one there sold for $135 a few days ago.

Reply to: jppcnospam@cox.net but take out the "nospam."

- 44 pieces of TIL311 @ $6.00 each (US Funds)

  The lot price for all 44 pieces is US$215 or about $4.89 each

  The TI TIL-311 is a Hexadecimal Dot Matrix Display with integral
  TTL driver electronics to accept, store & display 4-bit binary data,
  Epoxy package (Note: This part wholesales at about $16.50 each)

- 4 pieces of DIS1417 @ $7.00 each (US Funds)

  The TI DIS-1417 is a House Number version of the TIL311 with extended
  temperature range we are told. Otherwise the specs. are the same.

For a copy of the TIL311 Datasheet see:
http://www-s.ti.com/sc/ds/til311.pdf

For pictures of this lot visit:
http://www.geocities.com/jr_part/til311.htm
or http://www.geocities.com/pc_diagnostics/til311.htm

No shipping is included in the above prices. I would
require your full ZIP code or postal code to quote a
total including shipping. Please specify the country for
international orders outside of North America. The shipping
you will be quoted is the cost of the postage stamp (plus
insurance if requested). Displays are new and are the
latest revision.

I would like to offer my Yaesu ft-2500 mobile for sale, $110.00.

Includes keypad mic, power cord, mobile bracket. This is in good

condition, never had any problems. Note that the flip down door

over the adjustment knobs is gone. 50 watts output. Keypad mic.

$15.00 to ship in continental US. I will wait a few more days and

then put it on Ebay if it does not sell here. Last one there sold for

$135 a few days ago.

Frankly, I believe that it takes a lot of balls to post an ad for a
Korean made product and include a waving American Flag and a cartoon
character that proclaims "Go America" in that same ad.

Do you totally lack common sense, or just so shameless in your pursuit
of a sale that you don't care?

Harry C.

What Ham Radio would YOU buy that has been made in America ?
Do you drive a Honda or a Benz? Do you watch a Panasonic or Sony TV?
Jezzzzzz

Frankly, I believe that it takes a lot of balls to post an ad for a
Korean made product and include a waving American Flag and a cartoon
character that proclaims "Go America" in that same ad.

Do you totally lack common sense, or just so shameless in your pursuit
of a sale that you don't care?

                                                    Harry C.

We need your radio gear! List it for sale or advertise your eBay auctions
for free. No catch, no strings. We have had nearly 2,000 hits since first
opening our new web site last month. Visitors to our web site say they want
to buy radios! See our ad in the September issue of QST magazine or please
visit http://www.onlinehamfest.com for details.

No, I drive a Ford Bronco and my ham rigs includes a Barker &
Williamson 5100 transmitter and a Hallicrafters SX-71 receiver.
Everything else is home constructed, including 2-M and 420-Mhz rigs.
(I am now in the market for a mint condition Collins 75A4!)

I simply objected to you waving the American flag in your desperate
attempt to sell a inexpensive, foreign made, non-repairable and
throw-away consumer item.

Harry C.

I agree with you in general, but I suspect a significant percentage of
real hams reject this and remain loyal to quality American made radio
products that, although costly, at least can be repaired and
maintained. This is why used products like the Collins 75A4 and even
Heathkit products continue to command high prices. When they break,
you can fix them.

It's not entirely a patriotic thing with me. I simply wouldn't want to
own any ham equipment that I can't maintain and repair myself under
emergency conditions. In fact, this is something that was traditional
in amateur radio until very recently.

                                                    Harry C.

For sale:

Icom 207H dual band mobile.

Price:

$200, $15.00 ship airborne ground, Continental US Only.

If interested please email me at jppc at mindspring dot com.

Included:

Radio,
Mic,
Power cord,
Reprint of manual.

Modified as follows:

118-135 RX (stock)
136-174 TX & RX
320-399 RX
400-479 TX & RX
849-950 RX
(Perforance out of ham bands not tested or guaranteed.)

Factory specs below:

This information is taken directly off of the Icom IC-207H brochure.

General
a.. Frequency coverage (Unit: MHz)
a.. VHF: Tx: 144-148 Rx: 118-174 *1
b.. UHF: Rx/Tx: 440-450
c.. *1 Guaranteed 144-148
b.. Mode: FM, AM* (* U.S.A. version, RX only; 118-136 MHz; not guaranteed.)

c.. Number of memory channels: 182 (150 reg., 2 call, 10 scan edges and 20 scratch pads)
d.. Antenna connector :SOI-239 (50 ohms)
e.. Power Supply requirement : 13.8 V DC +/-15%
f.. Useable temperature range : -10°C to +60°C; +14°F to +140°F
g.. Frequency stability: +/-10 ppm
h.. Tuning step increments: 5, 10, 12.5, 15, 20, 25, 30 and 50 kHz
i.. Current drain (at 13.8 V DC)
a.. Receive squelched 0.8 A
b.. max. audio output 1.0 A
c.. Transmit at high power VHF 12A UHF 11A
j.. Dimensions (projections not included):
a.. 140(W) x 40(H) x 185.4(D) mm
b.. 5 1/2(W) x 1 9/16(H) x 7 5/16(D) in
k.. Weight: Approx. 1.17 kg; 2.6lb.

Transmitter
a.. Output power:
a.. VHF 50 W, 20 W, 10 W, 5 W selectable
b.. UHF 35 W, 20 W, 10 W, 5 W selectable
b.. Modulation system : variable reactance frequency modulation
c.. Max. frequency deviation : +-5.0 kHz
d.. Spurious emissions : Less than -60 dB
e.. Microphone connector : 8-pin modular jack (600 ohms)

Receiver
a.. Receive system: Double conversion superheterodyne
b.. Intermediate frequencies: 1st 46.05 MHz, 2nd 450 kHz
c.. Sensitivity: Less than 0.18 micro V for 12dB SINAD
d.. Squelch Sensitivity: 0.13 micro V (at threshold)
e.. Selectivity :
a.. More than 12kHz/ -6 dB
b.. Less than 30 kHz/ -60dB
f.. Spurious rejection ratio: More than 60 dB
g.. Audio output (at 13.8 V DC): More than 2.0 W at 10% distortion with an 8-ohm load
h.. Ext. speaker connector: 2-conductor 3.5(d) mm (1/8")/ 8 ohms

Supplied accessories:
a.. Hand microphone
b.. Mobile mounting bracket kit
c.. DC power cable
d.. Spare fuse

Options
SEPARATION ACCESSORIES
a.. OPC-600/601 SEPARATION CABLE For operation with the front panel detached. OPC-600: 3.5m (11.5ft); OPC-601: 7.0m (23.0 ft)
b.. MB-58 REMOTE CONTROLLER BRACKET Mounts the remote controller in

a convenient location for operation with the front panel detached.
        c.. MB-65 REMOTE CONTROLLER BRACKET Mounts the remote controller with the MB-58. Adjustable angle and direction for optimum positioning.
        d.. OPC-346/OPC-347 DC POWER CABLE Has a 20 A capacity and a length of 3/7 m (9.8/23ft).
        e.. OPC-440/647 MIC EXTENSION CABLE
        f.. OPC-440: 5.0m (16.4ft); OPC-647: 2.5m (8.2ft)
        g.. OPC-441 SPEAKER EXTENSION CABLE 5.0m (16.4ft)
      WIRELESS REMOTE ACCESSORIES

        a.. HM-90 WIRELESS MICROPHONE Infrared, full remote control microphone. Wired remote control is also possible.
        b.. EX-1759 INFRARED RECEIVER Used to receive control signals from the HM-90
        c.. BC-96 MICROPHONE HOLDER Holds the HM-90 in a convenient place and supplies power to the charging circuit of the HM-90.
        d.. CP-13/L CIGARETTE LIGHTER CABLE WITH NOISE FILTER
        e.. OPC-288/L CD POWER CABLE Supply power to the BC-96 for charging the Ni-Cd batteries inside the HM-90.
        f.. EX-1513 INFRARED SUB RECEIVER Used with the EX-1759 to extend the controllable area.
      OTHER ACCESSORIES

        a.. CS-207 CLONING SOFTWARE + OPC-646 CLONING CABLE For quick and easy programming of memories, etc.
        b.. HAND MICROPHONES HM-77(w/DTMF memory)HM-78, HM-79(w/tone call)HM-95(w/DTMF)HM-96, HM-97(w/tone call) andHM-98 (remote control)
        c.. HS-62FLEXIBLE MOBILE MICROPHONE + HS-15SB SWITCHBOX +OPC-589ADAPTER CABLE For all-around mobile operation.
        d.. MB-17A MOBILE MOUNTING BRACKET
        e.. SP-10/SP-12 EXTERNAL SPEAKERS

Many nice clear pics.
All items are real inexpensive.
This is my entire list on Ebay.
You may want to check others while you're there :-)
Please add HTTP in front of the address below as AOL/Ebay frowns on HOT links
:-(

Nice condition hard to find Heathkit SB-310 late production shortwave
receiver.

With SSB, CW and AM (rare 5kHz) filters installed.

Ready to ship 27 pounds via FedEx Ground Home

Auction closes Sunday.

Take a look - lots of pictures!

It does not do automatic scanning. It will tune all sorts of freqs but
you gotta manually tune to it. The audio is great too.
How about 285 with no antenna.

I am looking for a Yaesu FT-2400 for sale. I had one for 2 years and sold
it, now I'm looking for another one and can't find one.

Email garfieldfreak@earthlink.net

Thanks
KD4ZGW

PLEASE
DONATIONS NEEDED
Hello:

I am asking for any help that I may please receive. I am requesting DONATIONS in ANY CONDITION of electronic items. (Broken, working, needs repair, good for parts).

I am requesting these donations in the following categories.

Audio, Video, Communications, Laser, Robotics, Satellite, Computer, Test Equipment etc. DESPERATELYNEED VIDEO CAMERA'S

In ANY condition, Broken, Damaged, Working, Non Working, Repairable, Good For parts.

Being disabled is not fun as standing up on feet is a real pain however be unable to work is a real pain. I love electronics; I hope when and if medical get better to be employable again. However the only way to keep active is the ability to keep going and keep coherent, is to keep tinkering, trying to design or redesign and test out new ideas. I also like to try to keep up on trends and keep ability to do things. Electronics is more than a hobby it is a life style.

I like to share knowledge with others, I love to tutor beginners and learn new things. If any help that I can please get, I would be greatly appreciative. If I can be of help let me know.

Being unemployed with no transportation to call my own gives me time on my hands and nothing is more miserable than to feel unproductive and trapped at home at the mercy of who ever you can get out of the house with. If I had a job than I could earn myself a vehicle with a heart set on a passenger van.

I would love to work in the broadcast or electronics industry even if

it means just pushing buttons, anything to work in a field that I
dearly love.

Thanks in advance.

Doug

I'm looking for Pioneer model PR7820 laser disc players. These units
are 25 years old and either have a "DISCOVISION" lable or a "MODEL 3"
lable.
The players don't need to be in working condition and I would prefer
unmolested units. These players were used in GM dealerships for
training and showing off the new line of GM cars. The PR7820 was also
used in Dragon's Lair arcade games.
If you have any of these units laying around please e-mail me at this
address
pr7820@yahoo.com
Please let me know if you can help.

Anybody out there know any info on this brand?
Question, I got my hands on a Yshon AT-308/C handi.
The "C" version operates from 450-470MHz.
There must be a way to change this to 430-450MHz.
Other versions of this radio work in this range, and many others.
Any clues out there on how to do this??
Maybe a simple keypad trick while turning the power on?
Maybe solder pads on one of the circuit boards?

Any help would be great!!

Ranger AR 3500 For Sale. Asking $125 OBO. Unit powers up and
everything appears to work fine, but I don't know much about these
radios and do not have a means to fully test all the functions.

Please email for photos and more information.

Ken

My Astron RS-20M I use to power my 2-meter, 50 watt transceiver stopped working overnight and I am looking for a schematic or tips on how to repair it. The unit lights up, shows about 3 or 4 volts on the volt meter. We didn't have local storms in the area, so I have ruled out lightning.

If someone could e-mail me a schematic or give me advice I would appreciate it.

Thanks,

Charlie
KD4AJ

Hi, I don't have one here but I know if you call Astron they will mail you a copy, free!!
That is if you can't get one here. Sounds like the regulator went bad or maybe the pass transistors quit? I'm not a tech, just a hunch.

I have two Radio Shack UHF 70cm hand helds. These are the very small
radios without dtmf pads. They use three alk. AA batteries. They are
like new in the box and I would like to sell both. $85 for one or
$135 for both. If you are not happy with these, send them back for
refund less shipping. Doug. 208-324-0011 or isp574@hotmail.com

Wanted to buy:

  ICOM 2GAT
  ICOM 2GXAT

I am in Civil Air Patrol (and a HAM N0FZD), and these radios
work well when modded for out of band.

What I am looking for is working radios, not cosmetically perfect,
used but not abused.

Rarely, can I get to the news groups (retired HP), so please
do me a favor and send me email jer'at'frii.com

Please include asking price, including shipping, and what
comes with it "everything in the box and the box when new"
or some such.

Thank you!

Best regards,

Jer/ "Flight instruction and mountain flying are my vocation!" Eberhard

HI,

I am looking to buy a Used Wire Measurer (or wire meter or wire counter or what ever you call it) and maybe a take-up reel/spooler.

The measurer is for #10 wire.

The take-up reel needs to have a diameter of about 8 inches or less.

I don't need anything fancy, just something that works.

I live in the Denver, Colorado area so I can pick it up if you live within 50 miles or so of Denver. Or, I will pay to have it shipped.

I don't need the whole table...just the counter and take-up reel.

If you have either item available, please email me at:
rfimages@yahoo.com
 or call me at 303-674-0510

Thanks,

Bill

PLEASE
DONATIONS NEEDED
Hello:

I am asking for any help that I may please receive. I am requesting DONATIONS in ANY CONDITION of electronic items. (Broken, working,

needs repair, good for parts).

I am requesting these donations in the following categories.

Audio, Video, Communications, Laser, Robotics, Satellite, Computer, Test Equipment etc. DESPERATELYNEED VIDEO CAMERA'S

In ANY condition, Broken, Damaged, Working, Non Working, Repairable, Good For parts.

Being disabled is not fun as standing up on feet is a real pain however be unable to work is a real pain. I love electronics; I hope when and if medical get better to be employable again. However the only way to keep active is the ability to keep going and keep coherent, is to keep tinkering, trying to design or redesign and test out new ideas. I also like to try to keep up on trends and keep ability to do things. Electronics is more than a hobby it is a life style.

I like to share knowledge with others, I love to tutor beginners and learn new things. If any help that I can please get, I would be greatly appreciative. If I can be of help let me know. I am located in Concord California.

Being unemployed with no transportation to call my own gives me time on my hands and nothing is more miserable than to feel unproductive and trapped at home at the mercy of who ever you can get out of the house with. If I had a job than I could earn myself a vehicle with a heart set on a passenger van.

I would love to work in the broadcast or electronics industry even if it means just pushing buttons, anything to work in a field that I dearly love.

Thanks in advance.

Doug

Check the FUSE (its kinda funny holder- part of the power plug.
to remove the fuse, look in the top part of the power socket, there is a
notch-- use a flat blade screw-driver, in this slot, can CAREFULLY
twist- the fuse holder part pops up towards you-- if bad, remember,
these ARE NOT the same size ag 3ag (agc) fuses! these are somewhat

smaller! This uses a MDX 5 amp fuse. But my bet is: the power switch I had a bad one of those in my supply-- open the case and measure across the contacts when in the ON position, should measure a dead short with an ohmeter. If it is bad, note : this switch has 3 terminals- (power in, power out, and 1 to other side of power (to run the neon lamp indicator). If bad Astron can supply, tho, quick fix, is to identify the 2 connections- one to the power plug terminal, and one to the input of the power transformer in it. What I did was soldered this pushon connector , tacking it to the other pushon connector, to bypass the switch (or, can be wired, tightly together, and then taped with electrical tape. When new switch arrives, simply pull off these wire terminal stakons off the old switch, replace the switch, and then, replace those wires IN THE SAME LOCATIONS as removed-- should work as good as new! As Info, Jim NN7K

The "PileupBuster.com" domain name is For Sale.

For less then the price of an HF rig you can own the ultimate Ham
Radio domain name.

The PileupBuster.com domain offers immediate name recognition to
everyone associated with Ham Radio. Being an established Ham Radio
term, it is very easy for your customers to remember. Plus, the sales
and marketing potential of a name like this is unlimited.

Even if you don't plan to use it, a name like PileupBuster.com can be
a great investment.

The price is $1250.00 (U.S. dollars)

For more information or to purchase this domain, please click on the

name:

http://PileupBuster.com

The name is being sold through SEDO.com. They will handle all of the
ownership change and the escrow details.

If you have any questions, please feel free to contact me at:
erfurth@gmail.com

Good luck.

73s,

Bill

Hi all, the last FEW battery packs and inserts I have purchased
within the last year from W&W battery seem not to be cracked up to their
usual high standards. About 8 months ago I ordered a battery insert for an
Alinco DJ-580T. W&W says that they use Sanyo or Panasonic cells. If
other brands
are used they will say so. Anyway, when I received the insert they were
green
batteries with no brand name on them. They didn't say Sanyo or
Panasonic like they

said in the past. Also the batteries had 1100 stamped into each
battery. The W&W sticker
says 12V @ 1200. I called them at the time and was told don't worry
about the 1100, it means
nothing. I said to myself ??? !!!
I few months earlier I purchased a NI-Cad pack for my FT-50. I can't
see into it but it never took a full charge, even
after a few weeks of proper cycling.
I have a buddy who has this expensive battery analyzer where he works,
I'm told the charger is a professional
charger and costs around $3500 dollars, its gotta be some gizmo.
Anyway, It did not perform well. I called
 W&W and told them and they replaced the pack, which is a great thing
for them to do in the name of customer relations.
The one they sent me performed the same. About 3 months ago I needed
another pack for the FT-50 because the second
NiCad pack went bad.
I pickup up a NiMH battery this time at the local hamfest. This battery
is the same deal. Never
gets a full charge. I have used W&W fast charger, my Yeasu charger and
a MaHa charger on these
batteries. After I use them for many cycles it is the same. My buddy
put this one on his
expensive analyzer and the best it will do is 70 percent. WHAT
GIVES???? This is a 9.6V @1100MaH and
it acts like a 600ma nicad. I use these HT's to receive 98% of the time
since they are used mostly at work.
I have the same damn problem with a pack for my FT-530.
 I have been very happy with W&W over the last 15 or so years. I don't
know what is going on other than
using cheaper batteries and charging for the higher priced good batteries.
BTW, that Alinco battery insert does not hold a great charge and has a
cell going bad. My batteries usually
last for about 2 years or so. Not any of these. I have had many HT's
over the years and I'm knowable of batteries
and the different types and charging habits. If I only had one charger
I'd suspect that, but with all the chargers I own
and with my buddys charger at work, I know it's not me or my equipment,
it's the batteries.
Any comments from people finding the same results??

>I buy ALL my batteries for my Motorola equipment FROM MOTOROLA.......

I do not any more; Motorola seems to use whatever cells are available
on the market, while aftermarket suppliers often use Sanyo cells -
these batteries are cheaper, and at least the same quality as the
original ones, often better.

regards - Ralph

If you have a HAM or CB Radio product to sell, and are looking for an
easy inexpensive way to sell it... I have the ideal domain name for
you.

PileupBuster.com

The name is instantly recognizable to all HAM and CB Radio people. It
is also very meaningful and easy to remember.

Click on this link to see the traffic and get more information.

http://PileupBuster.com

If you don't like the price, email me an offer.

Or, maybe you have an HF RIG to trade. I am looking for a used Yeasu

FT-1000 or an FT-897 with or without the antenna tuner.

Regards,

Bill

Hi to the list!

Anyone got at least one NOS 125@ 450V electrolytic cap for the Drake AC-4
power supply? Would prefer to replace both of them, but if not, one will
have to do.
Please answer direct to me at:
k5vse@earthlink.net

Thanks

I strongly recommend using a modern replacement. Honestly. If you stick
a NOS cap in there, it's not going to last long. I think you're a lot
better off with one of the inexpensive Panasonics from Digi-Key.

==========
Mike -

First, bookmark the DRAKE Home Page operate by WB4HFN
Large number of articles on Drake equipment repair, tips and component
replacement
http://www.wb4hfn.com/DrakeHomePage.htm

The Internet has replaced the inefficiency of searching large paper books
and documents.
That's what GOOGLE and search engines are all about (modern day card
catalogs for the Internet library)

Drake AC-3 / AC-4 troubleshooting by Mark Gilger, WB0IQK
http://www.wb4hfn.com/DrakeArticles/TechTips/PowerSupplyTroubleshooting.htm

YOU HAVE SEVERAL OPTIONS -- FOR REPLACEMENT.

1. Use the AC-4R replacement board designed by Mike Bryce of SunLight Energy Systems (available on his web site).
    $ 15 plus shipping for the PC board is a bargain.
http://www.theheathkitshop.com/drakeac4rreplace.html

2. You can "rebuild the capacitor" - like Al Parker, W8UT did for his AC-4.
http://www.wb4hfn.com/DrakeArticles/TechTips/FilterCapacitorRebuilding.htm
This was done several years ago with R-390A restorations.
http://r-390a.us/filter_capacitors.htm
Suppliers finally woke up and took note that maybe they should be offering these for restorers (guitar amps, antique radios, boatanchors, etc.)

3. Both DigiKey and Mouser have a wide selection (snap in/screw in) of Panasonic, CDE, Mallory, Vishay/Sprague and United Chemi-Con electrolytic capacitors.
Pages 482 to 486 in Mouser catalog has a wide selection of "cans" (screw, snap in, 105 degree)
http://www.mouser.com/catalog/621/482.pdf

DigiKey - Panasonic TS series
http://store.yahoo.com/triodeel/capacitors.html

4. Antique Electronic Supply also have NOS and new mfg twist locks
http://www.tubesandmore.com/

5. CDE is now selling some of their capacitors "on-line" direct to customers. 105 degree and 500 volt options available
http://www.cornell-dubilier.com/

6. Triode Electronics (here in Chicago) run by Ned Carlson has capacitors and a wide range of parts
http://store.yahoo.com/triodeel/capacitors.html

Good luck with it, 73

Greg

Thanks to all you folks that responded. I got two of them on the way, NOS of all things.

I got the TR-4 on the air as of now, with the power supply from my twins.

I second Greg's recommendation on this:

 >1. Use the AC-4R replacement board designed by Mike Bryce of
SunLight Energy
>Systems (available on his web site).
> $ 15 plus shipping for the PC board is a bargain.
>http://www.theheathkitshop.com/drakeac4rreplace.html

I have one for one of my Heathkit HP-23 power supplies, and it is one
fine piece of work! Almost to pretty to hide in a case. I'm about to
order one for my AC4.

Ted KX4OM

Why do you people fill this group with ebay ads when there is a group
for that kind of junk?

My bad, FAs should only be posted to the .swap and .marketplace groups
which were created for ads and let discussion groups be for discussion.
However it seems that everyone who has something to sell on ebay thinks
all groups were created so they would have a place to hawk their junk in
hopes of getting an extra dollar. As can be seen, these FA were spammed
to multiple groups without regards to the type of group.

You're crying about an auction that ended 2 months ago?
Seems to me that the bay is here to stay.
Learn to use your filters.
Seems to be the only way for you not to see them.
Also, one mans junk in another mans treasure.....
It also seems that people who view these newsgroups
might be curious as to what's for sale elsewhere.
Many have gotten stuck buying on these groups with broken items.
If someone has integrity there is usually not a problem, but there is the other side of the coin where broken items were sold. The new owner has no recourse. At least on ebay there is feedback, not a perfect system but one that works.
And with paypal you CAN get a refund a good part of the time if there is a problem.
Been there and done that.

So why post FAs in groups that are for discussion? That is what the
.swap and .marketplace groups are for. Why should I have to filter out
FAs in a discussion group where FAs shouldn't be there in the first
place? If people in a discussion group are curious about what may be for
sale on ebay then they can check the .swap or .marketplace groups or go
to ebay and search, it ain't rocket surgery.
Look at the boatanchor group as an example, which was set up to DISCUSS
boatanchor type equipment, along comes the ebayers with a few FAs, then
someone else sees the FAs, posts their FAs and pretty soon the group is
more FA ads than discussion.

That's a good point. It use to piss me off when these FA started to show up on the groups.
We can still discuss stuff here but it seems it is the way of the world. It's like the price of gas, nobody likes it, but it keeps going up and we still have to buy it.

    It is called spam. Especially, when they cross-post to so many groups.
    I just look at it like this...if they can't seem to follow netiquette, then I don't want to do business with them. Unfortunately, there are so many people online that are ignorant, it will never go away. So, I just report them.

Ebay item #: 5730774971

Auction Ends: Nov-14-04 19:13:56 PST

Direct link:

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=5730774971

My Ebay Feedback rating is 100% positive.

Ebay user ID: righteous-jude

I'm selling a FM Stereo transmitter which is well-known as being the
best transmitter you can get for the money. It is fully assembled and
not a kit. You'd have to buy a commercial brand FM exciter (such as a
Harris) to exceed the specs of this unit. On virtually all FM receivers
you would not hear the difference.

You could hook up and transmit any sound source you want, such as:

1. The sound output directly from your computer (to play MP3's) using
iTunes or any software you like.

2. Directly connect an iPod, CD Player, tape deck, etc. right to the
transmitter.

3. Use a professional mixer board. A decent Behringer UB802 Mixer is only $49. Then you could mix and cross-fade between two different stereo sources LIVE. Add a decent microphone ($19) so you can talk and people won't know you aren't a commercial station until they realize "Hey, why aren't there any advertisements?"

This FM transmitter is DIGITAL (not analog) and can equal the sound of commercial FM stations. It can transmit anywhere between 88-108 MHz. It outperforms ANY of the Ramsey or other so-called "kit" transmitters, including the "export" version of the FM-100B which Ramsey sells for $429.99 - which is WAY more than the cost of the transmitter I'm selling.

Depending on the quality of the antenna you connect to it and how high up in the air it is, it is possible to get about a 1.5 mile range using a simple homemade antenna, or over 5 miles of range with a $100 pre-made roof-mounted antenna.

This transmitter has a filtered RF output which means it puts out a clean signal. RF filtering is important to avoid interfering with other FM stations, or if you intend to add an RF Power Amplifier to increase your range. Most other low cost FM transmitters have bad RF harmonic supppression which means they cause a lot of interference to TV's and radios in your neighborhood, which will attract attention to you from people like Cable TV technicians (something you definitely want to avoid).

I won't list all the details here, you can learn them all by going to http://www.Ebay.com and entering item # 5730774971 using Ebay's "Search" feature. It will be available for the next 7 days.

Here's a link for info about a good, affordable audio mixer:

http://www.musiciansfriend.com/srs7/g=rec/search/detail/base_pid/631238/

And lastly a good inexpensive microphone:

http://www.musiciansfriend.com/srs7/g=live/search/detail/base_pid/270490/

You'll also need a mic cable:

http://www.musiciansfriend.com/srs7/g=live/search/detail/base_pid/332001/

A suitable 10-foot XLR mic cable is $10.

http://www.musiciansfriend.com is a good, reliable and affordable Internet seller of music-related gear. If there is one located in your area, Guitar Center also carries this gear.

To avoid unprofessional noise while talking, don't hold your microphone, put it on a desk stand. The best deal for this item is, believe it or not, the Radio Shack model 33-370 for only $7.99.

Peace,

righteous-jude

To quote Moe (of the Three Stooges), "Where were you when I needed you??!!"

I got one of those a while back and have had a blast with it ever since.
  But I paid "new" price at HRO (well over $300).

For anyone who's not aware of what you can do with APRS, go to my home
page (http://www.bushong.org) and click on "Where's Dave" - at the
bottom/right.

I've also used the radio to remote-control my HF radio while walking
around the yard. Very cool.

Dave

hello all
i am in need of the following antennas all must be in very good
condition and you MUST BE WILLING TO SHIP

Cushcraft A50S-6
Cushcraft 13B2
M2   2M12
M2   6M5X
M2   Satellite antennas
also need a yagi for 432mhz with a boom of about 20 feet
also looking for an Icom IC706MkIIG and an Icom ICAG35 70cm mast mounted
Preamp
what do you have
thanks

Hi,

You may already be aware that a new Two Way Radio Forum has been launched at
www.euronium.de

This Free to use Forum for Radio Amateurs and other Two Way Radio Users including PMR Users has no advertisements, pop-ups or trade sponsorships and is funded entirely by Radio Amateurs at www.euronium.de for the benefit of all Two Way Radio users, sections for all brands of radio include a mods area, help area, modes area, buy and sell and other interesting forums. Please pay a visit, register and help make this new Forum a success.

Very kind regards,

Sidney G2SHA

FM Stereo Broadcast Transmitter
Digital PLL - LCD - 2 Watt RF Output

Ebay item # 5730774971

Auction ends in 1 day!

Ends Nov-14-04 19:13:56 PST

I have updated my Ebay auction listing to include an MP3 sound file you can
download which is an ACTUAL recording of how the FM transmitter sounds

on-the-air.

Here is the direct link:
[URL=http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=5730774971]http://cg
i.ebay.com/ws/eBayISAPI.dll?ViewItem&item=5730774971[/URL]

Transmitter is an assembled and tested unit -- not a kit.

This transmitter design DOES NOT use the "BA" or "Rohm" analog chip -
ANYWHERE IN IT AT ALL. Which is a good thing.

This transmitter can equal the sound of commercial FM stations. It
outperforms ANY of the Ramsey transmitters, including the "export" version
of the FM-100B which Ramsey sells for $429.99.

You can buy this transmitter for much less than that.

Here are the specifications for this transmitter (from the manufacturer):

Transmission Frequency: Adjustable between 87-108 MHz
Tuning Steps: 10 kHz
RF Power Output: Typ 1Watt @ 13V or 2 Watts @ 24V
Spurious RF Emissions: Better than -45 dB ref. to carrier
Frequency Stability: PLL Typ +/-1KHz
SWR Ruggedness: Withstands 30:1 SWR mismatch
RF Output Connector: BNC type
Audio Input Sensitivity: 0.8V rms for +/- 75 KHz deviation
Signal To Noise Ratio: 60 dBu
Frequency Response: Flat from 20 Hz to 15 KHz
Stereo Separation: >40 dB
Pre-emphasis: 75 uS (standard FCC spec for U.S. FM radio)
Audio Distortion: Better than 0.2 % THD
Audio Input Connectors: RCA Phono Jacks
Power Jack: Coaxial type, 5.5mm O.D. 2.1mm I.D. center positive
DC Power Input: 12 to 24 Vdc Regulated 600mA

The transmitter has a built-in user options menu system with two buttons for
adjusting operating parameters such as transmitting frequency, modulation
level, MPX pilot level, etc.

This transmitter has a clean RF output. The design includes a seven-element
Low Pass RF Filter for harmonic suppression.

This transmitter has built-in audio AGC (Automatic Gain Control). The AGC
feature can be adjusted using the user options menu or you can turn it off
if you like.

Operating instructions will be included with the unit.

2 Watt FM Stereo Broadcast 88-108 MHz LCD Digital PLL Transmitter

Auction ends in 1 hour!

Ebay item #: 5730774971

Ends Nov-14-04 19:13:56 PST

My Ebay Feedback rating is 100% positive.

Ebay user ID: righteous-jude

Direct link:

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&category=4675&item=5730774971

This transmitter is an assembled and tested unit -- not a kit.

This FM Stereo transmitter is well-known among Ebayer's as being the best transmitter you can get for the money. You'd have to buy a commercial brand FM exciter (such as a Harris) to exceed the specs of this unit. On virtually all FM receivers you would not hear the difference.

You could hook up and transmit any sound source you want, such as:

1. The sound output directly from your computer (to play MP3's) using iTunes or any software you like.

2. Directly connect an iPod, CD Player, tape deck, an XM Satellite Radio etc. right to the transmitter.

3. Use a professional mixer board if you want to "DJ" live. A decent Behringer UB802 Mixer is only $49. Then you could mix and cross fade between two different stereo sources LIVE. Add a decent microphone ($19) so you can talk and people won't know you aren't a commercial station until they realize "Hey, why aren't there any advertisements?"

This FM transmitter is DIGITAL (not analog) and can equal the sound of commercial FM stations. It can transmit anywhere between 88-108 MHz. It outperforms ANY of the Ramsey or other so-called "kit" transmitters, including the "export" version of the FM-100B which Ramsey sells for $429.99 - which is WAY more than the cost of the transmitter I'm selling.

Depending on the quality of the antenna you connect to it* (see "NOTE" section below) and how high up in the air it is, it is possible to get about a 1.5 mile range using a simple homemade outdoor wire antenna, or over 5 miles of range with a $70 pre-made omni directional roof-mounted antenna.

This transmitter has a filtered RF output which means it puts out a clean signal. RF filtering is important to avoid interfering with other FM stations, or if you intend to add an RF Power Amplifier* to increase your range. Most other low cost FM transmitters have bad RF harmonic suppression which means they cause a lot of interference to TV's and radios in your neighborhood, which will attract attention to you from people like Cable TV technicians (something you definitely want to avoid).

For the technical stuff:

This transmitter uses 16-bit Direct Digital Synthesis (D.D.S.) modulation of PLL carrier using 16-Bit digital oversampling, just like the Harris and other Digital-type professional FM Exciters do.

This transmitter is a new design and DOES NOT use the "BA" or "Rohm" analog chip - ANYWHERE IN IT AT ALL. Which is a good thing.

The heart of the transmitting circuit uses a DSC (Digital Signal Controller). This is a 16 bit DSP microcontroller with on-chip Flash, RAM, A/Ds, PWM, and 200k of EEPROM.

D.D.S. modulation technology is used to generate and modulate the carrier signal of higher quality FM Broadcast exciters.

I can't reveal the complete design, but the heart of it uses a Cypress Semiconductor DSC.

A Motorola-designed Class-A linear wide-band amp module (originally designed for use by cable-company operators as line transmission amplifiers) results in virtually no unwanted spurious harmonic output, high reliability and EXTREME SWR ruggedness. The RF output of this transmitter will withstand greater than a 30:1 SWR mismatch without failure. Which means if your antenna shorts-out or dies, this transmitter will not fail.

The transmitter has a LCD digital display, an on-screen menu system with two buttons for adjusting operating parameters such as transmitting frequency, modulation level, MPX pilot level, etc. It can transmit in mono or stereo and runs on 12-24 volts DC input.

Here are the specifications for this transmitter (from the manufacturer):

Transmission Frequency: Adjustable between 87-108 MHz
Tuning Steps: 10 kHz
RF Power Output*: Typ 1Watt @ 13V or 2 Watts @ 24V
Spurious RF Emissions: Better than -45 dB ref. to carrier
Frequency Stability: PLL Typ +/-1KHz
SWR Ruggedness: Withstands 30:1 SWR mismatch
RF Output Connector: BNC type
Audio Input Sensitivity: 0.8V rms for +/- 75 KHz deviation
Signal To Noise Ratio: 60 dBu
Frequency Response: Flat from 20 Hz to 15 KHz
Stereo Separation: >40 dB
Pre-emphasis: 75 uS (standard FCC spec for U.S. FM radio)
Audio Distortion: Better than 0.2 % THD
Audio Input Connectors: RCA Phono Jacks
Power Jack: Coaxial type, 5.5mm O.D. 2.1mm I.D. center positive
DC Power Input: 12 to 24 Vdc Regulated 600mA

I won't list all the details here, you can learn them all by going to http://www.Ebay.com and entering item # 5730774971 using Ebay's "Search" Feature.

This item will be available for only 1 more hour:
auction ends Nov-14-04 19:13:56 PST

"Yeah, OK all that stuff is great, but how can I tell how good this transmitter will sound before I buy it?"

The Ebay auction listing gives instructions for downloading MP3 sound files of recordings made of the FM transmitter signal received live, on-the-air. You can judge for yourself.

** Please read the section of the auction explaining how I got the best sound quality from this transmitter, and how the live off-the-air MP3 recordings were made. **

*NOTE: If you are concerned about gov't compliance regarding the unlicensed use of this transmitter within the United States (or elsewhere), an "RF Attenuator" (also known as a T-pad) may be attached to the output of this transmitter. This is a simple screw-on device which will reduce the transmitter's RF output power to a level within the guidelines mandated by the country in which you intend to operate this transmitter. Guidelines vary from country to country. In the U.S. unlicensed operation of this transmitter is permitted under the mandate of the FCC's guidelines for "Unlicensed Operation of Part 15 Transmitters", provided you do not exceed certain restrictions such as RF output level or type of antenna. Compliance

guidelines may be viewed at:

www.fcc.gov/mb/audio/lowpwr.html

ICOM IC-756 HF RADIO
For Sale a Very Clean, ICOM IC-756 (This is NOT the PRO version.) This very nice radio has all stock features. It has had an easy life in a no smoking home and used mainly on 6 Meters.
It comes with the original Microphone, Power Cable, Manual, and Box. Extras include FL-101 9MHZ CW/RTTY Filter and UT-102 Voice Synth. Also have matching PS125 Power Supply it too is in almost new condition.
It is fully functional. Just to remind all it is 100 W from 180 through 6 meters.
EMAIL me directly as to what you have for trade, lets see if we can come up with a trade. I value my station at $975.00.
We can alway schedule a SKED so you can hear the station live on the air, or if your local you can also set up a time to see the station. Pictures are availble on request!

73 Daniel W4ADT

Dear Music Lovers,

I was going to buy my own commercial FM radio station and changed my mind. It feels like only rich people can buy radio stations anymore.

So I decided to start "Radio Free Colorado".

Radio Free Colorado's achievement is:

1. We play popular music you don't hear on the radio anymore since "Corporate America" (companies like Caelr lneahnc Mmconusniot) took over control of the radio broadcast industry and companies like nosoo took over control of the music recording/distribution industry. These corporations submit "playlists" to over 90% of the commercial radio stations in the U.S.

A playlist is just that: if a song isn't on the list, it doesn't get played.

2. To play carefully selected, current multi-genre popular music (no "Bratyen" or "Ashell" type artists - ever!) -- but we think Coldplay, Modest Mouse and Norah Jones are just fine.

Radio Free Colorado plays a lot of music you probably haven't heard in such a long time and have since forgotten how much you love. It's such a

thrill when a forgotten song comes on and you say "Hey, I love this song" and all your fond memories of it come rushing back to you.

Radio Free Colorado is NOT beholden to anyone. There is no pre-approved "playlist", no one tells us what we can't play. Listeners can, however make song requests and if we have it we will play it.

Radio Free Colorado streams music LIVE over the Internet using a high-fidelity 128 kbps MP3 stream. We use professional and modified sound processing equipment to achieve a sound quality which we believe is superior to virtually all other 128 kbps streams.

Any computer with a DSL, Cable Modem (or faster) Internet connection that has a download speed capacity of at least 128 kbps can tune in.

No streams slower than 128 kbps are available.

Virtually all MP3 music players are capable of receiving live MP3 music streams over the Internet. Any music player compatible with streaming MP3 audio can receive Radio Free Colorado's broadcast.

Our MP3 broadcast stream is compatible with virtually all music software programs and works with PC's running Windows, Apple computers running OS X and other machines running Linux or Unix.

Our "Genre" (what kind of music we play) is VERY diverse. We play Modern/Classic Rock, Progressive Rock, Alternative (Modern and Retro), Pop, Billboard Classics, and Top Radio Hits from the 60's, 70's, 80's and 90's. We also play some Ambient/Instrumentals. No Rap or Hip-Hop, Classical, Jazz or Swing.

Radio Free Colorado is located at the website:

http://www.boomspeed.com/garyburke/radiofreecolorado/Radio_Free_Colorado.html

While you are listening to our stream, you will see the last 10 songs played along with complete information listing the Artist, Album Name and of course the Song Name.

To contact Radio Free Colorado during our broadcast for song suggestions, requests, questions, etc. you may:

1. Use our AIM address: radiofreeco
2. Use our e-mail: garyburke@boomspeed.com

Hi to the list,

I am in need of a mobile mounting bracket for an Icom IC-735.

Anyone out there got one they're not using?

Thanks for any responses

Mike/K5VSE

Looking for a mint or close to it (cosmetic and working condition)
Hallicrafters S-120.

Would like radio with original box, antenna, and manual if possible -

Radio MUST receive as new all bands...

Auto reply address is fake for spam bots - reply to john_stlmo at yahoo dot
com with price and details of radio -

Thanks,

John
St. Louis Mo

Hi to all,
Still looking for the mounting bracket to an Icom IC-735. Decided to go
mobile again, and can't use my Glow in the Dark equipment.
Any help greatly appreciated.

Thanks

 For sale Yaesu FT-7800R. Dual band 2M and 70 CM FM, with touch tone mike
and 1000 memories! This rig is in excellent condition, no
scratches/ding/marks. I am a non smoker and this radio has never had the
mobile bracket installed on it. Asking $210.00 plus the reasonable costs for
priority post shipping. I figure this to run about 3 1/2 pounds for shipping
weight. If interested email me and I will send you a pic of this rig.

NNTP-Posting-Date: Sat, 5 Mar 2005 18:37:09 +0000 (UTC)
Xref: g2news1.google.com rec.ham-radio.swap:4

This is a NEW 10 through 40 meter Windom antenna.

This Windom is THE BEST all around ham radio antenna available.
It covers 10, 11, 12, 15, 17, 20 and 40 meters.

It is made of strong number 10 gauge, 19 strand copper wire.
You can feed it with regular 50 ohm coax (RG-58 or RG-8X or RG-8), 300
ohm or 450 ohm twin lead, or a single wire.

It's overall length is 67 feet.
The antenna is completely assembled and ready to go. All you do is
attach your feed line, put it up and start transmitting.

(NO CUTTING, NO TUNING, NO ADJUSTING.

It is designed to be at least 15 feet off the ground...but the higher
the better. This Windom is light weight (about 3 pounds) so it is easy
to put up and keep up.

This Windom is made of very high quality, very strong, 19 strand
copper wire. This wire makes a fantastic antenna because of the amount
of surface area (skin effect) available for transmitting and receiving
signals. The more surface area you have the more gain and the more
broad banded your antenna will be.

The is the "Original" Windom design as it was modified by the Swiss
Military in the late 1940s.

You can install it in a dipole type configuration, an inverted "V"
type configuration or in a sloper configuration.
This antenna will out perform a dipole, G5RV, sloper, vertical, and
most other single element antennas.

The price is just $24.50

I SHIP THESE ALL OVER THE WORLD.

Shipping to the lower 48 States is $8.85
Shipping to Canada is $11.35 (usd)
Shipping to Europe is $19.00 (usd)
Shipping to Austrialia and New Zealand is $21.50 (usd)

For payment you can send Cash (US dollars or EUROS) or a US Post
Office, WalMart or Canadian Postal money order. Credit Card buyers
can use BidPay.com or PayPal.com My account address for bidPay and
PayPal is: wmtell@gmail.com

Hi,

I have listed my ICOM 706MKII on ebay.

The rig is in excellent condition and comes in the original box will
the mic, power cable, mobile bracket, owners manual and quick start
card, etc.

To see pictures click on this link:

http://cgi.ebay.com/ws/eBayISAPI.dll?
ViewItem&rd=1&item=5755587418&ssPageName=STRK:MESE:IT

If the link does not work for you just go to http://ebay.com and do a
search for: 706MKII

This item ends TODAY Sunday March 6th. It also has a BUY-IT-NOW

price.

Thanks,

Bill

I'm not surprised they are still available, at the prices you are

asking. Wholesale quantities of LEDs and resistors are available far cheaper locally here in the UK.

(Or perhaps, when you posted to uk.radio.amateur, you didn't realise that 'UK' is not a state of the USA.)
:-)

To Fellow Amateur Radio Operators:

My auction will be ending in a day, please make sure to check it out if you're in the market for a clean 2M/70CM HT with alot of accessories in pretty much brand new condition. Thank you!

Link to the eBay auction:

I have a 36" Primestar dish with the Ku band FSS Linear LNB (NJR2119F,
Vertical and Horizontal outputs) and mount for sale. Good for FTA or
anything that needs FSS linear LNB or remove LNB and use with feed for
ham band. I'm asking $40 or best offer. I'm in north Texas. I can
demonstrate it operating with my receiver. Please e-mail to: clee at
thedoghousemail dot com

Dear newsgroup member!

My name is Mike Baran. I am the author of www.inforelation.com database.
It helps You offer Your specific experience, skills or knowledge
and in exchange contact people with specific experience,
knowledge and skills in each science field !
You can also organize project team with them!
This service is at present free of charge.

Best regards,
Mike Baran

P.S. If you find www.inforelation.com useful, please inform your friends.

DATA PROTECTION

At inforelation your registration e-mail is not presented to others. Do not
put your email (or telephone) into your messages to avoid the potential
misuse

Hi all,
I am attempting to alter a Regency MX3000 scanner to receive weather
image signals from NOAA satellites, and I really need to see a
schematic. I have been told that the filtering is too narrow, and
needs to be a minimum of 30 or 40 kHz. Can anyone help me out?

Mark

These units are NOT "scanners"; they are general coverage recievers.

Looking for a great deal on one or two a narrow band, UHF (450-470)
walkie(s) with a key pad and LCD readout.

Types I've seen that fit the bill are certain Motorola P1225's ..CP200's &
Kenwood TK-380's. There's a bunch of others that would do the job as well.

I'm ready to buy ..please email if you have something. Thanks, Ray

Hello!

I am looking for an EXTERNAL SPEAKER, like ICOM SP-20, Kenwood SP-31,
Yaesu SP-6 or SP-8, JRC NVA-319 or NVA-88.

I am living in the Netherlands.

Please your reaction to my email (remove the obvious part it should
say like pa8540 at home dot nl).
Please apply the type of speaker, your price, and your preferred
method of shipment and its costs.

Hope to hear from you.

73

Kees

Getting a little nervous with the reserve not being met eh?
Kinda pricey for a non-returnable, used, non-warranty item.
But that's just my 2 cents.

john

HELP!!

I just purchased a Kawaski Parire 4X4 ATV - Want to SOMEHOW install a 2
meter mobile - any ideas on how to achieve this? Does any company make a
water resistant mobile (I havent heard of one but maybe someone else has).

73 Daniel W4ADT

I have a 36" Primestar dish with the Ku band FSS Linear LNB (NJR2119F,
Vertical and Horizontal outputs) and mount for sale. Good for FTA or
anything that needs FSS linear LNB or remove LNB and use with feed for
ham band. I'm asking $40 or best offer. I'm in north Texas. I can
demonstrate it operating with my receiver. Please e-mail to: clee at

I have a 200' roll of brand new Andrew 3/8" superflex heliax with 4 N male
connectors, which I would like to swap for a 500' roll of RG-213, not RG-8.
Please reply or email: n5omg@bellsouth.net

I will consider any trade

I am looking to trade the following for a PRC-25 or BC-474A:
Signal Corps Test Unit I-236
Signal Corps Aircraft Transmitter BC-458-A
Loud Speaker LS-454/V
Military J-38
B&W frequency meter, this is an ex-navy unit
Will trade the above and the following for a PRC-47 or similar
GF-11 Aircraft Transmitter USN Model Made by Western Electric August of 1943, and it was never used, in pristine condition with all original parts and tubes and works. Alsso Me-61/GRC field strength meter

I will consider all trades for equipment, so just email me any trade or even call me. I just graduated High School and need something to rebuild and use when I am not working

Email me with any questions or trades or even call me
Thank You,
Ian Riden

36" Primestar dish with the Ku band FSS Linear LNB (NJR2119F, Vertical
and Horizontal outputs) and mount for sale. Good for FTA or anything
that needs FSS linear LNB or remove LNB and use with feed for ham band.
I'm asking $35 or best offer. I'm in north Texas. I can demonstrate it
operating with my receiver. Please e-mail to: clee at thedoghousemail
dot com

I have up for trade an Icom 746 Pro. I would like to trade it for a

Yaesu 736R which has the 50 mhz and 220 mhz band modules added in. Or I would consider a stock 736R plus some $$. Please email me and let me know what you have!

I have a Ten Tec 238 tuner for sale. Appearance is 6.5/10 and works
excellent. Unit has a turns counter on the inductor instead of the round
knob. $250 and will split shipping to lower 48 states.

Outgoing mail is certified Virus Free.
Checked by AVG anti-virus system (http://www.grisoft.com).

36" Primestar dish with the Ku band FSS Linear LNB (NJR2119F, Vertical
and Horizontal outputs) and mount for sale. Good for FTA or anything
that needs FSS linear LNB or remove LNB and use with feed for ham band.
I'm asking $35 or best offer. I'm in north Texas. I can demonstrate it
operating with my receiver. Please e-mail to: clee at thedoghousemail
dot com

Are you ever going to let this radio go? I've seen it list on eBay for what
seems like a month now.

I am looking for an amp that is in good shape and reasonably priced. The
no-tune feature and 12VDC power requirements make this one the one I desire,
I just cannot afford a new one since I live on a fixed disability income. I
want to join MARS and think that a linear amp would be an asset. Please
e-mail me if you have one to sell. Thank you,
Kenn N7QPY

I have a 36" Primestar dish with the Ku band LNB (NJR2119F, Vertical and

Horizontal outputs) and mount for sale. I'm asking $40 or best offer.
I'm in north Texas. I can demonstrate it operating with my receiver.

IFR Systems 1600S/1600CSA Communications Test Set with manuals but I
am not sure what options are in the unit. If you know how to determine
the options, please email me and I will send that information to you.
Signal generator range: 250kHz to 1000MHz. Output power: -137dBm to
0dBm. Receive/monitor range: 250kHz to 1000MHz. Sensitivity: 5V.
Power meter range: 20mW to 200W. Oscilloscope bandwidth: DC to 1MHz.
RF frequency counter range: 250kHz to 1000MHz. Spectrum analyzer
dynamic range: 65dB (-5dBm to -30dBm). Data generator rates: 75 to
16kBps. I do not have the interconnecting cables for the 1600CSA and
was not able to test it so unit is sold **AS IS** . ** I have used
the 1600S for radio alignment and it works great. I welcome all
questions, I ask that you please ask your questions before bidding to
insure your satisfaction with the item. Shipping cost to be paid by
the winning bidder! All Payments are to be made by PAYPAL or certified
check. Only bidders with a positive feedback are permitted to bid on
this item. If you do not meet this criteria your bid will be
cancelled. All Buyers must contact me within 24 hrs. of winning item.
This Item is Sold With Out Warranty.

Up for sale is a like new Kenwood TH-G71A. This radio was my first (bought brand new from AES in Orlando) and was used indoors 90% of the time. The TH-G71A is a 2m and 70cm dual band handie talkie built to MIL-STD 810E. It features an illuminated display and DTMF keypad, alphanumeric display, AM receive, extended receive, CTCSS tone encode/decode/scan, 10 (16-digit) DTMF autodial memory channels, 200 memory channels, multiple scanning modes, optional PC programming software (not included), and more. The radio comes in the original box with the supplied accessories including instruction manual, high performance rubber duck antenna, a rechargeable battery pack, plug-in wall charger, and a belt clip. Also included with this sale are the extra accessories itemized below! Be sure to look at all the pictures, as they show everything included in this auction in great detail. If you have any questions, please feel free to email me. Unit was working perfectly when the photos were taken (date of listing), however, as with all electronics: sold as is. 7-3, K4PCM!

Extra, all originally bought at retail accessories:

AS-30	-- Maldol 2M/440 15" Superflex	--	29.99
BC-19	-- Rapid Charger	--	52.61
PG-3J	-- Filtered Cigarette Lighter Cord	--	33.26
SC-45	-- Soft Case, two of these	--	28.72
SMC-32	-- Speaker Microphone	--	52.95
	Total cost of accessories	--	$197.53

Photos available at   : http://pcmike.net/photos/Random/TH-G71A/
Also listed on eBay at:

Anyone know where I can get the programming software for the HT1250?

Thanks

Only from Motorola. I have a HT1250 and am a ham and have been there, done
that. If you get a HT 1550 and a programming battery you still have to have
a dealer set up the key programming once. Got a new HT1550 coming from the
local dealer tomorrow they say so I have been there too.
Motorola has stuff they do not advertise or have on the web site that you
can get if you can find the number. That is how I got them to order the
programming battery, I foung the number. They said they don't have an item
like that until I told them the number of the battery i wanted, then they
said OK!

I was going to install this till i found out from a antenna elmer that it
involves more money than i can afford to erect the tower. I have 2 top
sections and 3 mid sections. I will trade for a general coverage
HF(ts430/ts450/similar) or a dualband mobile w/dualband beam, or Hi tier vhf
moto ht, or a pentium ii/iii or k6-2/3 laptop, 10gb hd or bigger, at least
128mb ram, at least 400-500mhz cpu, floppy, and cd or dvd reader, this is to

give an idea of what i'm looking for, i will look at counter offers as well.
must pick up in nj, zip 08826

What you have is worth about $100-$150.
Mid sections go for about $25-$30 each, top sections
aren't much wanted.

Ron

All of this stuff is going on a "One Way Trip" to Dayton....
Most of it is from a couple of SK's in our area ... and I am
stuck moving it on for the Widows....

Flea Spaces at Dayton 1762-1768 .. thats close to the west end
food tent!... All that neat stuff thats not on my Diet!...

Mint Perfect Clipperton-L Dentron Amp... asking $400 yes it covers 160

Very nice Kenwood 520 w/ Kenwood MC-50 Mic $275

Kenwood AT-200 TUner $160

1 D-104 regular mic $25

1 D-104 Silver Eagle $45

Turner Super Sidekick Mic $100 ... has 4 pin plug on it for Kenwood

Old KDK-FM2030 ..2 mtr rig.... $20

Ham-4 Rotor ..was rebuilt 2 years ago by CATS $175

Kicker 500 Watt SWR mtr... $25

Drake TR4-C asking $250

Ameritron remote antenna switch RCS-4 $100

Yaesu FT-900 w/AT ... nice little 100 watt HF rig asking $750

Alpha 87a ... this one is mine... I have decided that I don't need
two of them... I am the original purchaser of this amp... it works
great.... complete with Eimac tubes... the originals... still work
great... brand new ones are $6500 .. buy this one for $4500 ...
It has had the Firmware Upgrade so that it actually does retune itself
while your operating.... really neat $95 addition ... the new ones
all have it..

MFJ Versa Tuner V (5) ... 3KW tuner with roller inductor $175

Yeasu FT-2500M ... nice 2 mtr mobile radio.. looks almost like
a new one.. $135

Diawa CN-103 Cross Needle Wattmeter/SWR etc... model is CSS-1 $80

Kenwood PS-50 power supply ... $90

Hallicrafters SX-122 ... this one is mine... it is MINT... and 100%
Restored... works perfectly... Restored means that all the old
capacitors.... all of them... have been replaced with new parts..
also any out of spec resistors ... and aligned using calibrated
equipment... perfect radio ... $450 or else it goes to Flea Bay
when I get back from Dayton...

2 ... Dunestar Auto Bandswitching Bandpass Filters model 600...
new ones are $339 from Dunestar .... buy these for $175 each ...
these are mine.... no longer contesting using 2 stations as Multi/Single
category so don't need them... They auto-switch with my Icom EX-627
antenna switch and the 2nd station had a Top Ten Auto Antenna Switch
on it... see next item...

Top Ten Devices Auto Antenna Switch .... currently setup for Icom
radios ... it can be switched to operate on any of the radios that
have auto switching info coming out of the radio.... $80

Nye Viking RFM-003 Peak reading Wattmeter 3 kw $375

Icom IC-17 ... this is the controller between your radio and your

computer for band changing etc... works with all Icom radios $90

K1EA DVP card .... with cable for Icom radio... was wired to my
IC-765 ... this is a "Memory Voice" Board runs with CT contesting
software as well as I am told other types of contesting software
and logging programs... $100

Whole bunch of our "Wooden Radios" .... Antiques .. restored to
original factory specs ... Pre-WW2... Zeniths, Philcos, RCA's etc!

See our Website for our Radios we restore etc...
www.JohnJeanAntiqueRadio.com

Several of my buddies are bringing some nice Collins, Drake, Hammarlund
radios etc... Flea Spaces 1762-1768

Available for pickup only in Fort Wayne....Well...actually Leo, IN
.... close to Ft Wayne...

Rohn HDBX 48 foot tower.. this thing is perfect condition..about
4 years old... has tilt base with it and thrust bearing Asking $300

Mosley TA-33-M Tribander.. this is 2 years old... $100

HyGain TH-6DXX ... Antenna is in good condition... had the stainless
steel hardware kit installed on it about 10 years ago... only
partially dis-assembled and all elements marked for quick re-assembly.
Asking $200

Another HDBX ... this one a 64 footer ... tower is in need of a
paint job ... and all the bolts should be replaced... couple of the
rivets in the top section are broken... $75

Watch it on the AutoReply E-Mail ... correct e-mail is
k9uwa   at   arrl   dot net

73.. and see U in Dayton
John k9uwa

The ICOM IC-208H 2M/440 dual bander has all the features you want. You get: detachable control panel, wideband receive, three power settings, built-in CTCSS decode/encode, PC compatibility and 500 alpha memory channels. Power output is 55/15/5 watts on 2 meters and 50/15/5 watts on 440 MHz. It is 9600 BPS packet ready too (6 pin DIN). The 208H also includes a built-in duplexer, OPC-600/R separation cable, HM-133 remote hand mic, mobile mounting bracket, power cord and spare fuses. This model requires 13.8 VDC at 12 amps.

Features
Encode/Decode
9600 BPS Packet Ready
500 Alpha Memories (6 character)
Built-In Duplexer
FM Narrow capability
 Weather Alert
Three Output Levels
Detachable Control Head
Extended Receive
16 DTMF Memories

Mint condition
Non smoker
Has not been modified
Only 3 Months old, bought it at Universal Radio.
If you want to see a picture I will email it to you.
Comes with original box,Front panel extention cable and all other accessories.
No DOAS

For Auction at EBAY ....
TR-7850 2m FM w/ ComSpec TE-32 and more! mobile Item number: 3088022304
3 days left. Starting bid 29.99 NO Reserve!!
Here is a Kenwood TR-7850 2m FM mobile 40 watt (HI PWR) transceiver mounted on a "over the hump" floor mount and sporting a TE-32 multi-frequency CTCSS unit. I bought it used about three years ago. The ComSpec TE-32 was installed prior to my acquiring the radio. Our local repeater requires a 123hz tone to access it and the TE-32 worked great. The 7850 needs batteries to retain its 15 channel memory when power is disconnected. Also if the radio's power supply is not connected for a long period of time it requires a reset. Owner's manual is included. Reports from the local 2m repeater are that the rig sounds great! Look the pictures over, check out the specs.
Thanks,
Jim

For Auction at EBAY ....
Set of 1 watt VHF FM HT's Dot Frequency 2ch. LIKE NEW! Item number: 3088036094
No Reserve! 3 days left!

Here is a set of VHF FM HT transceivers that are LIKE NEW in the box. 2 complete VHF FM handheld transceivers made by Com-Talk, Model GEE-890. Each HT comes with two antennas, a rubber duck for regular use and a telescopic for extended range use. I'm going to call these "USED" even though they were never out of the box except when I purchased them and tried them out. I also tried them prior to this posting recently using the battery packs off my Alinco DJ-580 HT. The batteries that came with them are DOA however the packs pop open very easy so you can replace the nicad batteries with your own (see pic's). There are NO wall chargers but they can be picked up easily at Radio Shack or Wal-Mart. These are 1 watt transmit (Hi power) and have two channels in them. I'm not sure of the Low power transmit setting. Probably a couple hundred milliwatts. I'll check that on the bench again and email it to you if you wish. The frequencies are (I'm told) listed as "DOT Frequencies" ch-1 = 151.895 mhz ; ch-2 = 151.955 mhz. There are provisions for an external speaker or speaker/mic located on top of each HT. Look the pictures over, check out the specs.
Thanks,
Jim

Hi all. I have an Alinco DR600T of which the UHF VCO is out of lock
until it warms up sufficiently. The testpoint 1 Voltage is 9.8 V
where it should be more like 4.5 V. Does anyone have information as
to how to adjust the UHF VCO for the right testpoint voltage. I can't
find an adjustable coil, or anything, in the VCO circuit to set it. I
CANNOT find a service manual for the DR-600 anywhere. Alinco seem to
have forgotten about this model as they have no or very scarce
information on their website.

Thanks in advance for your help.

Tony VE3DWI

I FINALLY got around to posting on eBay some of the NOS sweep tubes I have
here in the shop.
Look up my selling name: oldradioparts   and you will see them. I have
some more to go, and other industrial types like 6146, 6159, etc.

 I usually post on rec.antiques.radio+phono since I restore antique radios
mostly here in the Detroit area.
Anyone here have bunches of old consumer brand radio knobs for trade or
sale? Will trade tubes for good ones I can use, like Philco, Zenith , RCA,
etc of the 1930's-50's.

No web page yet, but I am a good source for many kinds of parts,
particularly 1/2 watt and ww pots. I can make many rare stacked or tapped
types from my stock.
Mark Oppat
Detroit area

Thanks for reading my posting. I have a MINT condition Kenwood TS-850SAT, which includes the 1.8khz SSB and the 500hz CW filter, PS-50 Power Supply, and the SP-430 Speaker. All in mint condition, and a non-smoking environment.
Only possible trade I might entertain as partial payment is a FT-920 loaded!

$1,200.00 + shipping for Georgia 30548

You must call me for this deal 678-758-1298 Anytime, either I will answer or you will get voicemail

Hi all, I have a Kenwood TH-31AT. This is a 220MHz small handi talkie dating back to around 1985.
The PL in this radio does not have dip switches on the front panel like the newer version "TH-31BT"
The PL is inside the radio and the PL is selected by soldering / unsoldering the pads on the chip.
Does anyone out there have the information that tells which pads to solder / unsolder for the different PL frequencies??
I have about given up looking for it on the internet.
The PL board inside the TH-21AT (2 meters) and the TH -41AT (440) is the same as the TH-31AT.
If you have this info and it's not to much trouble can you send it to:
lafayetteRadio@optonline.net
THANKS for your help!!!
73

My Name is Rich I have opened up a Amateur Radio auction site at
http://www.a2zedgifts.bidzfree.com/ It is intended for Amateur Radio
(Ham Radio)

I have been a ham for over 40 years and have had many call signs,
worked and lived all over the world. Now have settled down in NY and
decided to try our hand at a branded auction site. A few years ago I
opened A 2 Zed Gifts business. "A" being the first letter of the
alphabet and Zed being the last letter of the alphabet. We were
offering just about anything for sale.

For the past few months we were on eBay and just making it due to the
high listing fees. The overhead was killing us. I noticed that one
of the biggest auctions were Amateur Radio equipment. (I sold most of
my station in a matter of days). With that in mind decided to join
Bidzfree and open a branded auction site.

The following categories pertain to Amateur Radio (just click on a
category and a subcategory will be shown)

Amateur Radio

Apparel

Business & Industrial

Books & Magazines

Collectables

Antiques & Art

Personalizing

Hobbies

Please come over and take a look.

73

I have been helping a friend sell some stuff on eBay so far we are at
$4,100 sold with only $110 for eBay fees (less than 3% which is not a
very big number at all. Every check out what Auctioneers make for live
Auctions ?

I have a 36" Primestar dish with the Ku band LNB (NJR2119F, Vertical and

Horizontal outputs) and mount for sale. I'm asking $40 or best offer.
I'm in north Texas. I can demonstrate it operating with my receiver.

I've just started a new Yahoo group called RadioPriceFinder. The
purpose is to share information on who has the best prices for Scanner,
SWL, Ham Radio equipment and accessories.

Are you in the market of buying a new Scanner? SW Receiver? Antenna?
Then post a question to the group such as "who has the price on the new

Uniden XYZ scanner. Hopefully others will respond with prices they've recently seen or paid online. This should save many hours of websurfing to find the lowest prices.

Have you made a purchase and received bad customer care from the business you dealt with? Please LET everyone know so we don't fall into the same trap and buy from a bad business.

For more information on this group or to join you can go here:
http://groups.yahoo.com/group/radiopricefinder.

To scribe you can simply send an email to:
radiopricefinder-subscribe@yahoogroups.com

Thanks,
George

I have a number of NEW 2 element VHF Yagi antennas

They fold up like an umbrella for easy storage.

They are light in weight and very easy to set up.

They are a wideband freqency design and work well in the 140- 160 MHz
range therefore they are suitable for 2 meter ham band.

They use a low-loss "N" Type connector. These are ideal for any one that
needs to set up a temporary base station, or for rv use, etc.

Asking $20.00 each.

If interested please reply to bunyak@telusplanet.net

For Sale:
Ham Radio Gear:

As I haven't used this gear in a couple of years so I should find it a home.
All of the radio gear is in a custom 29"x14"x8" aluminum case with anti-static foam, it was designed for emergency communications. incase of any major emergencies.
1x Alinco twinband DJ-G5(H) UHF/VHF/FM (Frequencies Opened !!) 5Watt output with 12v auto power supply and stand up charger and an ICom FA-1443B Ant.
as well as the original. was 1,400.00 and I have the service manual for it, as its hard to get after time passes I felt I should buy it before it was needed, Manual value aprox. $150.00.
1x TX-242 Mobile 2 meter radio 50 Watts output, (Frequencies Opened !!)
1x external sealed speaker
1x rare Realistic PRO-34 200 memory, channels UHF/VHF/cell's,and wireless phones, handheld scanner,
1x SWR-30 inline 50W meter.
1x Larson 2 band 70 CM / 2 Meters automotive ant.
1x 2 meter (anti intermod) Filter DCI-146-4H
Cables
1x Multi band tower ant,
1x 2 meter tower ant. ,
1x Vox head set
1x quick charger multi volt, system MH-C777 for Ac/Dc input,
1x Cobra charger and
2x FRS-305 2 way Family radios, used 3-4 times
1x Mobile mag-mount 2 meter Portable ant.
1x 12 volt Deep cycle battery.
3x 10' foot Poles for Outside Antenna
No parting out. all sold together.
I have most of the original Boxes should be all.
All this for $500.00 firm
Buyer must hold a Ham licence
Vancouver B.C. (Coquitlam) area only, for pickup as its too much gear to ship.
E-Mail me at GuySchneider@Hotmail.com

Were you responding to me or the California gentleman? If you were responding to me, yes, I can ship it. It will have to be shipped via UPS Ground or Fedex Ground. Because of the oversize dimensions of the dish, they charge the rate for 70 pounds even those it weighs less. I believe Fedex is cheaper. Also, the packing and handling charge is $15, again because of the oversize dimensions. I'm in zip code 75044. Where are you? If I can help with any other questions, please e-mail me at: clee at the doghousemail dot com. Thanks.

All prices are in US Funds.

QTY.	Part #	Unit Price	Description
OPTO.			
54	TIL311	$7.00 ea.	The TI TIL-311 is a Hexadecimal Dot Matrix Display with integral TTL driver electronics to accept, store & display 4-bit binary data, Epoxy package
		(Note: This	part wholesales at about $16.50 each)
8	TIL311A	$7.00 ea.	The TI TIL-311A is a Hexadecimal Dot Matrix Display with integral TTL driver circuit to accept, store & display 4-bit binary data, Plastic package
11	DIS1417	$7.00 ea.	The TI DIS-1417 is a Hexadecimal Dot Matrix Display with integral TTL driver circuit to accept, store & display 4-bit binary data, Epoxy package

For a copy of the TIL311 Datasheet see:
http://www-s.ti.com/sc/ds/til311.pdf and it is mirrored at
http://umwnt1.physics.lsa.umich.edu/mttc/images/til311.pdf

275	Green LED	$0.10 ea.	Rectangular 5mm x 2mm face/lens $17.50 per bag of 250 ($0.07 each) and
7,250	Red LED	$0.10 ea.	T1 3/4, 5mm Diameter or 0.2" Diameter Sharp P/N: GL5PR4 (5mA at 1.9V) $17.50 per bag of 250 ($0.07 each) and $100 per box of 2000 ($0.05 each)
106	MAN6440	$0.95 ea.	Dual Digit, Green 7 Segment display, 0.56" tall character, Common Cathode

			$15 per tube of 20 MAN- 6440 ($0.75 ea.)
85	FND6740	$0.95 ea.	Dual Digit, Red 7 Segment display, 0.56" tall character, Common Cathode $15 per tube of 20 FND-6740 ($0.75 ea.)

TTL CHIPS, DIP Package

525	7407N	$0.18 ea.	$4.00 per tube of 25 ($0.16 each) Hex Non-Inverted Buffer with Open-Collector outputs
605	74ALS20AN	$0.19 ea.	$4.00 per tube of 25 ($0.16 each) Dual 4-Input Positive NAND Gates
240	74ALS27AN	$0.19 ea.	$4.00 per tube of 25 ($0.16 each) Triple 3-Input Positive NOR Gates
1,325	74LS74AN	$0.25 ea.	$5.00 per tube of 25 ($0.20 each) Dual D-Type Positive Edge-triggered Flip-Flops with Preset and Clear.
100	74ALS74AN	$0.25 ea.	$5.00 per tube of 25 ($0.20 each) Dual D-Type Positive Edge-triggered Flip-Flops with Preset and Clear.

RESISTORS

55,900	100 Ohm, 5%, 1/4 Watt Carbon film resistor, $1 per 100, $15 per box of 5000 or $100 for 50,000 pieces.
3,400	220 Ohm, 5%, 1/4 Watt Carbon film resistor, $1 per 100, $12 per box of 3400 or
3,400	680 Ohm, 5%, 1/4 Watt Carbon film resistor, $1 per 100, $12 per box of 3400 or

A pack of 100 resistors is $4 inclusive shipping to anywhere in the US and Canada

e-mail: jrparts@excite.com

Minimum purchase $4 including postage.

No shipping is included in the above prices. To quote a total including shipping, I require your full ZIP code or postal code in addition to a list of what you are interested in. Please specify the country for international orders outside of North America. The shipping you will be quoted is the cost of the postage stamp (plus insurance if requested).

The only part that I will ship for a total of $4 (by regular
mail) to anywhere in the US and Canada is a pack of 100
resistors.

All components are new. All semi-conductors are stored in
anti-static tubes/bags or on anti-static foam if you purchase
less than a tube/bag.

Offers on the lot are welcome. Keep in mind that I am looking
for a price below wholesale, but more than the commercial buyers
of surplus electronic parts are offering.

Anyone know or have any problems buying from Brian Kress of Columbus
,Ohio?His call is KC8RCV.He advertized two Kenwoods dual banders for sale
and I sent him a posyal money order for one on 2/25/04 and now called him
and was told he was going to resend me and others back their money,as the
radios got damaged in a water flood in his basement.He claims that he will
send out money orders on Friday.
I just want to know if anyone had any dealings with him bad or good.Is he a
man of his word?????
Anything can happen but.........

Here's what I found on the guy with a simple search engine:

http://w3.mivlmd.cablespeed.com/~ke3gk/kc8rcv.html - He ripped off WA2FAA in
2/2003 - MO sent for an FT-8900, radio never sent. He ripped off KD7K in
2/2002 - MO cashed, never sent radio. He ripped off AA9GL 3/2003 - MO sent
for TM-261A, radio never sent.

Has anyone done anything to try and get their money back?I just filed a
complaint with IFCC and with the Columbus,Ohio detectives.Now we see what
and if anything goes from here.If he does send me my money back I will let
you all know.If not,I will take a little ride to Ohio for a small
vacation....

Very glad to see someone taking on these scammers. Did you also talk to the post office? Considering the history on this guy, it looks like cronic fraud going on. I can't believe some law enforcement agencies would let this continue.

Ed

i received this from another newsgroup.......unfortunately the person
you mentioned is in here.............good luck!
here it is

  Rev 5dec 15dec 19dec 10Jan 22Jan 02Feb 13feb*

I have compiled this list of
persons that have been mentioned
BY OTHERS, on various HAM sites
as being not reliable. I have NOT
verified these statements, and
have NOT dealt with anyone on this
list. I do delete entries if there
has been an explanation satisfactory
to both parties, of if for other
reasons I don't think they belong
here.

If you are on this list and want to
be removed, just have the other party
send me a note agreeing to this and I
will be happy to remove you and to
inform all the people who have requested
the list.

  Just be warned.

I sent him an email asking if the radio was still available and all he said
is that it's been sold... was curious to see if he would say otherwise..
doesn't mention anything about the radio being damaged and not available
anymore.

I still haven't figured out the concept of how eBay could be 'better'.
Maybe you could explain it to me.

Dick sent a money order to a ham (he knows who the guy is) and got
scammed.

Why is sending money to pinkbunnyrabbit669@yahoo.com who is selling
stuff on eBay any safer, when you have no clue who the seller is?

It seems to me that by making the seller anonymous, it increases the

chances of getting ripped off ten fold.

Because the seller is not anonymous, you can get the full name, address, and phone number of any buyer or seller that you deal with just for the asking. This only applies after the auction has closed.

Also, unlike that fellow ham, ebay auctions do offer both buyer and seller protection, even if it does require jumping through a lot of hoops.. if you have spent less than $500, you will most likely get all, or nearly all, your money back.

You guys all know what can happen with people like this guy Brian.He is
going to rip off someone that really don't care and he may be the one that
will do like the other guy did to to kid in Fairhaven.He mailed him a mail
bomb.These people like Brian Kress don't relize who he can be dealing
with.There are a lot of crazy people out there that will hurt or maybe do
something worse.Brian Kress will have to wonder now if someone is out there
stalking him.I would not want to be in his shoes about now.
Think about it now,you make a complaint to the police,the internet fraud and
whomever else to let them try and get this taken care of.Now they tell you
we can not do to much at this time so now we take it into our own hands and
do something.Now you are the bad guy and the crook is protected Until he
goes to jail then he is someones B---- if you know what I mean.So all in
all,as far as the police and fraud divisions,you mind as well talk to a
brick wall.Like I told the police,grand larceny is grand larceny no matter
where or who you are.They put you in jail for jay walking or traffic
violations but to hell with the one that steal you blind.
Like I said before,If he does send me my money back,I will appoligize to
him.But until then,He has stolen from me and from others that do work hard
for their money.
My two cents worth.....

Young Lady your wrong. I paid ebay safe harbor the extra $20 for them
to get my funds referenda and all they are is a negotiating group. They
do nothing to get your funds returned. All ebay wants is your listing
fees.
They will not remove the seller from their auction program or take any
action against them.

Dick, Not all sellers are thieves as you know. In the many years (6) I
have bought and sold on ebay or these groups I have only been scammed
twice. Now that's not bad considering how many scammers are out there.
The large majority of sellers are honest people. I use a credit card, if
scammed I can always have my funds returned. That's my solution to the
scammer problem. Let the credit card company go after them while I get
my money returned.

I know that part is not true. I've seen plenty of Ebayers removed for shady
practices.

I didn't use Safe Harbor. Since I had already gone to the trouble of trying to communicate with the seller, and been given a royal runaround (including a cancelled refund of my money through PayPal), I filed a fraud complaint. They were in the process of refunding me all my money, except their $25 fee (yes, it's a gimmick), when the seller had a conscience pang and sent me a money order for the full amount.

The subject line says it all. I am
looking for Mitrek channel elements
on 52.525 so I can finish setting up
a base station Mitrek.

Before I go ordering new crystals for
the elements that came in it I thought
I'd see if Icould put some cash into
a fellow ham's pocket first.

I don't read teh groups as much as
I should so if you have a set please
drop me an email.

Mike WA6ILQ
(callsign) at nospam-arrl dot net
but dropping the nospam-

Does anyone have the operator's manual and/or technical manual for the
Alinco DR-600? My dad is getting one ready for me but he no longer
has the manuals.

If someone would be willing to mail me theirs, I can mail it back
after I copy it.

Please contact me at aerowolf35@skypup.net

Thanks

Edwin

The point is not that wanting qualified operators to have CW or any other radio-related skill is done for any reason of elitism, it is that it USED to take much effort to EARN a license. Now you can get the answers to memorize for a few (far too few) questions and "earn" a license with only a few days of "study". Those of us who took the exams at the FCC offices without any chance of helpful hints, winks or nudges by those giving the exam do not like seeing all our efforts wasted. I had a lot of trouble and spent many, many hours studying to pass the 20 WPM test. I don't even like CW operation very much. But I was glad I spent the time because it really meant something to pass the tests. Now, I realize that it will have been a WASTED EFFORT if this new plan goes through since I would have had extra privileges anyway.

10-4 good buddy, I guess I might as well sell my linears at the nearest truck stop.

Brian, I understand your sentiment as I partly feel the same way, but from what you have said above, it does appear that you place perhaps a bit more value in your accomplishment in getting the license, and maybe a bit too little in just enjoying the hobby?

Bob:

Please keep in mind that, in general, the ham HF frequencies are much
friendly (and saner) than the newsgroups.

I've only been licensed a little over two years (I didn't "stop off" at
Tech). When studying for 4 exams, I posted a some questions to several of
the ham newsgroups -- mostly seeking advice on how to learn Code. There were
quite a few rants and raves. I was accused of trolling; I was told that
since I would pass easy tests, I would never be a REAL ham; I was told to go
back to the chicken band (despite the fact that I have never been on CB);
etc. etc.

I became very scared. If hams were this nasty, did I really want to invest
the time and money in this new hobby? Luckily a few kind souls were
supportive and friendly -- enough so that I went ahead and passed all the
elements the first time (which does prove they are too easy <grin>).

Once I got on the air almost everyone was kind, supportive, friendly,
helpful (add your own positive adjectives here). So, Bob, ignore the rants
here. I'm sure you will find that the vast majority will welcome you to HF.
Well, perhaps not on 75 meters. <grin>

No Brian it is not a wasted effort on your part. You did it the right way.
You didn't whine and bitch and moan until the testing was dumbed down to the
lowest denominator.

Unfortunatly this country is showing the rest of the world how NOT to do
things. If this sort of attitude persists we will cease to be a power on
this planet. And I don't mean military power.

I too had considered tossing it all away. But I won't. I am too dedicated to the service to do that.

I will 'attempt' to show and if needed, to correct those that want to drag the service downward to the level of CB.

I think this may actually help us CW types out. I expect a lot of folks will be dragging out the keys to re-enter what they know was ham radio.

Boy you hit that right on the head. Incentive licensing is the single
biggest reason we have all this bitching and moaning today.

I've said this ever since 1968 when most of my (then) General class
privledges were ripped from me.

Now we have the league with its 180 degree reversal on the subject. Can
anyone say hypocrite ?

>
hamguy,

I am sorry, but your last statement: QUOTE>>The majority of the world has
already eliminated the code!<< is NOT TRUE. Those telecom authorities did
not say >>You are not allowed to use CW any more on the bands<<.

and to contribute to the conversation generally:
I do agree with some of the hamfriends posts earlier, that this is the new
challenge for us "older" hams, no matter what age they are, tohelp and to
guide and to elmer those new to the HF bands in proper operation. This
includes technical matters as well as human matters. Only passing a CW
examination does not implicate good manners. You can hear this every days on
the bands, and not only on the 75 m portion, which is only accessible to
Region 3 hams.

Another reason for the "trouble in the minds" of you american hams is the
structure of the licencing system. Many other countries, who had dropped the
CW requirement, have a very straight licencing system, like Austria - OE.
There you have to pass the complete written and oral test including the
whole pool similar to your EXTRA. If you passed this test ONLY, you where
granted 30MHz and above. The last step to get your HF-ticket was passing the
CW test. 30wpm before 2000 and 5wpm afterwards, like in the US. Granting HF
access now to those without CW-Test isn't that great thing, as it seems to
be over there on your side of the water, because your technicians dont have

to pass all the EXTRA questions to get on the air on frequencies above 30 MHz.

Maybe you all reading this, will learn to understand, that the world of amateur radio is different from the "american way". This is no rating on licencing systems, your FCC might know, why they made this kind of structur. But it does not mekes things easier for you guys over there in the US.

Have a nice weekend.

Helmut, OE8SOQ

Wrong. CW may have the best chance of breaking through BPL.. but basically,
HF will be a moot point when BPL fires up.

That is what is happening right now. FCC making it so easy to get on HF and
vacating VHF. That way the govt can claim no activity on VHF/UHF and
auction it off for big bucks.

Then with all the new 'hams' on HF the bands will be so crowded that we will

have 'frequency fights' all over the hf spectrum. Thus giving the gobermint
a reason to sanction and eventually elliminate ham radio.

Don't believe me? Just watch.

The ARRL is a publishing company, the only way to maintain their existence
is for there to be
MANY MORE hams to BUY many books from them. I can remember a time when the
ARRL
actually represented the interests of ham radio, but they now have the
corporate mentality.
"What is that beeping noise on my radio? Oh well, I'll just talk over it."

A license was required in the beginning that is true, however, the FCC
lost all control of the users so the feds took the easy way out. They

just did away with that little law and declared all users legal. Kinda
the way that amateur radio is going right now. Five bucks and my now
non-existing Advanced class ticket says that a no code, no written test
will be operating HF anywhere, any mode, yea verily!

Just follow the laws your losers.
You whine too much.
You ruin the hobby.
If you dont like ham radio,LEAVE.

If you bumped the Generals up to Advanced, you would start a war
because the Advanced users had to take a harder written test.
Remember, they had to work harder for it! Would everyone be happy if
there was just one license class for voice and have a code endorsement
if they passed the code? The last post kind of sounds more effective
than any I have heard in years since all this restructuring stuff
started. Keep all class licenses and just add a + to there license for
CW. Also allow the ones who want to talk voice do so on HF. By the
way, How many CB'rs do you know that can actually afford and expensive
Kenwood rig capable of going down that far anyways?

I would like to buy older Heathkits! What do you have that is just
collecting dust? Looking especially for SB-1400 AND ANY BROWN LITTLE
BOXES, to fill out my collection www.heathkits.com EVEN IF I HAVE ONE I AM
STILL INTERESTED! E-MAIL ME AT gw@heathkits.com 73 and thanks

--
73 Gary

Here is the best solution.

Return everyone back to NOVICE, CW only on 80, 40, 15 meters.

Allow ONLY EXTRA CLASS present holders that have passed the 20 WPM test to
operate the rest of HF.

Dan/W4NTI

All prices are in US Funds.

QTY.	Part #	Unit Price	Description
OPTO.			
94	TIL311	$7.00 ea.	The TI TIL-311 is a Hexadecimal Dot Matrix Display with integral TTL driver electronics to accept, store & display 4-bit binary data, Epoxy package
		(Note: This	part wholesales at about $16.50 each)
8	TIL311A	$7.00 ea.	The TI TIL-311A is a Hexadecimal Dot Matrix Display with integral TTL driver circuit to accept, store & display 4-bit binary data, Plastic package

11	DIS1417	$7.00 ea.	The TI DIS-1417 is a Hexadecimal Dot Matrix Display with integral TTL driver circuit to accept, store & display 4-bit binary data, Epoxy package

For a copy of the TIL311 Datasheet see:
http://www-s.ti.com/sc/ds/til311.pdf and it is mirrored at
http://umwnt1.physics.lsa.umich.edu/mttc/images/til311.pdf

275	Green LED	$0.10 ea.	Rectangular 5mm x 2mm face/lens $17.50 per bag of 250 ($0.07 each) and
8,250	Red LED	$0.10 ea.	T1 3/4, 5mm Diameter or 0.2" Diameter Sharp P/N: GL5PR4 (5mA at 1.9V) $17.50 per bag of 250 ($0.07 each) and $100 per box of 2000 ($0.05 each)
106	MAN6440	$0.95 ea.	Dual Digit, Green 7 Segment display, 0.56" tall character, Common Cathode $15 per tube of 20 MAN- 6440 ($0.75 ea.)
85	FND6740	$0.95 ea.	Dual Digit, Red 7 Segment display, 0.56" tall character, Common Cathode $15 per tube of 20 FND-6740 ($0.75 ea.)

TTL CHIPS, DIP Package

525	7407N	$0.18 ea.	$4.00 per tube of 25 ($0.16 each) Hex Non-Inverted Buffer with Open-Collector outputs
605	74ALS20AN	$0.19 ea.	$4.00 per tube of 25 ($0.16 each) Dual 4-Input Positive NAND Gates
240	74ALS27AN	$0.19 ea.	$4.00 per tube of 25 ($0.16 each) Triple 3-Input Positive NOR Gates
1,325	74LS74AN	$0.25 ea.	$5.00 per tube of 25 ($0.20 each) Dual D-Type Positive Edge-triggered Flip-Flops with Preset and Clear.
100	74ALS74AN	$0.25 ea.	$5.00 per tube of 25 ($0.20 each) Dual D-Type Positive Edge-triggered Flip-Flops with Preset and Clear.

RESISTORS

55,000	100 Ohm, 5%, 1/4 Watt Carbon film resistor, $1 per 100, $15 per box of 5000 or $100 for 50,000 pieces.

3,400 220 Ohm, 5%, 1/4 Watt Carbon film resistor, $1 per 100,
                            $12 per box of 3400 or

3,400 680 Ohm, 5%, 1/4 Watt Carbon film resistor, $1 per 100,
                            $12 per box of 3400 or

A pack of 100 resistors is $4 inclusive shipping to anywhere
in the US and Canada

e-mail: jrparts@excite.com

Minimum purchase $4 including postage.

No shipping is included in the above prices. To quote a
total including shipping, I require your full ZIP code or
postal code in addition to a list of what you are interested
in. Please specify the country for international orders
outside of North America. The shipping you will be quoted
is the cost of the postage stamp (plus insurance if requested).

The only part that I will ship for a total of $4 (by regular
mail) to anywhere in the US and Canada is a pack of 100
resistors.

All components are new. All semi-conductors are stored in
anti-static tubes/bags or on anti-static foam if you purchase
less than a tube/bag.

Offers on the lot are welcome. Keep in mind that I am looking
for a price below wholesale, but more than the commercial buyers
of surplus electronic parts are offering.

I am interested in 440 mHz. ATV. Would like to buy transmitter,downconverter
especially.Projects OK. Tell me what you have and what you want for it.Not
looking to spend a fortune can buy it new if I want to go that way.
THANKS !!

whell here is my two and a half cents worth.

i am just a newbe (less than one mo).
i do not know code at all, but i am working on it,
 i would rather not have to know it as too much to do these
days to keep on and trying to studying so i can work it at a
good rate, it is hade to find time some weeks.
but do not want to see it go away as it looks like a decent way
 to yak to someone else.

but do not realy see a need for knowing code just to use parts
of the radio waves.

when i go for my general i plan to know some code, but not sure
 if i will have a need for said.

Thats very well put. If I have to take a code test, then why dont the
Business Band, Radio Stations and all other commercial licensees?
Im not going to do code, so therefore I shouldnt be required to take
it to talk via phone.

Business Band operators don't have to take any test. Just pay money for a license to operate on a fixed frequency with a limited use FCC certified radio. So different from Ham radio I don't see how anyone can even compare the two services.

http://greynet.net/~gbarc/

Owen Sound, Ontario Canada

MEETINGS Monthly GBARC meetings are held on the fourth Tuesday of each month, at 7:00 P.M., except in July and August. We meet Rockford Restaurant located 5km south of Owen Sound on Highway 10 (at Grey County road 18). Breakfast get-togethers take place every Saturday, at 8:30 am, at the Rockford Restaurant. This is an informal social gathering of local amateurs and visitors to the area. Anyone can attend and all are welcome. Talk-in on 146.94- Mhz. Join us for "on the air" nets. Check into the GBARC net at 9:30 am (14:30z) Sunday mornings 3.783 Mhz and again on VE3OSR at 9:30 pm (02:30z) (Thursday evenings 146.94- Mhz.)

Community Services GBARC provides communications for community

events, such as the Terry Fox Run, the Boy Scouts' Jamboree-On-The-Air, and the Owen Sound Santa Claus Parade. Write or email for more information. Many GBARC members are volunteers in the CANWARN <http://www.on.ec.gc.ca/severe-weather/canwarn-e.html> severe weather spotting network.

Repeater GBARC operates repeater VE3OSR in Owen Sound, on 146.940 MHz (-600 kHz offset). This is an "open" repeater with phone patch, free for anyone to use. VE3OSR is funded by GBARC membership <http://greynet.net/~gbarc/membersh.htm> dues.

First of all, welcome to ham radio! Always nice to have
new folks join the ranks.

I understand your point of view about morse code. It can
certainly be viewed as out of date and unnecessary. I'm
an olde fart that remembers travelling to the FCC office
to take my test. Personally, I'd hate to see the code requirement
go away becuase it was a lot of fun. Certainly a challenge, but
once mastered (even at 5 WPM), it opened up an
entirely new (to me) way to communicate. Folks that
don't learn it are missing out.

Thanks for the nice welcome. I do appreciate beeing a ham since the early
70s. Starting within the United Nation Forces in Cyprus and operating the
SW-Home Link Station from Larnaca, 5B4ACU was my callsign, it was a real
great thing to be able to operate a full Collins S-line also on ham bands.
Antenna was a Rhombic with 240 feet each side, directed towards Austria.
Back in Austria, I had to pass the exam to get OE8SOQ. Thats for the history
so far.

Steve, nowhere in the ITU recomendation is stated, that there must not be
any more CW operation on the bands.

> Certainly a challenge, but
> once mastered (even at 5 WPM), it opened up an

> entirely new (to me) way to communicate.

 You will still be alowed to stay to your favorite mode, and there will be
zillion of hams out there on the all bands, not only HF, who will share
their love for this tremendouos skill.

> Folks that don't learn it are missing out.

Unfortunately, I've lost a part of my hearing abilities, so for me it is
impossible to do Morse code any more, but i loved it, while I could do it.

Best regards and 73 de OE8SOQ
Helmut

With modern radios you should be able to adjust it so you can still do
Morse. It really ought to be clearer than speech. Or has your hearing bad
enough that now you stick to digital?

Helmut, have you tried a transducer put on the side of the head? The vibrations may do the trick. Or a LED device to do it visually? Or putting your fingers on a transducer or the speaker perhaps?

Just a few thoughts.

Dan/W4NTI

Hi,
Why not? You can use light. Make a flashing light from audio code
signal. Being deaf is not an excuse if you really want to do it.
73,
Tony, VE6CGX

Ever had the thought that if 50,000 people donated to someone a dollar
each, it would be an amazing way to earn a lot of money without anyone
shelling out large sums of cash? Well, it can be done. (So they say.)
=0D
I found this article in a news group, and it makes perfect sense. If you=

follow it's simple instructions, you could make yourself a large amount o=

f
money in a very short time. I do however advise that you look into it
thoroughly to make sure that everything is perfectly legal. (It seems O.=
K.
to me)
=0D
Elias Moussally wrote the following:
=0D
 I just read an article in an Internet news group describing how to make=

$50,000.00 in only one month from a $5.00 investment.
 =

 Of course I thought this was ridiculous ,or some type of pyramid. I talk=
ed
it over with my family, an attorney, and my friends, and they all agreed =
it
was some sort of scam. I hate scams because usually someone gets burned,=

and I didn't want it to be me! I blew it off for a few weeks then saw
another one in a news group I go to a lot and thought, "Maybe this is
legitimate!". Besides, what's $5.00 , I spend more than that in the morni=
ng
on my way to work on coffee and cigs for the day.
  =

 Well, two weeks later, I began receiving money in the mail! I couldn't
believe it! Not just a little , I mean big bucks! At first only a few
hundred dollars, then a week later, a couple of thousand , then BOOM . By=

the end of the fourth week , I had received nearly $47,000.00. It came fr=
om
all over the world. And every bit of it perfectly legal and on the up an=
d
up. I've been able to pay off all my bills and still had enough left over=

for a nice vacation for me and my family.
 =

 Not only does it work for me, it works for other folks as well. Markus
Valppu says he made $57,883 in four weeks. Dave Manning claims he made
$53,664 in the same amount of time. Dan Shepstone says it was only $17,0=
00
for him. Do I know these folks? No, but when I read how theysay they di=
d
it, it made sense to me. Enough sense that I'm taking a similar chance
with $5 of my own money. Not a big chance, I admit--but one with
incredible potential, because $5 is all anyone ever invests in this syste=
m.
 Period. That's all Markus, Dave, or Dan invested, yet their $5 netted
them tens of thousands of dollars each, in a safe, legal, completely
legitimate way. Here's how it works in 3 easy steps:
 =

STEP 1.
 =

Invest your $5 by writing your name and address on five separate pieces o=
f
paper along with the words, "PLEASE ADD ME TO YOUR MAILING LIST." (In thi=
s
way, you're not just sending a dollar to someone; you're paying for a
legitimate service.) Fold a $1 US bill, money order, or banknote inside
each paper, and mail them by standard U. S. Mail to the following five
addresses:
=0D
(Remember: It costs more to send a letter to Europe, Asia or so) =

   =

=0D
 1.   Angela Johnson

        =

5.   Ray Parsons
       807 East 9th St.
       Sedalia, MO 65301
       USA

=0D
=0D

STEP 2.
=0D
    Now remove the top name from the list, and move the other names up. =

This way, #5 becomes #4 and so on. Put your name in as the fifth one on t=
he
list.
=0D
=0D
STEP 3.
=0D
    Post the article to at least 200 news groups. There are at least 1700=
0
news groups at any given moment in time. Try posting to as many news grou=
ps
as you can. Remember the more groups you post to, the more people will s=
ee
your article and send you cash!
=0D
=0D
STEP 4.
=0D
     You are now in business for yourself, and should start seeing return=
s
within 7 to 14 days! Remember, the Internet is new and huge. There is no
way you can lose.
=0D
    Now here is how and why this system works:
 =

    Out of every block of 200 posts I made, I got back 5 responses. Yes,
that's right, only 5. You make $5.00 in cash, not checks or money orders,=

but real cash with your name at #5.
 =

    Each additional person who sent you $1.00 now also makes 200 addition=
al
postings with your name at #4, 1000 postings. On average then, 50 people=

will send you $1.00 with your name at #4,....$50.00 in your pocket!
 =

    Now these 50 new people will make 200 postings each with your name at=

#3 or 10,000 postings. Average return, 500 people=3D $500. They make 200
postings each with your name at #2=3D 100,000 postings=3D5000 returns at =
$1.00
each=3D$5,000.00 in cash!
 =

    Finally, 5,000 people make 200 postings each with your name at #1 an=
d

you get a return of $50,000 before your name drops off the list. And
that's only if everyone down the line makes only 200 postings each! Your
total income for this one cycle is $55,000.
 =

    From time to time when you see your name is no longer on the list, yo=
u
take the latest posting you can find and start all over again.
=0D
    So that's it. Pretty simple sounding stuff, huh? But believe me, it
works. There are millions of people surfing the net every day, all day, a=
ll
over the world. And 100,000 new people get on the net every day. You know=

that, you've seen the stories in the paper. So, my friend, read and follo=
w
the simple instructions and play fair. That's the key, and that's all the=
re
is to it. Print this out right now so you can refer back to this article=

easily. Try to keep an eye on all the postings you made to make sure
everyone is playing fairly. You know where your name should be.
 =

    REMEMBER....HONESTY IS THE BEST POLICY.YOU DON'T NEED TO CHEAT THE
BASIC IDEA TO MAKE THE MONEY!
    GOOD LUCK TO ALL,AND PLEASE PLAY FAIR AND YOU WILL WIN AND MAKE SOME
REAL INSTANT FREE CASH!
=0D
So that's it. Since you are paying for the service of having your name
added to a person's mailing list, you aren't actually giving themmoney. =

So try it out, it's only five dollars, and you never know, it just might
work out.
=0D
!!! REMEMBER: IF YOU SEND A MAIL TO EUROPE, THEN YOU HAVE TO STAMP IT WIT=
H
AN EXTRA STAMP !

FRS Radios System consisting of: Two Standard Radio (now Yaesu Radio) Mod.#
HX625A FRS Walkie Talkies (used in excellent cond.), One Standard Radio
CMP625 Lapel-style Speaker/Microphone (new in package), Two Sanyo Leather
Radio Cases (new opened 1 for photos only), Two belt clips for the radios,
One radio owner's manual. ... If your looking for high quality FRS radios
that were designed and manufactured my a real two-way radio company, these
are it! ... I bought these several years ago, but only used them a couple of
times. ... They have good range (full power 1/2 watt with 14 ch. & 38
sub-codes), Are water resistant, Have clear and strong audio, Have tons of
features, and are in safety (hi-viz) yellow. ... The lapel-style speaker/mic
looks like one of those mics that the police use. Allows you to keep the
radio on your belt while talking and monitoring. ... Each radio uses 3 AA
batteries (Alkaline or Rechargeable). ... FREE SHIPPING (cont. US) ... NO
RESERVE

This is a complete Pentium III 866MHz powered PC System (less monitor). ...
Built by an IT professional (not just "slapped together")... ALL PARTS ARE
NEW except CPU and Hard Drive which were removed from working equipment. ...
Comes with the following: 866MHz Genuine Intel PIII Coppermine CPU, Genuine
Intel D815EGEW Motherboard, 256Mb / 233MHz RAM, Mini-tower (MATX) case &
200W power supply, 52x LG CDROM Drive, 13Gb Hard Drive, 3.5" 1.44Mb Floppy
Drive, Powered Internal 4 port USB Hub, 56Kb Internal Fax Modem, High
performance ball bearing CPU cooler, High performance ball bearing case fan
with speed control and failure alert, 107 Key Keyboard w/special purpose
keys, 3 button wheel mouse, and a GREAT sounding 3 piece satellite sound
system with powered subwoofer.

Mre than adequate for packet and/or general shack use.

It needs to have removable sides and pick-up from North Texas. What do you
have? Thanks, Ed.

Hi all,

I have been out of active hamming for about a year
and have heard an awful lot recently about the CW
requirements being dropped and possibly TECHS
being grandfathered into General status.

All of this comes as a big suprise to me, I knew it
was going to leave as an international requirement
but I had no idea that the US was considering dropping
it.

Is any of this true???

Thanks and 73

Patrick,
W4PHM

There are now 15 petitions on file with the FCC. Some propose dropping the code for one or more licenses, some propose increasing the code back up for some licenses, some propose complete restructuring, some propose grandfathering Techs to Generals.

Whatever comes of it all, it will probably be a couple of years before the FCC digests this, comes up with their own "mix", put out an NPRM, get comments, and finally institute whatever they come up with.

The automatic upgrading of Techs to Generals is probably unlikely as the FCC has historically rejected that idea whenever they made changes. The dropping of the code for one or more license classes is likely but apt to take a while since the rule making process is slow.

Get a copy of the G4FON software and after 30 hours of study and practice

you should be able to pass the 5wpm and get on the Tech with HF privileges. Get the current General study guide (which expires at the end of June 2004) and after a few weeks, you should be ready to take the written. You can quite possibly be on the air for over a year by the time the FCC does anything. Plus there's no guarantee that they will make any change at all in the near future since they just finished restructuring in April 2000.

Can't seem to find too much recent feedback on Google regarding the major
Amateur Radio Distributors. I'm considering the purchase of a TS 2000.
Texas Towers has the best price (Along with Giga Parts). Any opinions about
the major players? (AES, HRO, Texas Towers)

Phil

Most of the components listed below are still available.
Some of the quantities have changed. E-mail jrparts@excite.com
for details.

I have the chance to pick up a nice working alpha 77 and was wondering what the fair market value would be for this amp ?

I have a Syquest 1.0 gHz storage drive, with 2 1.0 gHz disks. The drive
itself fits in a 5 1/4" slot. Comes with the 2 disks, ide cable, and driver
disk. Works good for storing pics. Sold as is, but is a working unit no DOA!
 $40.00 I will ship to cont. US Thanks!!

Thanks for reading my message. I have a good condition, everything works
fine, Alinco DR-110T 2 meter Mobile (been using as base). Condition cosmetic
I would rate it a 9.5. As I said I have talked on rig, received good
reports. Mic however I don't care for, it works fine, however I don't like
the way it keys the rig - again, the MIC WORKS, I just don't like it - mic
does have keypad.

$135.00 Shipped CONUS

Email directly please db1@dbgeneralstore.com

Also find other ham gear for sale at my website www.dbgeneralstore.com

I have forsale a Cushcraft A50 5S 5 element 6 meter beam. It is used, and will need new clamps for the elements to the boom. The gamma is in good condition. Will ship in a USPS triangle tube. The price is $50.00 + shipping from 49442 5 lbs.

Thanks DAVID

Peter Dahl makes transformers for Clipperton L's as well as most other stuff, Dont know the cost but you can research it.

I'm looking for power supply caps for this amp, anyone have any ideas?

For Sale - Texscan Sweep Generator model SG-677U $99.00 + shipping & handling.

Unit is mounted in a very sturdy military carrying case but can be removed for rack mounting. I have no way of testing other than making sure it turns on and the dials and gages looks like they are working, so I am offering on a money back guarantee (less return shipping cost). Pictures can be found at www.dentonmarket.com or contact me at mikelgiles@bfesystems.com

"jack" <j.beltz@insightbb.com> wrote:

Good luck Jack. I have looked for years for the very same thing and never
able to find a floppy disk version of 95. They were out there just never
got lucky. I had to resort using dos to transfer files via dcc from
another Win95 machine to the ones I needed to have it on.

The average shelf life of floppy disk magnetic media is 5 years. You may
find someone who will give or sell you a set, but it is doubtful you will
find any error-free Windows 95 setup disks....

Hi,
I have a set I used couple weeks ago. Now I don't need it since my boxes
no longer runs on Windows. Gone to Linux with CD-ROM.

Thanks for reading my question! Could someone please email me directly -
Looking to find out if the SM-220 will work with the Kenwood TS-850SAT.
Thats the only question, I appreciate all comments!

73 Daniel W4ADT

p.s. If you have a SM-220 (and it will work with the TS-850SAT) I would be
interested in speaking with you about purchasing it, if the price is right!

Email me direct please db1@dbgeneralstore.com

Looking to TRADE - QMS b2-200 - Quick Universal Mount System with SG-230 and
SG-303 .
I have not used this equipment, it was in storage for about 2 years, but I
was told it worked when it was put up. Guaranteed not DOA.

I am looking for a HF Rig and antenna, but I might trade for something else,
what do you have?

email to georgiadiver@yahoo.com

Thanx,

Dan

Hello all, I have 4 amplifiers. Station 550, it does between 200 250 watts dead key and swings to 550. This amp takes 2 watts to do this. A ameritron ALS 500 moblie amp with the 10 meter mod. 25 watts swinging to 70 will give you 200 swing to 500 with 80 amps of draw on the battery. You can run this amp more effectivly by running two 2200 uf 16 volt electrolitic caps in parallel with that battery and the amp. I have a palamore three tube amp. 12BT6 driving two 6JS6Cs it needs tubes so I have no idea what it does. Then there is the VooDoo 300 B it is a base amp and puts out about 150 watts with 300 watts of swing. The power to drive this amp is 2 watts. The Station 550 and the voodoo 300 B are broad band amp so they will work anywhere between 80 and 10 meters. I have a Johnson Valaint II that needs a Low voltage transformer. I also have the Haicrafters S-85 and a Hammarlund HQ 110 that needs C 73 and a realinement. these are for pick up only. To heavy to ship.

I have a Pro 2052 trunk tracking scanner as well as a 300 watt MFJ 949C antenna tunner and swr watt meter. Sycron 1000 watt meter as well as to rerceivers. I also Have a Pentium 233 complete dialup internet ready computer. Includes monitor keyboard video cammera vidio card and mouse.

I am looking for a good amp that I can drive with my RCI 2990. Some thing with 4 811s, or 2 or 4 CX 250s, or, 2 or 4 572bs, a single or pair of 3-500s all mounted vertcal of course.

Collins PRC 47 hf trancsievers. 2-12 mhz USB. I have 8 units
working in various cosmetic condtions from 250.00 to 550.00. I have
the mechanical filters for LSB conversion. Spare PL177WA final tubes
(pulls, new ones are 325.00 each), spare working modules(translators
etc), I have 12 sets of good 2N2287 switching transistors (pulls, part
that fails the most). whip antenna and leg sets (2 sets). I also have
4 amp/mod module (this is a plug and play module to get you on LSB)
converted to LSB ready for install in your PRC 47 90.00 each. I do
repairs on these sets (50.00 plus 35.hr). Parting out 10 units have
maney parts. let me know what you need and I will quote you a price.
Once this stuff is gone, I have no idea where you will have to go for
replacment parts. Thank you all for reading, I hope I posted this
correct as I am new to this group.

hummmmmm ... hard one ....

I've got dos 6.6 and windows 3.11 on floppies and then a windows 95
upgrade (from 3.11) on cd rom. those old 1X / 2X serial (or
parallel port) CD roms are dirt cheap on ebay and in swapmeets.

also you could try transferring the whole cd to your laptop with
laplink ...... cheap and easy. (if you've got the disk space)

also .... 3.11 and 95 floppies are frequently found on ebay
......

Anyone know where I can get BR2032 batteries WITH the solder tabs?

Thanks

Edwin

Looking to TRADE - QMS b2-200 - Quick Universal Mount System with SG-230 and
SG-303 .
You can see this item at http://www.sgcworld.com/products/qms/QMS.html
I have not used this equipment, it was in storage for about 2 years, but I
was told it worked when it was put up. Guaranteed not DOA.

I am looking for a HF Rig and antenna, but I might trade for something else,
what do you have? If you want to purchase, make offer.

email to georgiadiver@yahoo.com

Thanx,

Dan

Up for auction is a veritable treasure trove of Bird equipment,
including 2 Model 43 meters, lots of slugs, cases, a Bird Coaxwitch
Model 74 and other good "stuff"

Please check it out, and thanks for looking!

I would like to purchase Heathkit catalogs and flyers to fill out my
collection. If you have an old Heathkit catalog that I need, I will give
you at least $10 to ship it to me. e-mail me at gw@heathkits.com

I have posted two old texts on E-Bay:

1) Electrical Measurements in Theory and Application, 4th Ed., by Smith, 1948;
2) Electrical Engineering, Vol II (AC Circuits), 4th Ed., by Dawes, 1947.

Both are in excellent condition, quite useful, AND EACH HAS A CHAPTER ON ELECTRON TUBES.

Item #'s are 3580023477 and 3580023807.

Enjoy!

John

Hi All,

If anyone has a Motorola XTS3000 Programming cable available for sale, preferably in Australia as I need it quickly, could you email me with a price including shipping (Express post if in Australia or can arrange overseas purchase if I can receive within 10 days at a reasonable price). Please email me at the below address.

Beanstalk@bigpond.com

Thanks in advance,
Richard.

Anyone currently operating ham radios in a Ford diesel pickup? I have
a gasoline powered Ford F-150 and have always had a bit of a noise
problem and had to so some filtering, just wondering if using a diesel
takes care of the problems.
Thanks.

From what I understand, most of your noise comes from Ford electic
fuel pumps. They seem to lack any filtering at all!

Gas or Diesel,, if its got the electric pump...its got noise!

I have a EF Johnson 7175 Programmable 80W UHF 99 channel commercial radio
which will do the UHF Ham band with ease and no power reduction I could

trade for this IC-2100. The Johnson Challenger comes with the mounting bracket and standard microphone (a DTMF mic may be available - I have to dig around for that one).

Let me know if interested.

5 @ $175.00 each plus shipping
10 @ $155.00 each plus shipping

MaxTrac Mobile Radio (Model:)D44MJA7JA5AK . Description: UHF, 32 Channels, 45 watts 449-470 Freq range .
5 button front with display 16 pin acc plug . Scan plus many more features.These are really nice radio's that are

perfect for people that are on the road a lot, as in the Deliveries of goods
& services,
Utilities, etc. .
  Radio w/Microphone only Prices:
  1 @ $135.00 plus shipping
  5 @ $110.00 plus shipping
  10 @ $100.00 plus shipping

  Radio w/Microphone, Plug and Bracket Prices:
  1 @ $175.00 plus shipping
  5 @ $150.00 each plus shipping
  10 @ $135.00 each plus shipping
If you need a larger quantity, please email me & I will work
out a price for you. You can also email your phone number
if you would like for me to call you.

I accept Cashier's Checks, Postal Money Orders and PayPal.

These are really nice radios. I also sell them on eBay (for more $) and
have
had a lot of positive feedback on these radios (my name is "searchking"). A
lot
of the radios have a decal on them that lists the channels & identification.
The
decals come off easily (I use WD40). I just do not have the time to clean
the radios , so that's why I offering them at these low prices.

Thank You for your time and I look forward to doing business with you!
John 904-631-1809 ucon@bellsouth.net For more info..

in like new condition, never mounted in mobile situation.
icom ic2100h with bracket, manual,cable, box.

this has all the bells and whistles.
Presently goes all the way down to 136mhz i think.
alpha numeric display in orange or green, 4 step brightness display. call channel button, numerous search ranges.

150.00US + 15US for shipping

thanks

One of these below will get you there...

Seems to me that they should bump up the current General class to
Advanced class.
This way people who worked hard to get to General will not be locked in
with the no code
folks. That seems fair?.

They're planning on eliminating the Advance Class license.

Just what we need. Lazy belly aching people who want something for nothing. They'll get the HF bands and not appreciate what they have becuase they didn't have to work for it. Just like everything else in this country. Make it conveient or I'll complain and bitch about it and find someway to MAKE you change it for me. I deeply appreciate my PRIVILEGES on HF because I worked hard to get them.
I guess the next step is 4 watts RMS and 12 watts PEP and Channelize the bands and of course NO TESTING!!!! God forbid we should ask them to take a test..

Isn't this the same thing that happened to the CB culture
in the mid to late 70's? Back then you had to license, but
all of a sudden that was too inconvenient. So licensing was
eliminated and every hemorrhoid could get a radio and ruin
the band.

It's all part of the "dumbing down of America" that has been going on for the last 20-30 years. Those fools at the ARRL that are so worried about protecting "their bands" are playing right into the hands of those who are trying so hard to take them away from us.

What better way to justify selling off the Amateur bands/hobby to commercial interests than by ensuring that it becomes just another form of CB - complete with all the idiots and on-air antics, foul mouths, etc..

(sell all your gear *now* while it is still worth something... :>)

we'll be just another bunch of CBers.
look at the cesspool of the citizen band.
that's what 'unlicensed' does.

Seems I was not the first!!
Don't like it?
oh well.

if you are talking about me, you took what I said all wrong.
I too, appreciate MY PRIVILEGES!!
I don't want to be on the same level with the no code folks.
Although there is nothing wrong with them.
I did work a bit harder to get where I am and folks in my position would feel

cheated.

   Seems to me it started back farther than that.... probably in the late
60's when the "new math" was being pushed by pointy headed liberal
educators.

nice list, ergo

and, BTW, I am NOT from the USA, I am a HAM since 1990, CALLSIGNS OE8SOQ and DD9XX,

what are you guys going to do, if you hear a station from lets say VK, GB, DL, HB9, and many others, among them rare DX countries? First thing to ask wether or not they did pass the CW Test? and then not continuing the QSO?? Would this be polite? hamlike? How would your reaction be if some DX ham offends you like that?
The proposed changes in the ARRL paper saying, that your FCC will grant lifetime credit for CW all previous licenced novices and techs. All techs will have general privileges. Will you stop working them on the bands? Will you resist to give them the point for ten-ten, WAS or whatever they are chasing? Will you first go to buckmaster or QRZ and look up the callsign to make shure not to talk to a >NON-CW TESTED<? This looks like to me as it was down the years in your country when no white one would have shook hands with a black man, or driven on the same bus. It is just RASISM. Will you let the best hobby in the world go down the sewer pipe just for beeing too proud of taking the CW test some time ago?

I think, that there is no question about the historical weight of CW for radio comunications worldwide. Nowadays it has no more commercial nor official impact. It seems to me, that it is the same as knowing how to write on one of those old TRIUMPH Typwriters or handle one of those old TTY monsters whith the punched paperstrip. It is a great handycraft to be able to do this, but is is no more neccesary to learn how to write on one of those old machines. Ask someone who grew up with the PC keybord to do this - what will happen?

In my homecountry, Austria, they dropped the requirements for CW test end of last year. BUT they stated in that law, that CW test can be required by the applicants in future, as long as the authority can supply CW-EXAMINERS. BTW, the former <nocode> Test was the same as for HF, just no CW. So every

Austrian licencee is tested like an EXTRA in the US, exept the CW. And this
is the same in all of the EUROPEAN countries.

Just my half EURO worth

Helmut
OE8SOQ

Hi, Helmut
For me it is not about learning CW. Looking back the history of ham radio,
I am wondering about the quality of today's operators. Majority of new
ones are just a bunch of glorified CB'ers. That's where my beef is.
Dropping CW requirement is fine with me. And written test is a joke.
Most don't even know which way current flows in a diode or how to
solder. I have better idea, just sell the licences with full previledge
for 1000.00 each to anyone. Getting driver's licence is harder than
getting a ham ticket now.
73,
Tony, VE6CGX

I would like to buy 6 or 7 HT1000 6 place rack charger at a good price .
Thanks

I can be reach at 904-631-1809 John or just email me.

As it damn well should be...it's much easier to get killed by a bad driver
than by
sloppy CW.

Old 2meter Icom in very good shape - still have the box, mic, mounting
hardware and manuals! Great for the beginning ham that wants some
extra power. Sadly, no PL/tone squelch so that means I can't talk to
a lot of the repeaters around here.

Yes you missed that it was for credit card applications not credit card
purchases. Some large chain stores in this country have their own charge
cards and if you apply for one, then you have to put down the SSN.

The response was addressed to the person who wrote it,
Clint.

If that wasn't cl;ear I am sorry, but I think we can all figure out
who the writer was even if the attribution got screwed up.

Sorry you are still in shock, OM!

the FCC is not tasked with deciding what we NEED. Rather they are

tasked with regulating what we DO with amateur radio.

Your statement is totally dishonest and is not worthy of discussion.

For the confused, grumbling babies like Dwight, who think that
CW is dead, here is great evidence to the contrary:

TEENAGERS WHO LOVE CW:
http://home.alltel.net/johnshan/cw_ss_teens.html

http://home.alltel.net/johnshan/links_ss_cwin.html

YMMV

Try CW - it might just lower your blood pressure about 90%
there Dwight, old boy!

LOL!

Ahhh, so if you are not a CW fanatic, then you don't like amateur radio.
Such a negative attitude as yours has been part of the reason why
amateur radio has been in decline. Here in VK, recent meetings between
the government communications body (ACA) and amateurs has seen
overwhelming numbers in favour fo the removal of CW for the access to
the HF amateur frequencies. In the meeting that I attended, only one
amateur was in favour of the retention of CW as a mandatory access
requirement for HF. Of all of the amateurs at the meeting, only one
person in favour of the retention! Surprisingly, even the unrestricted
operators (equivalent to extra calls) were all (bar the one anti) in
favour of removing CW as an uneccesary barrier to HF access. As a
result come 01 Jan 04, CW is not required in VK for access to HF. We
still support it as a historical part of amateur radio, and indeed hope
that it doesn't die off as a mode that amateurs use. Funnily enough,

now it is not required (well in about 4 days anyway), the concensus is that it will probably become a more popular mode of comms - but in the end, that is what it is - merely one of the many modes of comms that is available to amateur operators. Long may it prosper, but not as an uneccesary barrier to HF access.
The bitterness does not start with just the anti CW mob - it is both their fault and those of the anti change establishment. To say that the anti CW individuals should stay on the internet is at best shallow, and at worst stupid - sorry, but I say it as I see it. If it hurst, then there may well be an element of truth in it. Have a think about it.
Never know your bad luck, you may well hear me on HF come 0100 (LIMA) on 01 Jan 2004 (that would be about 311300Z Dec 03 where the ruling in VK changes all over the country). Hope you welcome all of us newcomers to HF - many of us have been on HF for years on military and commercial HF freqs, so are not exactly newcomers to the band in general. Hope to speak with you then.

Matt

No. They only need your SSN when you apply for credit. At no other time
does a merchant need your number.

I wrote the words in the message Albert replied to and Albert properly attributed those words to me. However, Albert started out that message by blaming me for the things Clint had said in earlier messages.

  No, the FCC is tasked with deciding what the basis and purpose of the

Amateur Radio Service is and what we need, from a regulatory perspective, to be able to meet that basis and purpose. The FCC clearly addressed that when they said "the emphasis on Morse code proficiency as a licensing requirement does not comport with the basis and purpose of the service."

> Your statement is totally dishonest and is not
> worthy of discussion.

I've simply quoted, and agreed with, what the FCC has said. If you think that is dishonest, perhaps you should take it up with them. However, I don't think it is dishonest for the FCC to say that "...no communication system has been designed in many years that depends on hand-keyed telegraphy..." And I don't think it is dishonest to say that alone is justification to eliminate Morse code proficiency as a licensing requirement.

  Excuse me, but I have never once said, suggested, or even hinted, that "CW
is dead." My comments throughout this entire discussion have solely
addressed telegraphy proficiency as a licensing requirement.

> Try CW - it might just lower your blood
> pressure about 90% there Dwight, old boy!

  And learning to read what a person has actually said, instead of blaming a
person for things that person never said, may help lower yours.

  Sadly, the near future is not so bright here in the USA. I suspect it may be five, ten, or perhaps more, years before telegraphy proficiency as a licensing requirement (code testing) disappears in this country. At this point, the FCC (our government regulatory agency) has decided to do nothing until a consensus on the issue is reached within the Amateur Radio

community. Clearly, there is no consensus whatsoever at this time. If a consensus is reached, it will take another one to two years for any change to go through our regulatory process. However, since most Americans can be very pig-headed (stubborn), many doubt a consensus will ever be reached. Therefore, many are hoping the FCC will simply give up on the consensus idea, deciding the issue based on what is needed, from a regulatory perspective, to meet the goals and purpose of the radio service. Nothing so far suggests they intend to do that anytime soon.

> (snip) We still support it as a historical

> not as an uneccesary barrier to HF
> access.   (snip)

Unfortunately, too many in this country cannot separate code use from the code test. They view the possible removal of the code test as an assault on their CW identity or lifestyle. Another group views the code test as a filter to keep out undesirables ("those people" - a form of bigotry based on Morse code). Still another group views the code test as a solution to this nation's wider social problems (lowered education standards and so on). Whatever the case, almost all of these seem to forget that code testing is simply a licensing step into what is fundamentally a recreational activity (with meaningful undertones, but a recreation nonetheless).

Take care, Matt. Enjoy your new HF privileges. Perhaps all Amateur Radio operators here in the USA will one day be able to join you, and all those in other countries now without a code test, on those frequencies. If that happens, you can darn sure bet Americans will be among the last in the world to do so.

  I'll try to sort it out, Rick. Albert is blaming me for what Clint said and I suspect "FT243" is blaming me for the subject line in this newsgroup thread. I don't think either one of them is actually reading what I've said, at least not without the anger carried over from what others have said. Does that make any sense? If not, don't worry - I'm getting confused trying to figure out what each one is actually talking about also.

Use mine. It really doesn't matter, its just droids filling out fields
on a computer screen. Thats all they need it for. Its not like Radio
Shack is interconnected with the Social Security Administration.

All prices are in US Funds.

QTY.	Part #	Unit Price	Description
OPTO.			
125	TIL311	$7.00 ea.	The TI TIL-311 is a Hexadecimal Dot Matrix Display with integral TTL driver electronics to accept, store & display 4-bit binary data, Epoxy package
		(Note: This	part wholesales at about $16.50 each)
8	TIL311A	$7.00 ea.	The TI TIL-311A is a Hexadecimal Dot Matrix Display with integral TTL driver circuit to accept, store & display 4-bit binary data, Plastic package
10	DIS1417	$7.00 ea.	The TI DIS-1417 is a Hexadecimal Dot Matrix Display with integral TTL driver circuit to accept, store & display 4-bit binary data, Epoxy package

For a copy of the TIL311 Datasheet see:
http://www-s.ti.com/sc/ds/til311.pdf and it is mirrored at
http://umwnt1.physics.lsa.umich.edu/mttc/images/til311.pdf

275	Green LED	$0.10 ea.	Rectangular 5mm x 2mm face/lens $17.50 per bag of 250 ($0.07 each) and
8,250	Red LED	$0.10 ea.	T1 3/4, 5mm Diameter or 0.2" Diameter Sharp P/N: GL5PR4 (5mA at 1.9V) $17.50 per bag of 250 ($0.07 each) and $100 per box of 2000 ($0.05 each)
106	MAN6440	$0.95 ea.	Dual Digit, Green 7 Segment display, 0.56" tall character, Common Cathode $15 per tube of 20 MAN- 6440 ($0.75 ea.)
85	FND6740	$0.95 ea.	Dual Digit, Red 7 Segment display, 0.56" tall character, Common Cathode $15 per tube of 20 FND-6740 ($0.75 ea.)

TTL CHIPS, DIP Package

525	7407N	$0.18 ea.	$4.00 per tube of 25 ($0.16 each) Hex Non-Inverted Buffer with Open-Collector outputs
605	74ALS20AN	$0.19 ea.	$4.00 per tube of 25 ($0.16 each) Dual 4-Input Positive NAND Gates
240	74ALS27AN	$0.19 ea.	$4.00 per tube of 25 ($0.16 each) Triple 3-Input Positive NOR Gates

1,325 74LS74AN $0.25 ea. $5.00 per tube of 25 ($0.20 each)
                           Dual D-Type Positive Edge-triggered
                           Flip-Flops with Preset and Clear.

100 74ALS74AN $0.25 ea. $5.00 per tube of 25 ($0.20 each)
                           Dual D-Type Positive Edge-triggered
                           Flip-Flops with Preset and Clear.

RESISTORS

55,000 100 Ohm, 5%, 1/4 Watt Carbon film resistor, $1 per 100,
                           $15 per box of 5000 or
                           $100 for 50,000 pieces.

3,400 220 Ohm, 5%, 1/4 Watt Carbon film resistor, $1 per 100,
                           $12 per box of 3400 or

3,400 680 Ohm, 5%, 1/4 Watt Carbon film resistor, $1 per 100,
                           $12 per box of 3400 or

A pack of 100 resistors is $4 inclusive shipping to anywhere
in the US and Canada

e-mail: jrpart@excite.com

Minimum purchase $4 including postage.

No shipping is included in the above prices. To quote a
total including shipping, I require your full ZIP code or
postal code in addition to a list of what you are interested
in. Please specify the country for international orders
outside of North America. The shipping you will be quoted
is the cost of the postage stamp (plus insurance if requested).

The only part that I will ship for a total of $4 (by regular
mail) to anywhere in the US and Canada is a pack of 100
resistors.

All components are new. All semi-conductors are stored in
anti-static tubes/bags or on anti-static foam if you purchase
less than a tube/bag.

Offers on the lot are welcome. Keep in mind that I am looking
for a price below wholesale, but more than the commercial buyers
of surplus electronic parts are offering.

Just because its old don't make it useless. Actually it just proves how
useful it really is.

The opinion of the FCC about cw is not relevant. The present crew there
doesn't have a good track record of late. I.E. BPL.

  Nobody said Morse code wasn't useful - it's a fine recreational activity. However, when it comes to a licensing requirement, the sole issue is whether Morse code serves a regulatory purpose. As the FCC said, it doesn't today.

> The opinion of the FCC about cw is not
> relevant.   (snip)

  Really? Since they regulate this radio service (including the licensing requirements), I somehow suspect the FCC would strongly disagree.

You panty waist crybabys knew there was code in Ham Radio But was to
lazy to learn it.
It would have show the world you at least knew something other then
crying.
But some of you were in the Boy Scouts and learned then What happened

did you brain die?
Code will pass so you can say I'm a ham Wow be proud hold your head
high.
Now we can attack something else or someone.....Seig Heil

Too bad. Your attitude will cause the US to slip one more notch down on the world stage. While the rest of the world gains from expanded comm. You and your buds will keep US citizens from same. Bravo for you. You are a curse on amateur radio, that won't go away soon enough. Sorta like a cancer that will not die till the host dies.

Yep I agree "DO AWAY WITH CODE", it is not worth using anymore, out dated
and just plain hard to learn, do away whit it and we can all be like the
CBer's
10-4 GOOD BUDDY.................

It is not relevant because the FCC has stated many times that it will do
what the members of the ARS want on certain issues. This is one of them.

Cancer? boy you really show your ignorance. Without old timers you would
all be running AM with beep boxes and yelling ten four all over 20 meters.

We are the ones that keep trash like you out of the service. And will
continue to do so.

FOR SALE: TEKTRONIX 547 OSCILLOSCOPE

I have surplus to my needs a Tek Oscilloscope
model 547.

This scope is in excellent condition, both
cosmetically and operationally.

It Includes a 1A4 Plugin which provides
4 input channels to observe 4 different parameters
on a concurrent basis. The bandwith is
50 MHz per channel.

Also includes the scope cart with a storage
shelf on the bottom and a handy drawer.

Due to the weight and size of these two
items they are available for pickup only

in Northwest Phoenix Az.
Asking $125.00

email billandr@aztecfreenet.org if interested.

Thanks for reading, Bill

  That isn't a blank check, Dan. The FCC has defined the debate - the goals and purposes of the service. If the Amateur Radio community doesn't reach a consensis within that definition, the FCC clearly isn't going to act on that consensis (and will decide the matter on their own). None of the pro-test arguments I've seen recently fall within that definition.

  BS, Wayne. In case you haven't noticed, Morse code hasn't been a requirement to get a Ham license (the Technician license) for many years. And, during that time period, there hasn't been, based on FCC enforcement reports, any significant increase in "CB-like" behavior on the frequencies used by those Technician license holders. In other words, the "CB" threat just isn't supported by the facts.

  Keep it up, Dan. Attitudes like this will certainly increase the numbers of those opposed to your way of thinking. The rhetoric from you and Bruce only makes my goal of ending code testing that much easier.

Tho' I tend to agree that the minimal 5 wpm code requirement should be
kept(What can I say, I'm tradition bound), a couple of the guys in this
thread on that same side of the argument are sounding more like the '50s CB
"Channelmasters" than the kind of Hams I tend to respect. You have, at
least, kept a nominally polite attitude in your responses. It will be
interesting to see what those with the final say on licensing will finally
decide, won't it?

  Hey, I love traditions also (perhaps more so now that I'm getting older).
But, I also realise tradition has to bow to the realities at some point. I
simply cannot see code testing being a requirement for Ham radio for the
next several hundred years. In other words, it has to end at some point.
Since no communications system has been designed in many years that depends
on code skills, perhaps now is that point.

> (snip) a couple of the guys in this

  Noise and static, Harold. Clearly, some have decided that if code testing dies, Amateur radio should die with it. Some have even said so. In that vein of thinking, they have taken a very destructive approach to the whole issue. However, Ham radio is obviously not going down that easily and we all have to go on together regardless of the outcome of this debate. Therefore, I think it is wise to keep the debate civil.

  Since the ITU has now ended the international requirement for Morse code on HF, I think it is inevitable that code testing will eventually end. The question now is when and how that will happen. At this point, we can only guess.

Roland . . .

While my background is a whole lot less impressive, I do remember the 50's.

But, I never saw any fun in; hitchhiking 30 miles to the Customs House in Boston, filling out an application, walking around looking for a free Notary Public (I had no money when I was 16), and back again to wait my turn to take the test. With another trip to Boston to drop the N from my call! . . . I like the way it's done now.

My mode of choice became CW and as I increased my speed, could not afford a bug, so I made (and still use) a cootie key.

I do not want to see a no-code ham radio! For one reason, I fear that the CW bands will be changed or disappear altogether. I would like to see more CW users, and the only way for that to happen is with a code test. Some of those who learn code will find out how much fun it is.

What I find offensive, is the idea that the young people will bully their way into changing a old tradition to suit their "I deserve everything I want at no cost to me" lives. If CW were really dead, I would re-think my opinion.

5 wpm is very very easy!

Ron Crowley, retired tile artisan

Heathkit HW-16 for sale is in very good cond, a bit of use wear, but does work very nicely. I put it on the air last week-end and it had 50+ watts out and a surprisingly good receiver. (I hadn't used it for awhile and had

forgotten how much fun this little rig is). Asking $90 plus shipping. Will send pics if you are interested. 73 all Gary K[illegible]IMJ

Kenwood TS-850SAT, TS-140S, ETC.
Someone else started off their "wants" list this way, sounded good to me! If you have a spare HF rig that you are not using, thats in excellent condition, please send me via email your BEST PRICE SHIPPED - would also be helpful to include picture of what you have and accessories. Would like to stick with Kenwood, ICOM, Or Yaesu rigs. Must have antenna tuner built-in or have a external tuner. Mic is not needed as I have a Heil Goldline with mic cable for all listed rigs. Looking to purchase within the next few weeks so hurry please email and I will get back with you ASAP! RIG MUST BE IN EXCELLENT CONDITION BOTH ELECTRONICALLY AND COSMETICALLY!!

By law ALL must do so. However it is generally very inconvenient. For
example the offices of my "local" ISP are 50 miles away.

That's an urban legend; no one except the United States Treasury HAS to
accept cash.

See http://www.snopes.com/business/money/pennies.asp and the link to the
US Treasury FAQ at the bottom of the page.

Tell you what, the first son of a bitch who turns down my cash for a payment rendered will be called on for it. I'll take that all the way to the f*#cking supreme court. CURRENCY (CASH to those who don't know what it is) has always been an accepted form of payment and if it is ever refused, then we have a MAJOR problem. AND AGAIN, NOT EVERYONE HAS CREDIT TO USE ANYTHING OTHER THAN CASH! SOME MAY NEVER HAVE CREDIT. G.W.

Tell you what, go into just about any convience store or fast food restaurant
and try to pay with a $100 bill, then try to buy something with any form
of cash from Amazon.com.

Good luck in court.

BTW, you are correct that cash has always been an accepted form of payment,
at least since it was established. It however, has never been mandatory that
anyone other than the government accept it.

Legally, it is totally up to the seller what form of payment is valid
unless there is some sort of contract between buyer and seller.

This may somewhat contradict my reply before but I understand why "large" bills aren't welcomed. They should have it posted. I did go past a bar/lounge today which had a sign saying "NO $50 OR $1OO Bills accepted, no exceptions". At least one is forewarned. Places do not like to keep large amounts of cash on hand even for change. That is understandable. I don't either - in my business. Though I don't post such warnings and it would make me cringe to have to scramble for change, I WOULD. I never turn down cash. I STILL think they would have to take it, if that was ALL you had. I'd welcome that argument in court. CURRENCY IS CURRENCY, regardless the denomination. I HIGHLY DOUBT, if you went in a place for a meal and produced a $100 bill, they would just let you leave because it was a $100 bill. They'd take it and scrounge up the change. TRY IT. Calling the cops to report you for having a large bill? Hardly a crime. It isn't as though you're trying to leave with out paying.
Yes, I'd love to see that end up in court some time. Why - to turn down cash of any denomination is as bad as trying to cast aside the amendments this country was founded on.. After all, currency was established as a way to pay debts. It has been around almost as long as the Bill of Rights itself, if not longer.

As to buying from Amazon.Com, that is a moot point. You don't do CASH transactions like that via online sales. That isn't even an argument. The only way "cash" comes into a picture there which is a false use of the word, is to give them your debit card numbers to withdraw funds right from your account.. CASH - PREPAID, all are being intertwined now days. Sorry, I still disagree. MANY DO NOT HAVE CREDIT AND CASH WILL STILL BE THE ONLY WAY!
You're thinking too much of bible prophecy and 666. It isn't that bad - YET.
G.W.

An after thought. I have seen establishments who have accepted large bills

and had no proper change - make out a check to the party in the amount owed them. Therefore that party producing the large bill then had the burden to go get it cashed to redeem his/ her change from it. The other thing is, though it is becoming a common practice not to accept large bills or cash at all in some places, it still does NOT outlaw the use of cash if that is the only manner one has to pay their debts. CASH WILL LIVE.
ON in society for quite some time. Those without credit will still be at a disadvantage in some ways, but they learn to deal with it. I've been without and with credit and it makes no difference to me. You live within your means and surroundings. G.W.

Sorry currency doesn't work the way you want.

The way it works is defined in section 392 of Title 31 of the United States
Code.

Go argue with the US code, not me.

I have no idea what bible prophecy you are talking about nor do I have
any interest in such.

To summerize once again, the code basically says that the manner of settling
debts between private parties is entirely up to the parties involved.

The US code neither demands nor forbids cash transactions in any form
or denomination of currency.

It is perfectly legal (though rather dumb) to open a car dealship with
a big sign out front stating that payment is only accepted in the form
of supermarket money orders. And it is perfectly legal for the dealer to
repossess a car for nonpayment if someone tries to pay with anything other
than supermarket money orders.

It makes no difference what either of us thinks or wants the system to
be; it is defined in the US code.

Read the friggin' US code.

Mine is only eight miles away for recumbent mobile, KA6SQD, here in Star
Valley on western border of Wyoming. A good heart and muscle exercising
pedal from Etna to Thayne and back on BikeE.

I pedal the eight miles to/from my phone company ISP here in Star Valley
in western Wyoming. Good exercise for damaged leg and heart muscles.

But BikeE 'bent not the best for my loss of balance. Thinking seriously
of building Mother's Trike.

Construction article on Mother Earth News 2F1R homebrew trike with
specs, parts list and drawings.

This article is available online at the Mother Earth News website.

But, if proprietor refuses my cash without a clearly posted policy in
window - I leave all items collected at counter and leave. Never go
back! I'm only one but message spreads.

> After all, currency was established as a way to pay debts.

Unfortunately, Federal Reserve Notes only BUY DEBT. Ask any federal reserve attorney. Though they are liars, they cannot wiggle out of that issue. Only gold an/or silver coin PAY debt. Paper is intrinsically worth only what it may be exchanged for and has no particular value in and of itself. Why do you think prices for goods and services continually rise? Couldn't happen with gold and silver so easily.

That which doesn't PAY debt may only be used to "buy" debt!

Federal Reserve Notes are not money but only a medium of exchange which
may be exchanged to acquire debt. Not my words but those of law!

Up til mid-60s or so, all U.S. citizens [now serfs-in-feudal-tenure] had
opportunity to pay debt with coin or paper redeemable in coin. Paper
now only redeemable in more worthless paper that does not and can not
pay debt.

ITZ THE LAW!!

You wouldn't have it any other way, would you now? Or would you defy
"your" government?

Ya know, you got a point there. The Dollar HAS taken a dip in recent years
in comparison to say the Yen and maybe some others. SO in that case, the
dollar wasn't worth the paper it was written on... OR made from. Gold and
Silver COULD lose value, it has happened, but not quite as likely. G.W.

Try it at FEDERAL EXPRESS SOME TIME!!

There are numerous businesses that no longer accept cash.
You can't force them to!

Paper , gold, silver, or any other thing is only worth what you can get someone to give you something for it. Face it, what can most people do with a bar of silver or gold ? About the same as they can with a piece of paper that is printed on. If it was food atleast you could eat it. Do you remember about 20 years ago when silver took off in price. YOu could get about $ 1.50 for a silver dime but only a dime for the clad ones. Now what can you get for the same silver dime ? Much less . Unless it is a 'rare' collector dime. Anything is just a way of trading your services or items you have for something someone else has. It is only worth whatever ammount of whatever you want that someone else has and what they are willing to give you for it.

I'm NOT claiming to be a GENIUS - ASS HOLE. I'm merely saying I defy anyone
to deny me goods when I present cash as payment. CASH is a method of payment
and if that is all I have, then I don't believe they can deny me the use of
it in paying my debts. Speaking of geniuses, you're not so freaking bright
either.. Your title speaks well for itself - GAS. YA BIG FART! Blow it out
your ass.
G.W.

Well then, I believe we have a problem. A BIG problem. It is discriminatory to those with no other way to pay. I think the Government needs to get off their ass and correct this problem. G.W.

Though I didn't cite the example you're referring to in this case, if there
was a Fed Ex office near me, I'd give em a run for the money. Unfortunately
there isn't. NOR do I deal with them much. G.W.

Funny, I was told by an attorney that if cash is offered and refused in payment of a debt, the debt is considered paid! Cash having been refused, the debt is no longer collectable. Where is it in the law that Cash is not acceptable for all debts public and private?

ALAS, someone with some sense! I've been told the same and thus my argument of they must accept my cash if that is all I have to make payment of a debt. THANK YOU! G.W.

On the dollar bill I just retrieved from my wallet, it clearly says,
"this note is legal tender for all debts public and private".

There might be some disclaimer about small change. Not for sure but I
think there is a maximum amount of say, pennies, a person is required to
accept.

US Code, Title 31, Subtitile IV, Chapter 51, Subchapter I, Sec. 5103:

"United States coins and currency (including Federal reserve notes and
circulating notes of Federal reserve banks and national banks) are legal
tender for all debts, public charges, taxes, and dues. Foreign gold or
silver coins are not legal tender for debts"

You need to get out of the bunker more often...

That is your right according to the law, but so what and who cares?

Jeeze, someone actually capable of rational thought.

How refreshing.

You wouldn't know what the law was if it bit you on the ass since it is
obvious you have not read any of it.

Take your delusional ravings elsewhere.

What problem?

Seeing as how the system has been basically the same for 2 centuries, there
doesn't seem to be any problem out there other than in your imagination.

If you have cash, you can open a checking or savings account and get a debit
card for those businesses that require plastic payment.

You can go to most supermarkets or a post office and get a money order.

If you choose not to, that's your choice. No discrimination by anyone other
than you.

> the debt is no longer collectable.   Where is it in the law that Cash is not
> acceptable for all debts public and private?

The law says the Treasury HAS to accept cash, but private transactions
are up to the parties involved.

You can pay your $10,000 Federal Income tax bill in pennies and the
Treasury HAS to accept it.

Before anyone brings up the old legend about pennies, the Coinage Act of
1965 specified that all U.S. coins are legal tender in any amount.

In lieu of a contract or notice, cash is concidered acceptable by default

and offers of cash genrally must be accepted in payment of a debt.

If your apartment rental contract says only postal money orders are valid
for payment, the landlord can refuse to accept cash or anything other
than a postal money order.

If a business has a big sign that says certain forms of payment are
unacceptable (i.e. bills larger than $20), the business has no legal
obligation to accept such.

If you sign up for a cell phone plan that says the bill will be payed
through a debit to your credit card, the phone company has no legal
obligation to accept anything other than a credit card payment.

The US went off the gold standard in 1933. If that was the cause of the
dip in the value of the dollar versus the Yen, it sure took a while to
happen.

And non-existent cash can't be stolen, and non-existent checks can't be
stolen, and non-existent rational thought can't be stolen.

Have you tried to open a checking account lately? If you don't have an active credit history banks refuse to give you a checking account. It took me two years to find a place to get a checking account because I paid cash for my truck, and the loan on my home is from a relative, because the interest on his CDs was lower than what I am paying. There as absolutely nothing in my credit history right now, and I can't even change banks because I can't find another bank who will let me open a checking account.

Not so. I walked into a bank in Smalltown, Ohio (First Merit) and
opened a checking account in a matter of minutes with nothing more than
the driver's license I could have pulled out of my turban.
They didn't even ask about other credit lines. I haven't paid a "credit
line" in two or three decades.

You're dealing with the wrong banks.

I don't think a DISCOVER card counts on wide acceptance but I think it
says on the door here that they accept it.

I checked with every bank in the area. Florida has a big problem with illegal aliens and with identity theft, so they are overly cautious. I had to have a savings account with my credit union for over two years before they finally agreed to the checking account, and on did it because I had a large savings account. A lot of banks down here won't let you open a savings account with less than $500 for the first deposit.

I'm in Puerto Rico and I think we have SFla beat for illegal aliens and
fraud. After all, we provide you guys with these scamps. Even still, in
the local bank (theres only one in this town) they only required cursory

identity. They made an issue of my Social Security number since I lost
the actual card 30 years ago (I've already told that story) but they
accepted a copy of an old tax return that showed my SS number. My wife,
an immigrant, had no SS number at the time so they just put her down as
999-99-9999 on the joint account.
I suspect you haven't been to ALL the banks in your area or else you are
walking in the door blabbing about Credit Unions and such and telling
them things they don't want to know.
"had to have a savings account with my credit union for over two years".
Shop around, dude.
If you need a credit card or something I'll gladly forward my spam to
you and you can have a whole box full of credit cards with "no
obligation". I get these g*&#%dam things in the mail regularly from
banks I've never heard of and I use them for grain filler scrapers on
old radio cabinets.
You're doing something wrong, Michael A.

-Bill

My PO will.

But if you have plastic, that kind of implies you have a checking account,
so why would you need a money order?

Bzzt, wrong.

See http://www.snopes.com/business/money/pennies.asp

Also see the "What is legal tender?" link from the Treasury at the bottom
of the page.

I was not saying the gold price dipped and created the drop in value of our
dollar to the yen. I apologize if I ran the thought together. I was

addressing two issues someone else had raised, at once. I was merely saying that gold and silver HAD been known to dip in price, so even it can't be relied on to be "Rock solid" in price. As to the dollar - I was trying to say when it dipped in value to the Yen a few years back, that would be similar to saying it wasn't worth the paper it was written on or produced on. I forget how far down we were from the yen, but it did happen. If memory serves me correct, that is when the Ham radios shot up in price. Since the dollar balanced out to the Yen, I wonder if they have adjusted the prices of Japanese equipment accordingly? G.W.

Ah, our PO accepts plastic for Money Orders. Why get a MO with plastic? EASY... To pay for an e-bay purchase when the seller isn't set up for pay pal and can't accept plastic. AND so he can get the cash and you don't have to wait for them to get the check cleared. I realize it doesn't take long now days to clear, but they still use the excuse, so I circumvent it with a MO. I did it just this past week. Situations like that! G.W.

As a matter of fact, yes. I opened a checking account on an LLC I formed
without the ink even being dry on the paper work, much less with a credit
history.

I had a checking account, credit cards, and a credit history by the time
I was 18 by the simple expedient of finding a small store that carried
it's own credit, buying something cheap and paying it off early.

Opening a checking or savings account takes little more than a SSN and
cash to start the account.

Thats a silly argument. You can easily have a credit card with no
checking account.
Why I would need a Money Order is basically due to internet sellers who
won't take personal checks or online payments.

GW, stop talking about things that you don't know about and you won't
have to back-pedal so much.
What the devil are you talking about the "dollar balanced out to the
yen" and gold prices?
Compare a few graphs available on the internet and get your story
straight then report back.
Sheesh,

face it, gold and other metals do rise and fall in price. maybe not much,
but they do. the dollar DID dip pretty low to the yen a few years ago. that

is a fact. i know it. i don't have to look it up. maybe you need to do
research. it doesn't matter. it is old stuff anyway. not worth arguing
about. G.W.

I have a good condition 9/10 cosmetically, 10/10 functionally. With whip rubber duckie, Kenwood rapid charger and 1 good battery. I will sell for $100 shipped CONUS. Photo upon request

Also for sale, cleaning up:

I was given a new RS pro-96 for a present. We do not have digital here. I am selling it since I already have a BC780XLT. The package is complete from RS, box, manual, antenna, clip and regulated external PS. I will sell the package for $500 shipped. POSTAL MO only. I do not use paypal.

Also have Motorola trunking base and some P110 UFH portables. Photos available for all.

I understand that one can't rent a car without giving a credit
card number! I've asked several rental agencies 'just for the
hell of it' and they all responded that way! Terry.

On one occasion I had cash (including coin) refused as payment.
I was under the same impression; that a seller had to accept
'Coin of the realm/Standard Currency/Treasury Bills' whatever you
want to call it! So I asked our BBB (Canada).
They advised that was not so. Any offer to sell and buy is an
agreement/contract (conditions of sale) between the seller and
the buyer.
If the seller asks that payment be only in denominations of five
dollar bills or by cheque etc. that is one of the terms of the
agreement. So if I buy an old radio and the seller says "No bills
smaller than 20s, I want $200 by Thursday next week etc. and you
get it out of here by Saturday next week ...." they are all
'Conditions of Sale'.
Terry.

Hiya;
I have a Radio Shack HTX-10 New with all accesories.
I would like to get $100 for it or swap for tube amplifier f some kind.

Please respond to my email address directly,,,because I seldom follow the posts
Thank you very much
Fred de KG4CPE

     It's likely a legal hand in your pocket in case you fail to
pay any charges they see fit to make.

I am beginner in Radio..
After learning the basics I have several doubts..
Please clear them

>Where shall I begin to start experimenting with radio ?

>Will an oscillator radiate if its output is connected to an antenna ?

>How to measure reactance of an antenna?

>How can you easily detect radiation of a particular frequency ?

>How to radiate more power through a given antenna ?

>How to calculate power radiated by an antenna ?
......

Nope. Just value my privacy.

When asked my name I say, "Puddentain, Agrisomolov Mielivich Arkady."
Nips that one in the bud.

My answering machine gets rid of salespeople by requiring a message be
left, - "Yep, you've reached me at 883-4156. Please leave name, number
and a brief message. Date and time have already been reset in this, the
power outage capitol of the world. Thank you."

[dial tone]

Cheapest spam killer I've yet found and I don't have to get on anyone's
list either.

I find starting my message with the three-tone wrong number sound works real good.

No ID, to the message you go...

Snowing like a big dog here. We're at the inch an hour rate.

What difference does it make if he couldn't get credit? MANY CAN'T OR DON'T WANT IT. Not everyone enjoys getting caught up arming themselves with the smallest, lightest weight shovel in the world. That is a large part of the problem, hundreds of thousands of people are in depth up to their ears and countless thousands have filed bankruptcy and WE PAY in the end.
They are conveniences, they can show clout, dignity, etc.. but they can create - very easily - for the best of families, a hell - real fast. G.W.

Motorola Radius GP300 UHF 438-470mhz, 16 channel, 4 watt portable with rapid drop in charger.
The battery is about 60%, due to lack of use.
This was a 8 channel converted to 16 channels. I've had the radio over 10yrs and have never had a problem. Also comes with heavy duty belt clip.
Asking $175.00 plus shipping. Cont. US Only.
I'm also looking for a late model dual band mobile for possible trade for the radio.
I would be interested in the following models:
Alinco
DR570
DR590
DR599
DR600
DR605TQ

Please email direct if interested..........

thnx

Oh, I've been offered all kinds of credit by local banks. Don't need
it.

I can manage my money very well thank you.

Let the credit fools pay dearly for mis-managing their finances.

"...hundreds of thousands of people are in depth up to their ears..."

Language challenged - makes my day!

Quicken lets you see how you're doing. When I charge, it is entered in a Quicken CC account. The end total is transferred to an (as yet) un-numbered check to the CC company. I know at a glance how my finances are.

Of course, I've never sent those bastards a dime in interest. If I can't afford to pay for it, I'll save until I do. No balance, no interest.

Wanted: If Anyone Has Any Surplus Motorola Radio Parts I'am Looking
For A 4 Pin Motorola Mocom 70 Or Motrac Chassis Connector For A Radio
I'am Restoring If Anyone Has Any Please E-Mail Off The List, I Can Be
Contacted At: n1wco@yahoo.com

Thank You
Eric Pierce

Though your questions almost sound like a troll, I'll offer a few
answers...
See my replies inline below:

Jean wrote:

> I am beginner in Radio..

> Please clear them
>
> >Where shall I begin to start experimenting with radio ?

It depends on what sort of experimentation you want to do. If you want to
build radios, begin with a few simple kits, like a shortwave receiver...

>
>
> >Will an oscillator radiate if its output is connected to an antenna ?

Yes, an oscillator will radiate even if it's output is not connected to an
antenna, if it isn't shielded somehow.

>
>
> >How to measure reactance of an antenna?

I use a variety of meters. Currently, I use the MFJ-259B, which tells me
a lot about the antenna, however, the reactance isn't necessarily my first
concern.

>
>
> >How can you easily detect radiation of a particular frequency ?

Well, that's the purpose of a receiver. A receiver typically allows
tuning to a particular frequency of interest, thereby making it possible
to detect radiation at that frequency.

>
>
> >How to radiate more power through a given antenna ?

If the antenna is resonant at the frequency of interest, generally it
will radiate more power than a non-resonant antenna..

>
>
> >How to calculate power radiated by an antenna ?

power radiated by an antenna is related to it's resonance and design
relative to the transmitting frequency. Of course, you would need to know
the output of the transmitter and also subtract the losses of the feedline
between the transmitter and the antenna.

>
> ......

Thera are so many answers to this one, I don't know where to begin...

>
>
> Help me through google

If you are good at searching with google, you can find all of the
information you want, and more...

Hi,

I'm looking for the knob and "collar" (I don't know what you call it)
that is the PBT and Notch control for an R71a. Icom is out, and I'm
hoping to find someone who has a dead R71A, or one of the other Icom
radios that use the same knob and collar. The guy I biught a used one
from tried to clean it and ruined them, they basically fell apart after
getting dunked in whatever it was he used. The smoke tipped him off

before he dunked the others in the little tray..

If you have one, let me know...

TIA,

BDK

Are you retarded?

It has nothing to do with RadioShack you idiot. DirectTV, DISH
Network, SprintPCS, and Verizon all *require* SS numbers for their
credit checks. If you don't like it don't get a cell phone or
satellite dish.

The customer is certainly welcome to write it down and hand it to the
cashier if they don't want to say it out loud.

I have a new in box Motorola M1225 LS 25-40Watt Mobile Unit,
MINT/UNPROGRAMMED. still with mic and clip, hardware, manual, and safe op
manuals. The split is 450-470 UHF. Never programmed. Photos upon request

Model # M44DGC95A2AA
asking $275.00

With whip rubber duckie, Kenwood rapid charger and 1 good battery.
I will sell for $90 shipped CONUS. Photo upon request

Also for sale, cleaning up:

I was given a new RS pro-96 for a present. We do not have digital
here. I am selling it since I already have a BC780XLT. The package
is complete from RS, box, manual, antenna, clip and regulated
external PS. I will sell the package for $475 shipped. POSTAL MO
only.

Also, 1 pair (2) Motorola 2 channel Radius P110 with 1 good battery (new one
costs $30) ,
antennas, 2 chargers.
Model #'s P44QLC20A2AA

Asking $220 for the set OBO

Photos of
all units available. Postal MO preferred. I do not use paypal. I will
consider COD if paid by buyer.

Please let me enlighten some of you "youngsters" and some rather lazy ones I might add on what us "oldtimers" consider ham radio really is. Amateur Radio is truly changing ..... right. It truly started with a Mission Statement to serve the public in case of emergency. It's become a super CB'er gab medium "legally" allowing more distance and power.
1) Back in the mid 50's we had to travel to an FCC office and pay a few bucks to take a supervised exam both written and International Morse code. Under those non VEC conditions I received 4 full college college credits for my General Class license that to this day appears on my transcript from Univ of the State of NY.
2) Back then ALL us hams read thoroughly the ARRL Amateur Radio Handbook, some of us built our first receiver (usually super-regenerative) others purchased our receiver but definitely we all built our first transmitter from "junk" parts or purchased a kit.
3) In keeping with the Amateur Radio Mission Statement us "old timer real ham" ultimate dream was and still is today to possibly someday save some lives of public that may be in distress by monitoring one of the international distress frequencies almost daily.
4) For those of you interested try some of these links for ideas to set up a schedule.
http://www.tpub.com/content/istts/14225/css/14225_25.htm
Because of propagation skip I monitor at home here in Phoenix:
* 500 kHz -- International CW/MCW distress and calling (Because I do copy CW 60+wpm)
* 2182 kHz-- International voice distress, safety, and calling (Thanks to Ham radio I speak 6 languages fluently and 9 more broken enough to pass an urgent message)
* 8364 kHz-- International CW/MCW lifeboat, life raft, and survival craft (CW proficiency plus past USN enlistment)
* 121.5 MHz-- International voice aeronautical emergency (am licensed private pilot - single engine/land)
* 3023.5 and 5680 kHz-- International SAR frequencies for the use of all mobile units at the scene of a search. Also for use of shore stations communicating with aircraft proceeding to or from the scene of the search. CW and voice. (I am involved in Search & Rescue being member of volunteer branch of local Sheriffs Department and a private pilot)
5) In case some of you "modern VEC hams" aren't aware a signaling device capable of CW can be made from something as simple as a "back

wired" cheap transistor broadcast receiver capable of signaling a monitoring "old-timer antiquated" ham like me to summon help thus saving lives. I have to date logged nineteen (19) actual distress calls since 1954 including 9 merchant ships, 4 military aircraft, 2 commercial pleasure cruisers, one 52 ft pleasure sailboat in S Pacific, and 3 lost private aircraft. Most have been "CW" and only two were AM voice. Lets hope that if you happen to be among survivors of a disaster there is a "real old time ham" available that can from the most simplest "junk" signal for help to another "real old time ham antiquated" just in case your $3000 SSB transceiver is damaged beyond toast and unusable. (hihi) It never ceases to amaze me that you die hards seem to think that the only thing not damaged in a distress situation will be your modern technology transceiver (of which I have three).
6) Lastly: Believe me I have spent my share of years "ragchewing" SSB, SSTV, ATV, AM, packet (both landbased and with space shuttle), but mainly daily my specialty is mucho, mucho CW. Man I do love it!!!

Summary: Well, if you have read this thread this far you must know that I know my xyl and I are excessive because we can signal with a flash lights, automobile horn, and even with semaphore, etc. Repeating Amateur Radio's Mission Statement deals first with the commitment to aid the public in case of emergency and secondly with self pleasure. I personally don't feel a person should be able to call themselves a "Amateur Radio Ham" if they can't from the simplest means be able communicate with others in an emergency situation to offer service to the public. A lot can be done with just 5wpm CW by signaling with horns, lights or a simple "dirty" (spurious) transmitter. We recently had a ham with a flash light AND a mirror that did not know simplest CW go as far as setting an entire forest on fire destroying property and homes to signal a helicopter for help. Dumb!!!!

No, my friend CW will never be "toast", thank god for the lives that have been saved in the past and will be in the far future centuries to come and forever. You and others like you definitely won't be a part of it though ....unless you change your attitude. Nothing will ever replace it because it is so basic and simple!! Unfortunately many hundreds or even thousands have been lost because of not knowing this simplest means of communications .... International Morse Code. Some old timer friends and I have been working on a transmitter technique using natural surrounding minerals using damp tree branches for an antenna and without using batteries, tubes, or transistors, that generate legible spurious noise heard by any sensitive receiver for signally .... that is by CW, of course, sorry no USB/USB or AM!! (HIHI)

I'm still looking for the ADMS software for the FT-1500.

I will swap the following: Serial number for NUMORSE PRO and Hamstudy, which includes Hamstudy 5.0 (all tests are current) and WY5I Code.

If you would like to swap any of these please email to

hamswap@aol.com

Also, thanks to all that helped with the ft-3000.

I want to be a doctor but why should I have to take those tests for.
Lets get rid of thoses tests.

The Man said it all only those cry babes that are to lazy to learn
something new. Get a Life If you dont like learning code then go to
the Internet or CB.....

Incorrect analogy.

Here is an appropriate one; if I want to become a doctor in society
TODAY, as in, right now, the time that I live in, what's the point in
takeing classes, courses and earning degrees in alchemy and astrology
and waisting time learning about the black arts, potions, witch's spells
and/or voodoo? They're out of date.... there are new more effective
and applicable methods to get the job done.

Would you call a person with a PhD in brain surgery "lazy" if he
didn't want to learn how to brew bat wings in the blood of a newborn
pig under a full moon in order to get rid of headaches?

Thank you for playing, goodbye.

Clint

While I do tend to agree that cw is mostly an older form of communications and agree with Roland (btw, well said Roland) I would like to ask the "old timers" as to how many of you have recently, within the last 3 years, have actually taken someone aside and offered to try and teach them cw??? I have been slowly trying to learn cw but have found that locally VERY few people actually willing to try and teach cw to anyone. It seems odd to me that so many people are so willing to complain that no one wishes to learn cw when in fact I belive its the other side of the coin in that so many are unwilling to teach it to younger people. Thanks for your time, 73, Billy KE4PJR

Perhaps a better question would be: "How many of you old timers have had people express an interest in ham radio and asked for help in learning CW".

Answer: Several for the first part, zero for the second part.

Hi,

Wrong! Nothing goes out of date. We learn and build from old.
I am still using CW regularly.
I am on other modes as well but not as much interested as CW.
I see still people riding horse drawn buggy and climb mountains on foot.
I still see people writing letters instead of emails using fountain pen.
Still people paint pictures instead of snapping with digital camera.
I dont see anything wrong with that.
Let it be and let everyone do/enjoy whatever s/he likes.
Season's greetings, 73.
Tony, VE6CGX
P.S. How about guys who do not know how to drive manual?
Are they real drivers? They should give driver test
using stick shift.

Hi Billy,

Thanks for answering with your very intelligent response. Although I am
60+wpm I was not naturally that speed at birth. Here is the very simple
secret to learn CW and is taught to USN Radio operators with amazing
99.9% results. I was already a ham for 5 yrs with I joined the USN in
1959 but I saw guys & gals from tractors on farms to large urban cities
learn CW with great ease and fun.

Yes, Billy, I have directly taught scores of boys/girls men/women CW
with the following method:
1) CW is rythmn!!!!!! Like music with a metronome!!!! CW was taught
in the USN with music playing in the background at a "medium" speed.
2) Every student Radioman had an old fashioned "straight key" connected
to a code oscillator and then learned to SEND CW starting with the
letter A, B, C, etc. They learned the structure of letters by sending
them thus "automatically" learning to RECEIVE CW. Great, huh?
3) So, forget code tapes and code broadcasts until you learn the
structure of the characters again by sending plain text (newspaper,
magazines, etc) to yourself at the rythmn of music or just patting your
foot!!!
   4) If you want some help getting started I can do it by telephone to
start you with the rythmn needed. Simply email me with your telephone
number at address below.

Because when the FCC, in their infinite wisdom, decided not to require a sending test any longer. Everyone stopped bothering.

That is how I learned CW, back in 61. It worked for me. I now do 50 easy. And have done so for years.

Roland is right on target. And BTW Roland I have saved your comments. Glad to meet a real ham.

Dan/W4NTI

Hi,
I am a life time tuba player, hi.
There are many musician CW ops.
Season's greetings.
Tony, VE6CGX

A little extreme, mate, especially the Supreme Court part of your earlier submission;
if all the threatened legal action really took place, every third one of us would have
to be a lawyer. Ooooh, yuck!

Damned, I thought this discussion died a good while ago. First post I've
seen of it in about a week or better. But to answer your post.... It really
doesn't matter anymore. As screwed up as this world is, nothing surprises me

anymore.
G.W.

I'm always a bit amused whenever I hear a rant which promises to "take it to
the Supreme Court." Aside from this being a very USA-centered proposition,
the amusement stems from the fact that nothing guarantees that the US
Supreme Court will do anything. You may have a right to submit a petition
for an appeal, but they have the right to simply ignore you (letting the
opinion of a lower court stand).

And if you don't like that, you can write your congressman.

Ed

Though it would be within my rights to force the issue, you're probably right. This country is going to hell and as far as the Congressmen, most of them are the fault. It isn't "just" the President(s) who screws things up. Still, it could be interesting to test the issue. But the Supreme Court has more important issues to decide. Why worry about a manner of doing business that has been around for as long as the country itself OR MORE? Out with the old, in with the new.. CREDIT. Again, I say it leans toward the "666" idea. While your head may not have to be stamped 666 as it's been said to be needed in the last days, the fact of needing plastic is as bad. It still leaves those without plastic, without the right to purchase. Discrimination regardless how you look at it. This argument could go on forever. Until those that DO sit on Congress and so on get off their dead over paid - over compensated with benefits - asses - to correct the wrongs, it won't get any better. WE the little people can argue all we want. What the hell good does it do? NONE. Gets a bunch of us pissed off at others and for what? It isn't worth it. G.W.

Congress passed a law long ago that states that no
business is allowed to REQUIRE your SS number for a
business transaction. I bet RS will take some alternate
form of identifiucation.

These things have led to two modern phenomena -

1) Voter apathy - low turn-out., Whgat I cal the "ho hum" factor.

2) An aggresive Supreme Court that now makes KINGS and
supercedes not only the lower courts, but also the congress,
the Presdent and everybody else.

The balance of power went out the window, and the wealthy

minority controls everything through their puppets.
Some things are working well, but I think Democracy is in peril.

I hear you on the voter apathy - low turn out. I helped work the elections the last couple times and our local turn out SUCKED. Less than 1/2 of the registered voters. On another issue related, we here in SW PA had an issue on the ballot before PNC park and Heinz Field were built. WE the voters were basically asked if we wanted tax dollars and so on to pay for them. I can't recall the exact wording. The majority voted NO (like 90% against) but we had them shoved up our ass anyway. The politicians did as they pleased, they ignored the voters. So much for a vote being counted. No wonder people don't want to vote. WHY? When those in control do as they damned well please. Even our local Rep said he voted in the State House to approve the money.. Needless to say, he lost my support. He has tripped up in a few lies as of late. Somehow he still squeaks enough votes to get re-elected. G.W.

Exactly Clint. You have in fact SUPPORTED his point.

You should stay with the internet and FORGET amateur radio.

It's far too "dull and old fashioned" for a trendy "modern"
guy like you!

Stay off the air and we will ALL be happier, including you!

Can you guys talk to him some more HERE please, so
he will be too pre-occupied to get on the radio?

Thanks!
